

**MARCH 16–19, 2014**

Baltimore Marriott Waterfront Hotel  
Baltimore, Maryland

A large graphic of the text 'ENAR 2014 SPRING MEETING' is projected onto a paved waterfront promenade at night. The text is in a light blue, sans-serif font. The promenade is lined with several glowing yellow bollards. In the background, the Baltimore skyline is visible across the water, with various skyscrapers and buildings illuminated against the twilight sky. A large, illuminated 'W' logo is visible on a building in the mid-ground.

# ENAR 2014 SPRING MEETING

## MARCH 16–19, 2014

## Welcome

***I am delighted to welcome you to the 2014 ENAR Spring Meeting!***

I am indebted to a dedicated team of individuals for diligently planning what promises to be an exciting and enriching program.

For first time attendees of the ENAR Spring Meeting, I extend a heartfelt welcome and hope that you will continue to enjoy the annual meeting for many years to come. For returning attendees, I trust that this year's meeting will be most fulfilling and will energize you to continue to carry out the vital work of statistical practice, research and development. The ENAR Spring Meeting is a wonderful opportunity to attend stimulating scientific sessions targeting the most pressing issues in our field, to deepen our understanding of cutting-edge statistical methods and software through our education program, to connect with old friends and meet new ones, to identify prospective employees/employers, to explore the latest books and software from our exhibitors, and so much more.

***Scientific Program*** Led by Program Chair, Dr. Hernando Ombao of the University of California at Irvine, and Associate Chair, Dr. Qi Long of Emory University, the Program Committee has assembled an outstanding invited scientific program. This would not be possible without the contributions from many of you who volunteered to participate in the invited

sessions as organizers, chairs, and speakers. The invited program features recent advances in a broad set of topics such as statistical methods for longitudinal data, emerging methodology for big data (including, genomics, bioinformatics, imaging, etc.), clinical trials, functional data analysis, survival analysis, and epidemiologic and public health data. The scientific program will feature an expanded number of poster presentations, including invited posters, and contributed poster presentations. The ENAR Regional Advisory Board (RAB) will conduct a poster competition, which has been a resounding success in recent years. Finally, there will be numerous contributed oral presentations, which are an integral part of the Spring Meeting.

***Education Program*** Come and learn from the best! There is no better opportunity to bolster your understanding of methodology and software that may be beneficial in the workplace, to learn about a topic outside of your primary area of specialization, or to deepen your background in an area of interest. The Education Advisory Committee has compiled a set of fabulous short courses and tutorials featuring internationally renowned instructors.

The short course topics cover a range of areas such as advanced high performance computing techniques and strategies for massive data, longitudinal data (including missing data, surrogate endpoints, and joint modeling with survival outcomes), next generation sequencing, adaptive clinical trials, evaluation of prognostic biomarkers, causal analysis, and functional data analysis, among others.

The program will also offer a series of roundtable luncheons with distinguished discussion leaders addressing topics of interest to statisticians in academia, government, and industry.

**Keynote Lectures** Highlights of the ENAR 2014 Program include speakers for the Presidential Invited Address and the IMS Medallion lecture. I am thrilled that these lectures will be given by preeminent scholars who have made vast contributions within statistics and biostatistics. Dr. Robert Tibshirani, from Stanford University, will deliver the Presidential Invited Address entitled “A Significance Test for the Lasso.” Professor Tibshirani has made seminal contributions in penalized regression, most notably the lasso, as well as the analysis of high throughput microarray array data. He has received numerous awards including some of the most distinguished honors in statistics and in science more broadly. He is a member of the National Academy of Sciences, was a recipient of the Committee of Presidents of Statistical Societies (COPSS) Presidents’ Award and the Statistical Society of Canada’s Gold Medal, and is a fellow of the Institute of Mathematical Statistics (IMS), the American Statistical Association (ASA), and the Royal Society of Canada.

Dr. Xihong Lin, from Harvard School of Public Health, will give the IMS Medallion Lecture. Professor Lin has made a tremendous impact to the theory and practice of biostatistics, including contributions to methodology for mixed models, nonparametric and semiparametric regression, and statistical genetics and genomics. Among Professor Lin’s numerous honors, she is the recipient of the COPSS Presidents’ Award, the Spiegelman Award, and the National Cancer Institute MERIT Award. She is a Fellow of the ASA and IMS.

**Additional Meeting Activities** There are a host of other activities at the ENAR Spring Meeting for participants to find opportunities to engage. The Spring Meeting will feature the popular Career Placement Center. For participants seeking employment, be sure to register to gain access to many of the leading organizations in the field including government, academic, and private institutions. The Fostering Diversity in Biostatistics Workshop will be held on Sunday, March 16th. This workshop targets undergraduate students, undergraduate faculty, graduate students, graduate

faculty, and professionals from industry and government, with a focus on recruitment, retention, and promotion of biostatisticians from traditionally under-represented groups. I thank Dr. Knashawn Morales of the University of Pennsylvania and Dr. Simone Gray of the Centers for Disease Control and Prevention for their leadership in organizing this year’s workshop. The Council for Emerging and New Statisticians (CENS) will hold an inaugural social event to increase networking opportunities for graduate students and recent graduates. Indicate your interest during the ENAR Spring Meeting registration process. There is a new member reception, and you will find a host of activities for student members at the meeting.

A favorite for many is the Tuesday night social event, which I am excited to announce will be held at the National Aquarium in Baltimore. Those who participate in this year’s event will enjoy a wonderful evening of networking, a dinner including authentic Maryland crab cakes, and the National Aquarium which features over 16,000 animals including sharks, birds, frogs, turtles, dolphins, and jellies. This is an event that you do not want to miss!

**Meeting Venue** The conference hotel, the Marriott Waterfront, is located along Harbor East, which is conveniently situated near the Inner Harbor, Little Italy, and Fell’s Point, which offer an array of dining options, bars, and entertainment.

**Acknowledgements** I would like to thank the Local Arrangements Committee, led by Professor Ciprian Crainiceanu, for their planning efforts to ensure that meeting participants will experience the best that Baltimore has to offer. Finally, I wish to express my sincere gratitude to Kathy Hoskins, our ENAR Executive Director, Katie Earley, Challee Blackwelder, and their other colleagues at Drohan Management for their incredible support in planning the ENAR Spring Meeting. Kathy and her team have been vital in the growing success of ENAR and its annual Spring Meeting. It has indeed been a pleasure working with you!

**DuBois Bowman**  
ENAR 2014 President

# ACKNOWLEDGEMENTS

ENAR would like to acknowledge the generous support of the 2014 Local Arrangements Committee Chaired by

Ciprian M. Crainiceanu  
Department of Biostatistics  
Johns Hopkins University

and our student volunteers!

## Regional Members of the International Biometric Society Executive Board

Lisa LaVange  
Sharon-Lise Normand  
José Pinheiro

## Regional Members of the Council of the International Biometric Society

Scarlett Bellamy  
Bradley Carlin  
Timothy Johnson

We gratefully acknowledge the invaluable support and generosity of our Sponsors and Exhibitors.

ENR  
2014  
SPRING  
MEETING

# LOCAL INFORMATION

# BALTIMORE, CHARM CITY

Baltimore, or *Charm City*, is a thriving all-American city with world leading research universities such as Johns Hopkins University and the University of Maryland. Baltimore has a thriving economy powered by tourism and a thriving industry including Under Armor, Black and Decker, Domino Sugar, the Port of Baltimore, T. Rowe Price, and Northrop Grumman. Charm City is also the home of the Ravens football team, the 2000 and 2012 Super Bowl champions, and the Orioles baseball team, the 1966, 1970, and 1983 World Series champions.

## Baltimore National Aquarium

The Aquarium is just short walk away from the Baltimore Marriott Waterfront Hotel and is the home of a new Australian wing and of the newly remodeled Blacktip Reef. Atlantic bottlenose dolphins, jellyfish, poison frogs, sharks, corals, and octopuses are just some of attractions that will make every visit unforgettable.

## Inner Harbor

The Baltimore inner harbor is spectacular, a symbol of the dynamic remaking of the city, and the major touristic attraction of Baltimore. The waterfront provides beautiful views of the marina and easy access to many attractions including the National Aquarium, Maryland Science Center, and the American Visionary Art Museum. Not to be missed are the Fudgery, the water taxi ride to Fort McHenry, or one of the many hour-long water cruises that can be booked on the spot.

## Walter's Museum

The Walter's is an internationally renowned art museum with exhibitions spanning more than 5000 years from pre-dynastic Egypt to 20th-century Europe. General admission is free, but watch for the paid special exhibitions; they are a must see.

## Fells Point

Fells Point is a historic waterfront neighborhood and an absolute favorite with the locals. Walking around Fells Point marina provides excellent opportunities to dine in some of the best city restaurants including Mezze, The Black Olive, Kali's Court, the Nanami Café or enjoy an all American burger and beer at one of the many bars and grills including Red Star, Bad Decisions, Bond Street Social, Kooper's Tavern, Cat's Eye Pub, and The Horse You Came in On. No trip to Fells Point is complete without a visit to Bonaparte Breads, a French bakery, which is the preferred bread maker for many top restaurants in the Baltimore/DC area.

# BALTIMORE

## SO MANY THINGS TO DO!

### Little Italy

This charming neighborhood is located in the heart of downtown Baltimore and within walking distance of the meeting hotel. Located between the Inner Harbor and historic Fells Point Little Italy has almost 30 restaurants, outdoor movies, bocce tournaments, and friendly narrow streets to explore.

### Crabs and Crab Cakes

Picking steamed crabs spiced with Old Bay and eating crab cakes are quintessential Baltimore experiences. There are many places to enjoy an authentic Baltimore culinary experience including Captain James, Nick's Fish House, LP Steamers, Canton Dockside, Riptide by the Bay, Jimmy's Famous Seafood, and Costas Inn. Some may require planning, transportation and calling ahead to check for crab size and availability.

### Restaurants

Baltimore offers an amazing assortment of restaurants with a great selection of cuisine including Afghani (The Helmand), American (Charleston, Salt Tavern, The Fleet Street Kitchen, Woodberry Kitchen, Wit & Wisdom, Blue Hill Tavern, Brewer's Art), Ethiopian (Dukem), Greek (Mezze, The Black Olive, Ouzo Bay), Italian (La Scala, Cinghiale, La Tavola), Japanese (Nanami cafe), Jewish (Goldberg's Bagels, Umami), Lebanese (The Lebanese Taverna), French (Petit Louis), Russian (Ze Mean Bean Café, Vernisage), Spanish (Tio Pepe), Turkish (Cazbar). This is just a small selection and there are many, many more restaurants to choose from.

### Water Taxi

The water taxi is a wonderful way to visit the inner harbor's best attractions, restaurants, bars, and shopping. It has 17 stops including the Aquarium, Science Center, Harbor East, Fell's Point, and Fort McHenry. On a warm day this is probably the best way to enjoy crabs at Captain James Landing and learn about the history of the American national anthem by visiting Fort McHenry.

# Presidential Invited Speaker

## A Significance Test for the Lasso

### Robert J. Tibshirani, Ph.D.

Departments of Statistics  
and Health Research and Policy  
Stanford University

In this talk, I consider testing the significance of the terms in a fitted regression, fit via the lasso. I propose a novel test statistic for this problem, and show that it has a simple asymptotic null distribution. This work builds on the least angle regression approach for fitting the lasso, and the notion of degrees of freedom for adaptive models (Efron 1986) and for the lasso (Efron et. al 2004, Zou et al 2007). I give examples of this procedure, discuss extensions to generalized linear models and the Cox model, and describe an R language package for its computation. In addition, generalizations to a broad range of adaptive fitting such as graphical models and clustering will be outlined. This work is joint with Richard Lockhart (Simon Fraser University), Jonathan Taylor (Stanford University) and Ryan Tibshirani (Carnegie Mellon University).

### Biography

Robert Tibshirani is a Professor in the Departments of Statistics and Health Research and Policy at Stanford University. He received a bachelor's degree from the University of Waterloo, a master's degree from the University of Toronto and a Ph.D. from Stanford University. He was a Professor at the University of Toronto from 1985 to 1998.

Professor Tibshirani is a Fellow of the American Statistical Association, the Institute of Mathematical Statistics and the Royal Society of Canada. He won the prestigious COPSS Presidents' award in 1996, the NSERC Steacie award in 1997, the CRM-SSC Prize in Statistics in 2000, and the University of Waterloo distinguished alumni achievement award in 2006. He was elected to the National Academy of Sciences in 2013.

In his work he has made important contributions to the analysis of complex datasets, most recently in genomics and proteomics. Some of his most well-known contributions are the lasso, which uses L1 penalization in regression and related problems, generalized additive models and Significance Analysis of Microarrays (SAM). He also co-authored three widely used books "Generalized Additive Models", "An Introduction to the Bootstrap", and "The Elements of Statistical Learning", now in its second edition.

# IMS Medallion Lecture

## Statistical Genetics and Genomics in the Big Data Era: Opportunities and Challenges in Research and Training

**Xihong Lin, Ph.D.**

Department of Biostatistics  
Harvard School of Public Health

The human genome project in conjunction with the rapid advance of high throughput technology has transformed the landscape of health science research. The genetic and genomic era provides an unprecedented promise of understanding genetic underpinnings of complex diseases or traits, studying gene-environment interactions, predicting disease risk, and improving prevention and intervention, and advancing personalized medicine. A large number of genome-wide association studies conducted in the last ten years have identified over 1,000 common genetic variants that are associated with many complex diseases and traits. Massive next generation sequencing data as well as different types of omics data have become rapidly available in the last few years. These big genetic and genomic data present statisticians with many exciting opportunities as well as challenges in data analysis and in interpretation of results. They also call for more interdisciplinary knowledge and research, e.g., in statistics, machine learning, data curation, molecular biology, genetic epidemiology and clinical science. In this talk, I will discuss some of these challenges, such as low-level pre-processing, analysis of rare variants in next generation sequencing association studies; integrative genomics, which integrates different types of omics data; and study of gene-environment and gene-treatment interactions. I will also discuss strategies of training next generation quantitative genomic scientists at the interface of statistical genetics and genomics, computational biology and genetic epidemiology, to meet these challenges.

### Biography

Xihong Lin is Professor of Biostatistics and Coordinating Director of the Program of Quantitative Genomics at the Harvard School of Public Health (HSPH). She received PhD degree from the Department of Biostatistics of the University of Washington in 1994 under the direction of Professor Norman Breslow. She was on the faculty of the Department of Biostatistics at the University of Michigan between 1994 and 2005 before she joined the HSPH in 2005. Lin received the 2002 Mortimer Spiegelman Award from the American Public Health Association, and the 2006 Presidents' Award from the Committee of the Presidents of Statistical Societies (COPSS). She is an elected fellow of the American Statistical Association, Institute of Mathematical Statistics, and International Statistical Institute. Lin was the former Chair of the COPSS (2010-2012). She is currently a member of the Committee of Applied and Theoretical Statistics of the US National Academy of Science. Lin is a recipient of the MERIT (Method to Extend Research in Time) award from the National Cancer Institute, which provides a long term support for her methodological research. She is the PI of the T32 training grant on interdisciplinary training in statistical genetics and computational biology. She has served on numerous editorial boards of statistical and genetic journals. She was the former Coordinating Editor of Biometrics, and currently the co-editor of Statistics in Biosciences, and the Associate Editor of Journal of the American Statistical Association and American Journal of Human Genetics. She was a permanent member of the NIH study section of Biostatistical Methods and Study Designs (BMRD), and has served on a large number of other study sections of NIH and NSF.

## SHORT COURSES | SUNDAY, MARCH 16

### SC1: Longitudinal and Incomplete Data

**FULL DAY 8:00 am – 5:00 pm**

**Geert Molenberghs**

Universiteit Hasselt and  
the Katholieke Universiteit Leuven in Belgium

**Geert Verbeke**

KU Leuven

#### Overview

We first briefly present linear mixed models for continuous hierarchical data. The focus lies on the modeler's perspective and on applications. Emphasis will be on model formulation, parameter estimation, and hypothesis testing, as well as on the distinction between the random-effects (hierarchical) model and the implied marginal model.

Second, models for non-Gaussian data will be discussed, with a strong emphasis on generalized estimating equations (GEE) and the generalized linear mixed model (GLMM). To usefully introduce this theme, a brief review of the classical generalized linear modeling framework will be presented. Similarities and differences with the continuous case will be discussed. The differences between marginal models, such as GEE, and random-effects models, such as the GLMM, will be explained in detail.

Third, when analyzing hierarchical and longitudinal data, one is often confronted with missing observations, i.e., scheduled measurements have not been made, due to a variety of (known or unknown) reasons. It will be shown

that, if no appropriate measures are taken, missing data can cause seriously jeopardizing results, and interpretation difficulties are bound to occur. Methods to properly analyze incomplete data, under flexible assumptions, are presented. All developments will be illustrated with worked examples using the SAS System.

#### The Course

- **Session 1:** Linear mixed models, model formulation, parameter interpretation, hierarchical versus marginal model interpretation, estimation and inference, empirical Bayes
- **Session 2:** Model families for discrete outcomes, marginal models, generalized estimating equations (GEE)
- **Session 3:** Generalized mixed models, estimation methods (Laplace, MQL, PQL, Quadrature), comparison with GEE
- **Session 4:** Missing data mechanisms, problems with nonrandom dropout (i.e., bias, loss of efficiency, etc.), modeling frameworks to handle dropout (selection, pattern mixture and shared parameter models), sensitivity analyses

## SC2: Bayesian Methods for Data Analysis, Meta-Analysis, and Adaptive Clinical Trials

**FULL DAY 8:00 am – 5:00 pm**

**Brad Carlin**

University of Minnesota

### Overview

This course will provide a review of Bayesian inference, meta-analysis, and Bayesian adaptive methods for clinical trials. To begin, the review of Bayesian methods will include prior determination, point and interval estimation, hypothesis testing, prediction, and model choice. There will also be a review of Bayesian computation, including Markov chain Monte Carlo (MCMC) methods, Gibbs sampling, and other extensions. To facilitate practical implementation of topics covered, there will be a computer demonstration of the WinBUGS software in a few standard models. After the lunch break, the course turns to the basics of Bayesian clinical trial design, including the notions of range of equivalence, community of priors, and a discussion of available software. Bayesian adaptive methods will include rule- (3+3) and model-based (CRM, EWOC) designs for finding the maximum tolerated dose (MTD), sequential stopping for futility, efficacy, and/or toxicity, and adaptive randomization and dose allocation. There will also be a discussion of network meta-analysis, as well as the closely related topic of incorporation of historical data in clinical trial design and analysis.

## SC3: Statistical Computing for Big Data

**FULL DAY 8:00 am – 5:00 pm**

**Deepak Agarwal**

LinkedIn

### Overview

Massive data get generated, stored and analyzed every day in various fields like bioinformatics, climatology, internet, telecommunications, and many more. Hadoop has become the most popular distributed file storage (and computing) system in the world. A challenging and growing research area concerns the development of appropriate statistical methods for analyzing such large-scale data. The objective of this short course is to provide a high level introduction to the open-source Hadoop system that uses Map-Reduce framework, and more importantly, to illustrate the use of Map-Reduce and Hadoop for real statistical applications, starting from basics like computing means and variances.

The course will then cover more advanced topics of fitting statistical models to large data via Hadoop. We will mainly focus on applications like computational advertising and content recommendation where the goal is to recommend items to users when visiting a website to maximize some positive response like clicks. This is a high dimensional bandit problem since there is positive utility in showing items that have low mean and high variance. A practical approach is to reduce the dimension through multi-level bilinear random effects model and couple it with classical bandit solutions. Numerous examples of real systems the author has deployed at big web companies like Yahoo! and LinkedIn will be used to illustrate the methods. Special focus will be on scalable model fitting of mixed effects generalized linear models fitted to datasets consisting of hundreds of millions of observations and hundreds of thousands of predictors.

## SC4: Statistical Methods for Genome Wide Regional Analysis with Next Generation Sequencing Data

**HALF DAY 8:00 am – 12:00 noon**

**Rafael Irizarry**

Harvard University

**Hao Wu**

Emory University

### Overview

Genome wide regional analysis is the task of detecting genomic regions of certain interest from whole-genome data. Examples of these regions include protein-binding sites where different proteins interact with DNA, histone modification regions, and regions exhibiting differential DNA methylation between different biological contexts. High-throughput experiments such as next-generation sequencing (NGS) enable the detection of these regions at the whole-genome scale. The data collected from these experiments are tightly spaced on the linear genome. At the regions of interest, the data show different distribution from the majority of the genome, and sometimes look like short and pointy “peaks” or broad “blocks” when plotting against the genomic coordinates. So the methods of detecting these regions have the general theme of “peak/block detection”.

In this half-day short course, we will cover the statistical methods and software for peak/block detection from NGS data. We will first provide a general introduction to NGS technology and its applications. Then we will focus on two specific applications of NGS: ChIP-seq for protein binding site and histone modification region detection, and bisulfite sequencing (BS-seq) for detection of DNA methylation regions. The data from each application suffer from systematic biases

that need to be carefully accounted for in order to design sound statistical methods for analyses. We will introduce the biological motivation, technical procedures, raw data formats, characteristics of the data, and then provide an in-depth review of the statistical methods. In the computer lab, we will provide hands-on exercise of sequence mapping and statistical analysis using open source software such as R/Bioconductor.

### The Course

- Introduction to NGS technologies
- Statistical methods for ChIP-seq and BS-seq data analyses
- Computer lab includes following exercises
- Sequence alignment using bowtie
- Use GenomicRanges and GenomicFeatures Bioconductor package to analyze and annotate ChIP-seq analysis results
- Use bsseq Bioconductor package to analyze BS-seq data

## SC5: Statistical Evaluation of Prognostic Biomarkers

**HALF DAY 8:00 am – 12:00 noon**

**Patrick Heagerty**

University of Washington

### Overview

This course will introduce predictive accuracy concepts that allow evaluation of time-dependent sensitivity and specificity for prognosis of a subsequent event time. We will overview options that are appropriate for both baseline markers and for longitudinal markers. Methods will be illustrated using examples from HIV and cancer research and we will highlight R packages that are currently available.

## SC6: Joint Modeling of Longitudinal and Survival Data

**HALF DAY 1:00 pm – 5:00 pm**

**Joseph G. Ibrahim**

University of North Carolina at Chapel Hill

### Overview

In this short course, we will examine in depth statistical methods for joint modeling of longitudinal and survival data. Both frequentist and Bayesian approaches will be examined. The types of joint models that will be discussed are selection models, pattern mixture models, and shared parameter

models. Both linear mixed models as well as generalized linear mixed models will be discussed for the longitudinal models and Cox-type, piecewise constant hazard, as well as cure rate models will be discussed for the survival component. Both univariate and multivariate survival models will be discussed as well as multivariate longitudinal models. Several types of applications will also be discussed including ones in cancer, vaccine studies, quality of life studies, and AIDS research. Missing data issues will also be examined, and SAS and R software for fitting joint models will be illustrated in detail.

### The Course

- Introduction to joint models: selection, pattern mixture and shared parameter models
- A review of the existing frequentist and Bayesian methodologies for joint modeling with applications to cancer, vaccine studies, quality of life studies, and AIDS research
- SAS and R software for fitting joint models with applications to cancer, vaccine studies, quality of life studies, and AIDS research
- Multivariate joint models of longitudinal and survival data
- Joint cure rate models
- Model assessment and diagnostics
- Clinical trials design using joint models

## SC7: Bayesian Disease Mapping with INLA: An Introduction

**HALF DAY 1:00 pm – 5:00 pm**

**Andrew Lawson**

Medical University of South Carolina

### Overview

This course will cover methodology and computational strategies for Bayesian disease mapping, beginning with an introduction to the Bayesian modeling paradigm and basic disease mapping concepts. The course will proceed to discuss disease mapping models with hierarchical structure and posterior sampling versus posterior approximation. For approximation methods, particular attention will be devoted to the integrated nested Laplace approximation (INLA) and its implementation with the R package INLA. Examples of fitting disease mapping models using INLA will be presented, and sample R programs will be provided to course attendees.

# TUTORIALS

## MONDAY, MARCH 17

---

### T1: An Introduction to Comparative Effectiveness Research

**8:30 am – 10:15 am**

**Sharon-Lise Normand**

Harvard School of Public Health

#### Description

Comparative Effectiveness Research (CER) refers to a body of research that generates and synthesizes evidence on the comparative benefits and harms of alternative interventions to prevent, diagnose, treat, and monitor clinical conditions, or to improve the delivery of health care. The evidence from CER is intended to support clinical and policy decision making at both the individual and the population level. While the growth of massive health care data sources has given rise to new opportunities for CER, several statistical challenges have also emerged. This tutorial will provide an overview of the types of research questions addressed by CER, review the main statistical methodology currently utilized, and highlight areas where new methodology is required. Examples from cardiology and mental illness will illustrate substantive and methodological issues.

### T2: Functional Data Analysis: Techniques and Applications

**10:30 am – 12:15 pm**

**R. Todd Ogden and Jeff Goldsmith**

Columbia University

#### Description

As modern technological advances allow the collection of increasingly large and complex datasets, there is urgent need for practitioners to be able to analyze and model such data. We will focus on one special type of data: functional data, which consists of all data measured over some continuum and thus can be regarded as being a function of some continuous variable. Examples include growth curves (any data collected over time), spectral data, imaging data, and so on.

This tutorial will provide an introduction to the general topic of functional data analysis targeted to the practitioner. We will describe various techniques in common use in the area (see outline below) and illustrate these with real data examples. In addition, we will provide code used to carry out the various analyses, allowing participants to quickly get up to speed in performing their own analyses of functional data.

#### The Tutorial

- Functional data examples and terminology
- Descriptive analysis techniques
- Smoothing techniques and basis functions
- Functional principal component analysis
- Linear regression models with functional data
- Scalar-on-function regression

- Function-on-scalar regression
- Function-on-function regression
- Brief overview of other modern advances
- Nonparametric functional data analysis
- Multilevel and longitudinal functional data

## T3: Nonparametric Bayesian Data Analysis

1:45 pm – 3:30 pm

**Peter Müller**

University of Texas, Austin

### Description

All models are wrong, but some are useful. Many statisticians know and appreciate G.E.P. Box's comment on statistical modeling. Often the choice of the final model is a compromise between an accurate representation of the experimental conditions, a preference for parsimony and the need for a practicable implementation. The competing goals are not always honestly spelled out, and the resulting uncertainties are not fully described. Over the last 20 years, a powerful inference approach that allows mitigating some of these limitations has become increasingly popular. Bayesian nonparametric (BNP) inference allows acknowledging uncertainty about an assumed sampling model while maintaining a practically feasible inference approach. We could take this feature as a pragmatic characterization of BNP as flexible prior probability models that generalize traditional models by allowing for positive prior probability for a very wide range of alternative models, while centering the prior around a parsimonious traditional model. A formal definition of BNP is as probability models on infinite dimensional parameter spaces. A typical application of BNP is to density estimation.

In this tutorial we review some of the popular models, including Dirichlet process (DP) models, Polya tree models, DP mixtures and dependent DP (DDP) models. We will review some of the general modeling principles, including species sampling models, stick breaking priors, product partition models for random partition and normalized random measures with independent increments. We will briefly discuss some of the main computational algorithms and available software. The discussion will be illustrated by applications to problems in biostatistics and bioinformatics.

## T4: Quantile Regression for Survival Analysis

3:45 pm – 5:30 pm

**Limin Peng**

Emory University

### Description

Quantile regression, as a significant extension of the traditional accelerated failure time model, has many natural appeals for survival analysis. It offers flexibility to dynamically assess the relationships between survival outcomes and covariates while retaining easy physical interpretation. Many methods developed for quantile regression with survival data also have nice computational features, which are expected to foster their biomedical applications. In this tutorial, the main questions to be addressed include: (1) what can quantile regression offer beyond standard survival analysis? (2) what are the well-developed approaches that can readily be used for analyzing survival data? (3) how to implement these methods in practice? We will conclude with some remarks on limitations and challenges in this field.

# TUTORIALS

## TUESDAY, MARCH 18

---

### T5: An Introduction to High-Performance Computing with R

**8:30 am – 10:15 am**

**John Emerson**

Yale University

#### Description

This tutorial will introduce you to topics in high-performance computing with R. We will quickly explore the new parallel package (containing snow and multicore). We will then concentrate on the elegant framework for parallel programming offered by packages foreach and the associated parallel backends. We will touch upon a range of related topics including memory management and algorithmic efficiency. Time permitting, we will conclude with basic examples of handling larger-than-RAM numeric matrices and use of shared memory.

### T6: Causal Mediation Analysis

**1:45 pm – 3:30 pm**

**Tyler VanderWeele**

Harvard School of Public Health

#### Description

This tutorial will cover some of the recent developments in causal mediation analysis and provide practical tools to implement these techniques. Mediation analysis concerns assessing the mechanisms and pathways by which causal effects operate. The lecture will cover the relationship between traditional methods for mediation in epidemiology and the social sciences and those that have been developing within the causal inference literature using natural direct and indirect effects. Methods for dichotomous, continuous, and time-to-event outcomes will be described. Special attention will be given to the strong assumptions about confounding that must be made to identify direct and indirect effects. The tutorial will discuss the use and implementation of sensitivity analysis techniques to assess how sensitive conclusions are to violations of confounding assumptions. Discussion will be given to how such mediation analysis approaches can be extended to settings in which data come from a case-control study design. The methods will be illustrated by various applications to perinatal, genetic and social epidemiology.

### T7: Cure Models and Their Applications

**3:45 pm – 5:30 pm**

**Jeremy M. G. Taylor**

University of Michigan

**Paul Y. Peng**

Queen's University

#### Description

Cure models refer to a class of extended survival models for survival data with a cure fraction. The standard survival models often assume that subjects in a study will experience the event of interest with sufficient follow-up without censoring. However, this assumption may not be appropriate in situations such as cancer studies where patients may be cured and will not experience relapse, however long the follow-up, and cure models must be considered to analyze survival data in such studies. Cure models also find applications in other disciplines, such as epidemiology, psychology, public health and economics. The last 15 years witnessed a rapid growth in extending survival models to accommodate potentially cured subjects. New statistical methodologies were developed to extend the existing survival models, and the newly proposed cure models greatly expand the applicability of cure models to various types of survival data with a cured fraction and provide appealing ways to interpret the results of analysis, compared to standard survival analysis models. The tutorial will cover the mixture model and bounded cumulative hazard formulation of cure models, estimation methods, identifiability issues, software and extensions to clustered data. The instructors will introduce some real life data sets from clinical studies, present necessary details of the cure models and recent advances, and demonstrate the use of the cure models on the data with software.

## MONDAY, MARCH 17 | 12:15 PM – 1:30 PM

### R1: Writing a Successful Grant in a Challenging Funding Climate: Strategies for Statistical and Other Scientific Review Panels

**Amita Manatunga**

Emory University

#### Description

I will focus on strategies for writing a successful NIH grant application to support statistical methodological research. I will begin with an outline of the grant submission and review processes and descriptions of popular NIH grant mechanisms, namely R01, R03 and R21 grants. I will describe characteristics of high-quality grant applications including the formulation of specific aims and preliminary data with the emphasis on significance and innovation. Other discussions will include strategies for submitting methodological grants to other Study Sections besides to the Biostatistical Methods and Research Design (BMRD) study section.

### R2: Key Elements of a Successful Career as a Tenure Track Faculty Member

**Francesca Dominici**

Harvard School of Public Health

#### Description

We will have an informal discussion regarding challenges and opportunities for junior tenure track faculty in quantitative departments. We will discuss topics related to: balancing papers and grant submissions, management of interdisciplinary collaborations, teaching, negotiation skills, work family balance etc.

### R3: Statistics and the Law: Statisticians as Expert Witnesses

**Bruce Levin**

Columbia University

#### Description

How is statistical evidence presented and used in legal proceedings, especially from the perspective of an expert witness? Statistical evidence plays an important role in legal proceedings such as toxic tort cases, class actions in the areas of equal employment opportunity and equal opportunity in housing, voting rights cases, patent disputes, challenged elections, adverse events in drug trials, calculation of damages resulting from theft, collusion, health insurance fraud, and other audits involving sampling, and many more, in settings ranging from jury trials, bench trials, administrative hearings, arbitration hearings, depositions, and the lawyer's office. In addition, studies of the legal system itself are proliferating and are increasingly statistical in nature, with entire journals devoted to the subject. We will discuss the following topics (as time permits): communicating statistical concepts and findings clearly and effectively, in both verbal testimony and written reports; do's and don't's of being an expert witness; how lawyers make effective use of experts; what experts should expect in and out of the courtroom; the adversarial paradigm versus the academic research paradigm; and relevant ethical issues. The discussion leader has over 35 years of experience working with lawyers in litigation support, publishing scholarly legal articles with attorneys, and testifying as an expert statistical witness in legal proceedings. He is co-author with lawyer Michael O. Finkelstein of the textbook *Statistics for Lawyers* (2nd edition, Springer, 2001), the third edition of which is forthcoming.

## R4: Research Opportunities at the US Census Bureau

**Thomas A. Louis**

Johns Hopkins and U.S. Census Bureau

### Description

In order to meet the challenges of efficiently obtaining valid demographic, economic, and activity-based information, making it available to the public while protecting confidentiality, research at the U.S. Census Bureau and other federal statistical agencies, indeed survey research more generally, burgeons. At the roundtable I'll briefly describe the Research & Methodology directorate, list major research goals with related statistical and computational issues and methods. Many are similar to those addressed by and used in Biostatistics and Informatics, and we can consider a subset. We'll close with a discussion of career opportunities. Visit (<http://www.census.gov/research/>) for some background.

## R5: The Leadership Role of a Statistician on Interdisciplinary Research Teams

**Scarlett Bellamy**

University of Pennsylvania

### Description

Informal discussion will primarily focus on identifying leadership opportunities and roles in the context of interdisciplinary research teams. These may be research based (e.g., statistical leadership for an analytical core for a large Center) or training-focused (e.g., serving as PI for an institutional training grant). We will also discuss key elements for successful leadership as well as identify strategies for being invited to take on such roles.

## R6: The Role of Statisticians at the FDA

**Dionne L. Price**

Food and Drug Administration

### Description

The Food and Drug Administration (FDA) is composed of seven centers which collectively employ over 250 statisticians. Statisticians at the FDA are an integral part of multidisciplinary teams dedicated to assuring the safety and efficacy of human and veterinary drugs, biological products, medical

devices, our nation's food supply, cosmetics, and products that emit radiation. Statisticians analyze and evaluate data, provide leadership, promote innovation in study designs and statistical techniques, and conduct methodological research aimed at addressing the many complex issues that arise in a regulatory environment. FDA statisticians utilize their statistical training and knowledge to directly impact the public health. Roundtable participants will learn the role of statisticians at the FDA and potential paths to successful careers with the Agency.

## R7: Publishing Without Perishing: Strategies for Success in Publishing in (Bio)statistical Journals

**Marie Davidian**

North Carolina State University

### Description

Contributing to the advance of our discipline through publication of articles in peer-reviewed journals is a fundamental expectation for both junior and not-so-junior biostatistical researchers alike. Success in publishing one's work ensures that it will be widely disseminated to researchers and practitioners who stand to benefit. In addition, funding agencies and academic institutions place considerable importance on a successful record of publication. Accordingly, understanding the peer review and editorial processes of top journals and mastering the art of writing an effective journal article are keys to success in publishing. How does one determine the best outlet for one's work? What are the essential elements of a successful journal article? How does one maximize the chance of acceptance? What strategies can ensure that a published paper is read and cited? How does one make optimal use of limited space and additional supplementary material in conveying the message? What are the roles of the editor, associate editor, and referees? What considerations do editors use when evaluating a paper? This roundtable will provide a forum for candid discussion of these and other questions.

## R8: Preparing for Leadership Opportunities in the Pharmaceutical Industry

**Aarti Shah**

Eli Lilly and Company

### Description

Tom Davenport in his book *Competing on Analytics* writes “The companies that are winning are those which are deriving business benefits through deep and sophisticated analytics.” Who will lead companies to translate the sophisticated analytics to business benefits? Is it the statistician? If yes, what leadership skills does a statistician need in addition to his or her deep technical knowledge? In this session, we will discuss leadership skills that are absolutely necessary for today’s statistician to be successful and how one goes about developing these skills. We will explore the topic of “Statistical Leadership”.

## R9: Preparing for Leadership in Statistics

**Michael Kosorok**

University of North Carolina at Chapel Hill

### Description

We will discuss how statisticians can prepare for leadership roles during the course of their career. This will include a review of fundamental leadership skills applicable to both small and large groups, as well as specialized leadership skills needed to lead academic departments and other similar organizations. We will explore the benefits of delegation, empowering others, and maintaining flexibility and balance. We will also discuss ways to help students prepare for future leadership roles and the pros and cons of accepting leadership positions.

	<b>61. Contributed Papers: Methods for Removing Selection Bias and Confounding</b>	Grand Ballroom X (3rd Floor)
	<b>62. Contributed Papers: Functional Data Analysis</b>	Bristol Room (3rd Floor)
	<b>63. Contributed Papers: Recent Advances in Bayesian Methods</b>	Chasseur Room (3rd Floor)
<b>5:30 pm – 6:30 pm</b>	<b>CENS STUDENT MIXER</b>	Dover Room (3rd Floor)
<b>6:00 pm – 7:30 pm</b>	<b>PRESIDENT'S RECEPTION</b> (by Invitation Only)	Laurel Room A (4th Floor)

# Tuesday, March 18

7:30 am – 5:00 pm	Conference Registration	Grand Ballroom (3rd Floor)
7:30 am – 5:00 pm	Speaker Ready Room	Boardroom (3rd Floor)
9:30 am – 3:30 pm	<b>PLACEMENT SERVICE</b>	Waterview Rooms (Lobby Level)
8:30 am – 5:30 pm	Exhibits Open	Grand Ballroom Foyer (3rd Floor)
8:30 am – 10:15 am	<b>TUTORIAL</b>	
	<b>T5: An Introduction to High-Performance Computing with R</b>	Dover Room (3rd Floor)
	<b>SCIENTIFIC PROGRAM</b>	
	<b>64. Statistical Learning for Complex Multivariate Biomedical Data</b>	Grand Ballroom VIII (3rd Floor)
	<b>65. Statistical Challenges in Studies of Environmental, Reproductive and Perinatal Health</b>	Harborside Room A (4th Floor)
	<b>66. New Developments in Statistical Methodologies for the Analysis of Disease Data</b>	Grand Ballroom II (3rd Floor)
	<b>67. Recent Development and Application of Bayesian Methods for the Probability of Success and Decision Making in Clinical Trials</b>	Harborside Room B (4th Floor)
	<b>68. Functional Data Analysis: Show Me the Data</b>	Grand Ballroom III (3rd Floor)
	<b>69. Latent Class Models for Diagnostic Testing with Applications in Psychiatry</b>	Grand Ballroom IV (3rd Floor)
	<b>70. Statistical Methods for Biomarker Evaluation</b>	Grand Ballroom I (3rd Floor)
	<b>71. Contributed Papers: Semi-Parametric and Non-Parametric Models</b>	Grand Ballroom X (3rd Floor)
	<b>72. Contributed Papers: Joint Models for Longitudinal and Survival Data</b>	Bristol Room (3rd Floor)
	<b>73. Contributed Papers: Statistical Methods in Epidemiology</b>	Grand Ballroom VII (3rd Floor)

## Tuesday, March 18 *(continued)*

	<b>74.</b> <b>Contributed Papers: Adaptive Designs and Randomization</b>	Atlantic Room (3rd Floor)
	<b>75.</b> <b>Contributed Papers: Next Generation Sequencing</b>	Grand Ballroom IX (3rd Floor)
	<b>76.</b> <b>Contributed Papers: Statistical Methods for Survival Analysis</b>	Chasseur Room (3rd Floor)
<b>10:15 am – 10:30 am</b>	Refreshment Break with Our Exhibitors	Grand Ballroom Foyer (3rd Floor)
<b>10:30 am – 12:15 pm</b>	<b>77. PRESIDENTIAL INVITED ADDRESS</b>	Grand Ballrooms V and VI (3rd Floor)
<b>12:30 pm – 4:30 pm</b>	<b>REGIONAL COMMITTEE MEETING</b> (by Invitation Only)	James Room (4th Floor)
<b>1:45 pm – 3:30 pm</b>	<b>TUTORIAL</b>	
	<b>T6:</b> <b>Causal Mediation Analysis</b>	Dover Room (3rd Floor)
	<b>SCIENTIFIC PROGRAM</b>	
	<b>78.</b> <b>JABES Invited Session</b>	Grand Ballroom VIII (3rd Floor)
	<b>79.</b> <b>Recent Advances in Statistical Methods for Missing Data</b>	Grand Ballroom III (3rd Floor)
	<b>80.</b> <b>Big Data Methods in Biostatistics</b>	Grand Ballroom II (3rd Floor)
	<b>81.</b> <b>Statistical Prediction Models for Medical Decision Making</b>	Grand Ballroom IV (3rd Floor)
	<b>82.</b> <b>Recent Developments in Statistical Genetics, Genomics, and their Applications</b>	Grand Ballroom V (3rd Floor)
	<b>83.</b> <b>Improved Statistical Modeling and Understanding of Gene Expression and Transcription Regulation using Next Generation Sequencing and Other High Throughput Technologies</b>	Grand Ballroom VI (3rd Floor)
	<b>84.</b> <b>Statistical Challenges in Public Health Research at the CDC</b>	Grand Ballroom VII (3rd Floor)

## Tuesday, March 18 *(continued)*

	<b>85. Innovative Bayesian Nonparametrics in Biostatistics</b>	Grand Ballroom I (3rd Floor)
	<b>86. Contributed Papers: New Developments in Survival Analysis</b>	Grand Ballroom X (3rd Floor)
	<b>87. Contributed Papers: Causal Inference</b>	Atlantic Room (3rd Floor)
	<b>88. Contributed Papers: Non-Parametric Analysis of Biomedical Data</b>	Bristol Room (3rd Floor)
	<b>89. Contributed Papers: High Dimensional Imaging Data</b>	Grand Ballroom IX (3rd Floor)
	<b>90. Contributed Papers: New Methods in Genomics</b>	Chasseur Room (3rd Floor)
<b>3:30 pm – 3:45 pm</b>	Refreshment Break with Our Exhibitors	Grand Ballroom Foyer (3rd Floor)
<b>3:45 pm – 5:30 pm</b>	<b>TUTORIAL</b>	
	<b>T7: Cure Models and Their Applications</b>	Dover Room (3rd Floor)
	<b>SCIENTIFIC PROGRAM</b>	
	<b>91. IMS Medallion Lecture</b>	Grand Ballroom VI (3rd Floor)
	<b>92. Parametric Or Nonparametric, Which Is The Answer?</b>	Grand Ballroom VII (3rd Floor)
	<b>93. Causal Inference in High Dimensional Settings</b>	Grand Ballroom II (3rd Floor)
	<b>94. Advances in Time Series Analysis of Biomedical Signals</b>	Grand Ballroom III (3rd Floor)
	<b>95. Frontiers in Statistical Genetics for Complex Trait Association</b>	Grand Ballroom V (3rd Floor)
	<b>96. Functional Data Approaches to Neurological and Mental Disease</b>	Harborside Room A (4th Floor)

# Tuesday, March 18 *(continued)*

<b>97.</b> <b>Modeling Neurological Diseases With Imaging Data</b>	Harborside Room B (4th Floor)
<b>98.</b> <b>Making Sense of Sensors: Statistical Methods for Wearable Computing</b>	Grand Ballroom I (3rd Floor)
<b>99.</b> <b>Contributed Papers: Survival Analysis</b>	Grand Ballroom IV (3rd Floor)
<b>100.</b> <b>Contributed Papers: Personalized Medicine</b>	Grand Ballroom VIII (3rd Floor)
<b>101.</b> <b>Contributed Papers: Spatial Temporal Models</b>	Grand Ballroom IX (3rd Floor)
<b>102.</b> <b>Contributed Papers: Statistical Methods in Cancer Applications</b>	Grand Ballroom X (3rd Floor)
<b>103.</b> <b>Contributed Papers: Diagnostic and Screening Tests</b>	Atlantic Room (3rd Floor)
<b>104.</b> <b>Contributed Papers: Statistical Methods for Biomarker Discovery</b>	Bristol Room (3rd Floor)

5:30 pm – 6:30 pm

**ENAR BUSINESS MEETING**

(Open to All ENAR Members)

Bristol Room  
(3rd Floor)

6:30 pm – 10:00 pm

**Tuesday Night Event  
at the Baltimore Aquarium**

(We will walk as a group to the aquarium)

**Please meet PROMPTLY at  
6:15 pm in the hotel lobby**

# Wednesday, March 19

7:30 am – 12:00 pm	Speaker Ready Room	Boardroom (3rd Floor)
7:30 am – 9:00 am	<b>PLANNING COMMITTEE MEETING</b> (by Invitation Only)	James Room (4th Floor)
8:00 am – 12:30 pm	Conference Registration	Grand Ballroom Registration (3rd Floor)
8:00 am – 12:00 pm	Exhibits Open	Grand Ballroom Foyer (3rd Floor)
8:30 am – 10:15 am	<b>SCIENTIFIC PROGRAM</b>	
	<b>105. Modern Survival Analysis in Observational Studies</b>	Grand Ballroom IX (3rd Floor)
	<b>106. Recent Development on Personalized Medicine</b>	Grand Ballroom II (3rd Floor)
	<b>107. Causal Inference in the Assessment of Surrogate Markers</b>	Grand Ballroom III (3rd Floor)
	<b>108. New Developments in Multiple Comparisons Procedures and Variable Selection</b>	Grand Ballroom VIII (3rd Floor)
	<b>109. Spatial Models and Dynamics Applied to Environmental Sciences and Public Health</b>	Grand Ballroom V (3rd Floor)
	<b>110. Advances in Longitudinal studies for Predicting Clinical Outcomes</b>	Grand Ballroom VI (3rd Floor)
	<b>111. Contributed Papers: New Developments in Education, Consulting, and Health Policy</b>	Atlantic Room (3rd Floor)
	<b>112. Contributed Papers: Latest Advances in Functional and Imaging Data Analysis</b>	Grand Ballroom I (3rd Floor)
	<b>113. Contributed Papers: Bayesian Methods</b>	Grand Ballroom IV (3rd Floor)
	<b>114. Contributed Papers: Multivariate Survival Analysis</b>	Grand Ballroom VII (3rd Floor)
	<b>115. Contributed Papers: Statistical Analysis in the Presence of Missing Data</b>	Grand Ballroom X (3rd Floor)
	<b>116. Contributed Papers: Tools for Longitudinal Data Analysis</b>	Bristol Room (3rd Floor)
	<b>117. Contributed Papers: Analysis of Data from Clinical Trials</b>	Chasseur Room (3rd Floor)

# Wednesday, March 19 *(continued)*

**10:15 am – 10:30 am** Refreshment Break with Our Exhibitors Grand Ballroom Foyer (3rd Floor)

## **10:30 am – 12:15 pm** SCIENTIFIC PROGRAM

**118.** Grand Ballroom V (3rd Floor)  
**Human Health and Environmental Statistics at the U.S. EPA's Office of Research and Development**

**119.** Grand Ballroom III (3rd Floor)  
**Power Analysis for Mixed Models: Where We Stand**

**120.** Grand Ballroom II (3rd Floor)  
**New Developments in Estimating Causal Effects of Time-varying Treatments**

**121.** Grand Ballroom VI (3rd Floor)  
**Inside the Biostatistical Collaborative Process**

**122.** Atlantic Room (3rd Floor)  
**Contributed Papers: Non-Parametric Methods**

**123.** Chasseur Room (3rd Floor)  
**Contributed Papers: Variable Subset Selection**

**124.** Grand Ballroom VIII (3rd Floor)  
**Contributed Papers: High Dimensional Data in Genetics and Genomics**

**125.** Grand Ballroom IV (3rd Floor)  
**Contributed Papers: Tools for Survival Analysis**

**126.** Grand Ballroom I (3rd Floor)  
**Contributed Papers: Meta-Analysis**

**127.** Grand Ballroom X (3rd Floor)  
**Contributed Papers: Statistical Methods for Handling Missing Data**

**128.** Bristol Room (3rd Floor)  
**Contributed Papers: Longitudinal Data Analysis**

**129.** Grand Ballroom VII (3rd Floor)  
**Contributed Papers: Prediction and Prognostic Modeling**

**130.** Grand Ballroom IX (3rd Floor)  
**Contributed Papers: New Methods for GWAS**

# SCIENTIFIC PROGRAM

**Sunday, March 16**

8:00 – 11:00 pm

## POSTER PRESENTATIONS

*Grand Ballroom (3rd Floor)*

### 1. INVITED POSTER SESSION

Sponsor: ENAR

#### 1A. SuBLIME and OASIS for Multiple Sclerosis Lesion Segmentation in Structural MRI

**Elizabeth M. Sweeney\***, Johns Hopkins Bloomberg School of Public Health

**Russell T. Shinohara**, University of Pennsylvania

**Ciprian M. Crainiceanu**, Johns Hopkins Bloomberg School of Public Health

#### 1B. Elastic Statistical Shape Analysis of 3D Objects using Square Root Normal Fields

**Sebastian Kurtek\***, The Ohio State University

#### 1C. Epidemiological Models for Browser-Based Malware

**Natallia Katenka\***, University of Rhode Island

**Eric Kolaczyk** and **Mark Crovella**, Boston University

**Tom Britton**, Stockholm University

#### 1D. Meta-analysis of Rare Variants Based on Single-variant Statistics

**Yijuan Hu\***, Emory University

**Sonja I. Berndt**, National Cancer Institute, National Institutes of Health

**Stefan Gustafsson** and **Andrea Ganna**, Uppsala University Hospital

**Joel Hirschhorn**, Boston Children's Hospital

**Kari E. North**, University of North Carolina, Chapel Hill

**Erik Ingelsson**, Uppsala University Hospital

**Danyu Lin**, University of North Carolina, Chapel Hill

#### 1E. Spatial Quantile Regression for Neuroimaging Data

**Linglong Kong\***, University of Alberta

**Hongtu Zhu**, University of North Carolina, Chapel Hill

#### 1F. Enhancements for Model-based Clustering of Array-based DNA Methylation Data

**Devin C. Koestler\***, University of Kansas Medical Center

**Andres Hosen**, State University

**Carmen J. M. Rock C. Christensen**, Dartmouth College

**CANCELLED**

#### 1G. Disease Surveillance using Dynamic Screening System

**Peihua Qiu\***, University of Florida

#### 1H. Heat Kernel Wavelets on Manifolds and its Application to Brain Imaging

**Moo K. Chung\***, University of Wisconsin, Madison

#### 1I. Data Visualizations Should be More Interactive

**Karl W. Broman\***, University of Wisconsin, Madison

#### 1J. Introducing the Evolving Evolutionary Spectrum, with Applications to a Learning Association Study

**Mark Fiecas\***, University of Warwick

#### 1K. Improving Rare Variant Association Test with Prior Information

**Xin He\*** and **Li Liu**, Carnegie Mellon University

**Bernie Devlin**, University of Pittsburgh School of Medicine

**Kathryn Roeder**, Carnegie Mellon University

\* = Presenter | ■ = Student Award Winner

## 2. POSTERS: CLINICAL TRIALS AND STUDY DESIGN

Sponsor: ENAR

### 2A. A New Statistical Test of Heterogeneity in Treatment Response

**Hongbo Lin\*** and **Changyu Shen**, Indiana University, Indianapolis

### 2B. Comparing Methods of Tuning Adaptively Randomized Trials

**John Cook**, **Yining Du\*** and **Jack Lee**, University of Texas MD Anderson Cancer Center

### 2C. Multi-regional Issues in Equivalence Assessment of Test and References

**Yi Tsong\***, U.S. Food and Drug Administration

### 2D. Statistical Methods for Analyzing Count Data — A Case Study on Adverse Event Data from Vaccine Trials

**Qin Jiang\***, Pfizer Inc.

### 2E. An Alternate Study Design Approach for Multilevel Counts Subject to Overdispersion, with Illustrations Reflective of a Motivating Cluster-randomized Community Trial

**Kenneth J. Wilkins\***, National Institute of Diabetes and Digestive and Kidney Diseases, National Institutes of Health and Uniformed Services University of the Health Sciences  
**Shweta Padmanaban**, Georgetown University  
**Stephanie M. Rodriguez**, Uniformed Services University of the Health Sciences

### 2F. Leveraging Baseline Variables to Improve Estimators of the Average Treatment Effect in Randomized Trials

**Elizabeth A. Colantuoni\*** and **Michael Rosenblum**, Johns Hopkins Bloomberg School of Public Health

### 2G. Identifying Comparable Populations using Entropy Matching: The Comparison of Drug Effectiveness between Clinical Trials and EMRs

**Haoda Fu**, Eli Lilly and Company  
**Jin Zhou\***, University of Arizona

### 2H. Re-estimating Sample Size in a Randomized Clinical Trial using Participant Compliance Data

**Peter D. Merrill\*** and **Leslie A. McClure**, University of Alabama, Birmingham

### 2I. Variable Group Sizes in Cluster Randomized Trials Reduces Power

**Stephen A. Lauer\*** and **Nicholas G. Reich**, University of Massachusetts, Amherst  
**Ken P. Kleinman**, Harvard Medical School and Harvard Pilgrim Health Care Institute

### 2J. CoGaussian Statistical Model for Right Skewed Data

**Govind Mudholkar** and **Ziji Yu\***, University of Rochester  
**Saria Awadalla**, University of Illinois, Chicago

### 2K. Use of Historical Data in Clinical Trials

**Kert Viele\***, Berry Consultants

## 3. POSTERS: BAYESIAN METHODS

Sponsor: ENAR

### 3A. A Bayesian Approach to ROC Curve Estimation using Conditional Means Priors

**Jack S. Knorr\*** and **John W. Seaman**, Baylor University

### 3B. Benchmark Dose Model Averaging in Toxicology

**Otis R. Evans\***, University of North Carolina, Wilmington

### 3C. Dirichlet Process Mixture Extension Model to Accommodate Complex Sample Designs for Linear and Quantile Regression

**Xi Xia\*** and **Michael Elliott**, University of Michigan

### 3D. On Bayesian Model Selection for Robust Likelihood-free Methods based on Moment Conditions

**Cheng Li\*** and **Wenxin Jiang**, Northwestern University

### 3E. Robustness of Multilevel Item Response Theory Model to Outliers using Normal/Independent Distribution on both Random Effects and Outcomes

**Geng Chen\*** and **Sheng Luo**, University of Texas School of Public Health

### 3F. Bayesian Sample Size Determination for Informative Hypotheses

**Kristen M. Tecson\*** and **John W. Seaman**, Baylor University

### 3G. Block Total Response Designs: A Bayesian Approach

**Michelle S. Marcovitz\***, Baylor University  
**Damaraju Raghavarao**, Temple University  
**John W. Seaman**, Baylor University

### 3H. Priors and Sample Size Determination for Hurdle Models

**Joyce Cheng\***, **John W. Seaman** and **David Kahle**, Baylor University

### 3I. Bayesian Models for Facility-level Adverse Medical Device Event Rates among Hospitalized Children

**Laura A. Hatfield\*** and **Vanessa Azzone**, Harvard Medical School  
**Sharon-Lise T. Normand**, Harvard Medical School and Harvard School of Public Health

### 3J. Group Comparison of Pulsatile Hormone Times Series

**TingTing Lu\*** and **Timothy D. Johnson**,  
University of Michigan

### 3K. A Bayesian Approach to Detecting Changes in the Visual System

**Raymond G. Hoffmann\*** and **Edgar A. Deyoe**,  
Medical College of Wisconsin

### 3L. A Comparison of MCMC and Variational Bayes Algorithms for 3D Log-Gaussian Cox Processes

**Ming Teng\***, University of Michigan  
**Farouk S. Nathoo**, University of Victoria  
**Timothy D. Johnson**, University of Michigan

### 3M. A Bayesian Hierarchical Model for Estimating HIV Testing Hazard

**Qian An\*** and **Jian Kang**, Emory University

### 3N. Bayesian Inference of the Asymmetric Laplace Distribution with Partial Information

**Shiyi Tu\***, **Min Wang** and **Xiaoqian Sun**,  
Clemson University

### 3O. An Efficient Bayesian Sampling Approach for Continuous Bayesian Network Structure Learning

**Shengtong Han\*** and **Hongmei Zhang**,  
University of Memphis

### 3P. Two-sample Empirical Likelihood based Tests for Mean: From Frequentists to Bayesian Type Techniques with Applications to Case-control Studies

**Ge Tao\*** and **Albert Vexler**,  
State University of New York at Buffalo

### 3Q. Bayes Regularized Graphical Model Estimation in High Dimensions

**Suprateek Kundu\*** and **Bani Mallick**,  
Texas A&M University  
**Amin Momin** and **Veera Baladandayuthapani**,  
University of Texas MD Anderson Cancer Research Center

## 4. POSTERS: STATISTICAL GENETICS AND GENOMICS

Sponsor: ENAR

### 4A. LDA Topic Model of an Unknown Number of Topics via MCMC

**Zhe Chen\*** and **Hani Doss**, University of Florida

### 4B. Controlling the Local False Discovery Rate in the Adaptive Lasso

**Joshua N. Sampson\*** and **Nilanjan Chatterjee**,  
National Cancer Institute, National Institutes of Health  
**Raymond Carroll**, Texas A&M University  
**Samuel Muller**, University of Sydney

### 4C. Integrated Analysis of MicroRNA and Messenger RNA Expression Profiles of Essential Thrombocytosis

**Erya Huang\***, **Wei Zhu**, **Dmitri V. Gnatenko** and  
**Wadie F. Bahou**, Stony Brook University

### 4D. The Power Comparison of the Haplotype-based Collapsing Tests and the Variant-based Collapsing Tests for Detecting Rare Variants in Pedigrees

**Wei Guo\*** and **Yin Yao Shugart**, National Institute of  
Mental Health, National Institutes of Health

### 4E. Functional Normalization (FunNorm): A Better Alternative to Quantile Normalization for Methylation Data

**Jean-Philippe Fortin\***, Johns Hopkins University  
**Aur lie Labbe**, McGill University  
**Mathieu Lemire**, University of Toronto  
**Brent W. Zanke**, Ottawa Hospital Research Institute  
**Thomas J. Hudson**, University of Toronto  
**Elana J. Fertig**, Sidney Kimmel Cancer Center at Johns  
Hopkins University  
**Celia M.T. Greenwood**, McGill University  
**Kasper D. Hansen**, Johns Hopkins University

### 4F. MetaOC: Meta-analysis with One-sided Correction to Detect Differentially Expressed Genes with Concordant Direction

**Xingbin Wang\***, **M. Ilyas Kamboh** and **George C. Tseng**,  
University of Pittsburgh

### 4G. Normalization of DNA Methylation Microarrays using Technical Covariates

**Paul T. Manser\*** and **Mark Reimers**, Virginia  
Commonwealth University

### 4H. Sequence Kernel Association Test for Quantitative Traits in Twin Samples

**Kai Xia\***, **Wonil Chung**, **Zhaoyu Yin**, **Rebecca C. Santelli**  
and **Fei Zou**, University of North Carolina, Chapel Hill

### 4I. An Alternative Approach to Model RNA-seq Data with GLMM

**Han Sun\***, Cleveland Clinic  
**Jiayang Sun**, Case Western Reserve University

\* = Presenter | ■ = Student Award Winner

#### 4J. Classifying Family Relationships using Dense SNP Data and Putative Pedigree Information

Zhen Zeng\* and Eleanor Feingold,  
University of Pittsburgh

#### 4K. Identifying Multiple-Role Genes Dynamic in Distinct Environments

Yaqun Wang\*, Ningtao Wang, Han Hao  
and Rongling Wu, The Pennsylvania State University

#### 4L. ChIP-seq Meta-Caller: An Assembly Method to Combine Multiple ChIP-seq Peak Callers to Identify and Reprioritize the Peaks

Rui Chen\*, University of Pittsburgh  
Qunhua Li, The Pennsylvania State University  
George C. Tseng, University of Pittsburgh

#### 4M. Fast Annotation-Agnostic Differential Expression Analysis

Leonardo Collado-Torres\*, Johns Hopkins University  
Bloomberg School of Public Health and Maltz Research  
Laboratories

Andrew E. Jaffe, Maltz Research Laboratories  
Jeffrey T. Leek, Johns Hopkins University Bloomberg  
School of Public Health

#### 4N. Sample Size and Power Determination for Association Tests in Case-parent Trio Studies

Holger Schwender\*, Heinrich Heine University Duesseldorf  
Christoph Neumann, TU Dortmund University  
Margaret A. Taub, Samuel G. Younkin, Terri H. Beaty and  
Ingo Ruczynski, Johns Hopkins University

#### 4O. A Hierarchical Bayesian Approach to Detect Differential Methylation in Both Mean and Variance for Next Generation Sequencing

Shuang Li\*, Varghese George, Duchwan Ryu,  
Xiaoling Wang, Shaoyong Su and Huidong Shi,  
Georgia Regents University  
Robert H. Podolsky, Wayne State University  
Hongyan Xu, Georgia Regents University

#### 4P. Bayesian Mixture Models for Complex Copy Number Polymorphisms Inferred from Genotyping Arrays

Stephen Cristiano\*, Robert B. Scharpf  
and Lynn Mireless, Johns Hopkins University

#### 4Q. Multiple Phenotype Analysis for Genome-Wide Association Studies

Shelley Liu\*, Harvard School of Public Health  
Sheng Feng, Biogen-Idec

#### 4R. EBSeq-HMM: An Empirical Bayes Hidden Markov Model for Ordered RNA-seq Experiments

Ning Leng\*, University of Wisconsin, Madison  
Brian E. Mcintosh, Morgridge Institute for Research  
Yuan Li, University of Wisconsin, Madison  
Bao K. Nguyen, Bret Duffin, Shulan Tian,  
James A. Thomson and Ron Stewart, Morgridge Institute  
for Research  
Christina Kendziorski, University of Wisconsin, Madison

## 5. POSTERS: PREDICTION, PROGNOSTICS, DIAGNOSTIC TESTING

Sponsor: ENAR

#### 5A. Joint Confidence Region Estimation for Area Under ROC Curve and Youden Index

Jingjing Yin\* and Lili Tian, University at Buffalo

#### 5B. Building Risk Models with Calibrated Margins

Paige Maas\*, National Cancer Institute, National  
Institutes of Health  
Raymond Carroll, Texas A&M University  
Nilanjan Chatterjee, National Cancer Institute,  
National Institutes of Health

#### 5C. Meta-TSP: A Meta-analysis Framework of Top Scoring Pair Algorithm to Combine Multiple Transcriptomic Studies in Inter-study Prediction Analysis

SungHwan Kim\* and George C. Tseng,  
University of Pittsburgh

#### 5D. A Modified Tree-Based Method for Personalized Medicine Decisions

Wan-Min Tsai\*, Heping Zhang, Stephanie O'Malley  
and Ralitza Gueorguieva, Yale University

#### 5E. A Simple Method for Evaluating Within-Sample Prognostic Balance Achieved by Published Comorbidity Summary Measures

Brian L. Egleston\*, Robert G. Uzzo, J. Robert Beck  
and Yu-Ning Wong, Fox Chase Cancer Center, Temple  
University Health System

#### 5F. Effect Size Measures for Functional Modifiers of Treatment Response

Adam Ciarleglio\*, New York University School of Medicine

#### 5G. Power Calculations for Prognostic Biomarker Validation Studies with Time to Event Data

Marshall D. Brown\* and Yingye Zheng, Fred Hutchinson  
Cancer Research Center  
Tianxi Cai, Harvard School of Public Health

#### 5H. Generalized Incremental Forward Stagewise Ordinal Models: Application Predicting Stage of Alzheimer's Disease

Kellie J. Archer\* and Jiayi Hou, Virginia Commonwealth  
University

## 6. POSTERS: SURVIVAL ANALYSIS

Sponsor: ENAR

- 6A. Non-parametric Confidence Bands for Survival Function using Martingale Method**  
Eun-Joo Lee\*, Millikin University
- 6B. On the Estimators and Tests for the Semiparametric Hazards Regression Model**  
Seung-Hwan Lee\*, Illinois Wesleyan University
- 6C. Regression Analysis of Bivariate Current Status Data with the Proportional Hazards Model and Bernstein Polynomials**  
Tao Hu, Capital Normal University  
Qingning Zhou\* and Jianguo Sun, University of Missouri, Columbia
- 6D. Joint Structure Selection and Estimation in the Time-varying Coefficient Cox Model**  
Wei Xiao\* and Wenbin Lu, North Carolina State University  
Hao Helen Zhang, University of Arizona
- 6E. Weighted Log-rank Tests for 'Flipped-Data' Survival Analysis of Data with Non-Detects**  
Eric R. Siegel\*, Songthip T. Ounpraseuth and Ralph L. Kodell, University of Arkansas for Medical Sciences
- 6F. A Frailty Approach for Survival Analysis with Error-prone Covariate**  
Sehee Kim\* and Yi Li, University of Michigan  
Donna Spiegelman, Harvard School of Public Health
- 6G. LC-Morph: A Morphological Image Signature for Predicting Lung Cancer Survival**  
Yuchen Yang\*, Fuyong Xing, Hai Su, Chi Wang, Li Chen, Lin Yang and Arnolod Stromberg, University of Kentucky

## 7. POSTERS: IMAGING, HIGH DIMENSIONAL DATA, BIOMARKERS, AND MICROARRAY

Sponsor: ENAR

- 7A. On the Distribution of Photon Counts with Censoring in Two-Photon Microscopy**  
Burcin Simsek\* and Satish Iyengar, University of Pittsburgh  
David Kleinfeld, University of California, San Diego
- 7B. Bayesian Gaussian Process Regression for High-dimensional Data**  
Qing He\*, Jian Kang and Qi Long, Emory University
- 7C. Effects of Alcohol use on Brain Networks: A Dynamic Causal Model Study with EEG Data**  
Benjamin T. Brown\*, Lynn Eberly, Steve Malone and Kathleen Thomas, University of Minnesota

## 7D. C.Logic: A Classification Algorithm for Discovering Interactions that Lead to Disease Susceptibility

Sybil L. Nelson\*, Bethany Wolf and Viswanathan Ramakrishnan, Medical University of South Carolina

## 7E. A Direct Approach to False Discovery Rate Regression

Simina M. Boca\*, National Cancer Institute, National Institutes of Health  
Jeffrey T. Leek, Johns Hopkins Bloomberg School of Public Health

## 7F. A Study of the Correlation Structure of Microarray Gene Expression Data Based on Mechanistic Modelling of Cell Population Kinetics

Linlin Chen\*, Rochester Institute of Technology  
Lev Klebnov, Charles University  
Anthony Almudevar and Christoph Proschel, University of Rochester

## 7G. Making Computerized Adaptive Testing a Diagnostic Tool

Hua-Hua Chang\*, University of Illinois, Urbana-Champaign  
Ya-Hui Su, National Chung Cheng University

## 7H. Missing Value Imputation in High-dimensional Phenomic Data: Imputable or Not? And How?

Serena Liao\* and George C. Tseng, University of Pittsburgh

## 7I. Age Prediction using Supervised PCA

Valerie J. Watkins\* and Yishi Wang, University of North Carolina, Wilmington

## 7J. Tensor Regression with Applications in Neuroimaging Data Analysis

Xiaoshan Li\*, Hua Zhou and Lexin Li, North Carolina State University

## 7K. Investigating Spatiotemporal Covariance Structures for Modeling Longitudinal Imaging Data

Brandon J. George\* and Inmaculada Aban, University of Alabama, Birmingham

## 7L. Nonparametric Regression with Tree-structured Response

Yuan Wang\*, University of Texas MD Anderson Cancer Center  
J. S. Marron, University of North Carolina, Chapel Hill  
Haonan Wang, Colorado State University  
Burcu Aydin, Alim Ladha and Elizabeth Bullitt, University of North Carolina, Chapel Hill

## 7M. Improving Scan-Rescan Reliability of Resting State fMRI Parcellation

Amanda Mejia\*, Johns Hopkins School of Public Health  
Mary Beth Nebel and Stewart Mostofsky, Kennedy Krieger Institute  
Brian Caffo and Martin Lindquist, Johns Hopkins School of Public Health

\* = Presenter | ■ = Student Award Winner

## 7N. SGPP: Spatial Gaussian Predictive Process Models for Neuroimaging Data

**Jung Won Hyun\*** and **Yimei Li**, St. Jude Children's Research Hospital

**John H. Gilmore**, **Zhaohua Lu**, **Martin Styner** and **Hongtu Zhu**, University of North Carolina, Chapel Hill

## 7O. Dimension Reduction using Inverse Spline Regression

**Kijoeng Nam**, U.S. Food and Drug Administration  
**Paul J. Smith**, University of Maryland, College Park

## 7P. Interpreting Large Dense (Scary) Linear Models along Predictor Groups

**Yuval Benjamini\***, Stanford University  
**Julien Mairal**, INRIA, Grenoble  
**Bin Yu**, University of California, Berkeley

## 8. POSTERS: ENVIRONMENTAL AND LONGITUDINAL DATA ANALYSIS

Sponsor: ENAR

### 8A. Accounting for Complex Survey Design in Modeling Temporal Trends of Phthalate Metabolites in the U.S. Population

**Min Chen\***, **Kevin Kransler**, **Rosemary Zaleski** and **Hua Qian**, ExxonMobil Biomedical Sciences, Inc.

### 8B. Non-stationary Covariance Functions via Domain Segmentation

**Douglas C. Hom\***, **Timothy D. Johnson** and **Veronica J. Berrocal**, University of Michigan

### 8C. The Effect of Exposure to Air Toxics on Age of Diagnosis and Subtype of Childhood Leukemia — A Joint Modeling Approach

**Ting-Yu Chen\***, **Elaine Symanski** and **Wenyaw Chan**, University of Texas School of Public Health

### 8D. Investigating the Health Risks Associated with Long Term Exposure to Coarse PM

**Helen L. Powell\*** and **Roger D. Peng**, Johns Hopkins Bloomberg School of Public Health

### 8E. Functional Data Analysis to Guide a Conditional Likelihood Regression in a Case-Crossover Study Investigating whether Social Characteristics Modify the Health Effects of Air Pollution

**Juana M. Herrera\***, **Joan Staniswalis** and **Sara E. Grineski**, University of Texas, El Paso

### 8F. Dependence Modeling of Spatio-Temporal Weather Extreme Events

**Whitney Huang\*** and **Hao Zhang**, Purdue University

### 8G. Identifying the Constellation of Emergency Health Conditions most Sensitive to Extreme Heat

**Jennifer Bobb\***, Harvard School of Public Health

### 8H. Statistical Strategies for Constructing Health Risk Models with Multiple Pollutants and their Interactions

**Zhichao Sun\***, **Yebin Tao**, **Shi Li**, **Kelly K. Ferguson**, **John D. Meeker**, **Sung Kyun Park**, **Stuart A. Batterman** and **Bhramar Mukherjee**, University of Michigan

### 8I. Mixed Effects Models for Investigating Dietary Regimens Intended to Extend Lifespan in *Caenorhabditis Elegans*

**Jeffrey Burton\***, **Robbie Beyl**, **Jolene Zheng** and **William D. Johnson**, Pennington Biomedical Research Center

### 8J. Simulation from a known Cox MSM using Standard Parametric Models for the g-formula

**Jessica G. Young\*** and **Eric J. Tchetgen Tchetgen**, Harvard School of Public Health

### 8K. Reflecting the Orientation of Teeth in Random Effects Models for Periodontal Outcomes

**Rong Xia\*** and **Thomas M. Braun**, University of Michigan

### 8L. A Longitudinal Beta-binomial Model for Over-dispersed Binomial Data

**Hongqian Wu\*** and **Ying Zhang**, University of Iowa

## 9. POSTERS: EPIDEMIOLOGY AND CAUSAL INFERENCE

Sponsor: ENAR

### 9A. Methods of Missing-Data Exploration that Reveal Potential Extrapolation

**Victoria Liublinska\***, Harvard University

### 9B. Exploring Mobile Technology to Enhance Birth Outcomes in Rural Mozambique: Pilot Study Results

**Manoj T. Rema\***, **Ike Okosun** and **Sheryl Strasser**, Georgia State University

### 9C. Transformations to the Zero-inflated Negative Binomial Model for Overall Exposure Effects: An Analysis of Blood Lead and Dental Caries in a Complex Survey

**D. Leann Long\*** and **R. Constance Wiener**, West Virginia University

### 9D. Applying Multiple Imputation using External Calibration to Propensity Score Methods

**Yenny G. Webb-Vargas\*** and **Elizabeth A. Stuart**, Johns Hopkins Bloomberg School of Public Health

**9E. Efficient Estimation of Partial Rank-based Correlation with Missing Data**  
Wei Ding\* and Peter X.K Song, University of Michigan

**9F. Data Analysis of Contributing Factors for Obesity in Low-Income Neighborhoods**  
Sujin Kim\* and Rukmana Deden, Savannah State University

## 10. POSTERS: NON PARAMETRIC AND NON LINEAR METHODS

Sponsor: ENAR

**10A. Comparison of Area Under the Curve and Mixed Effects Models Methodologies for Profile Analysis**  
Robbie A. Beyl\*, Jeffrey Burton and William Johnson, Pennington Biomedical Research Center

**10B. Inferential Approaches to Relative Risk Regression**  
Yi Lu\* and Daniel O. Scharfstein, Johns Hopkins Bloomberg School of Public Health

**10C. Fractional Polynomial Regression with Multilevel Data**  
Paul Kolm\*, Daniel Elliot and Joann Brice, Christiana Care Health System  
Robert Young, Northwestern University

**10D. BLUP Estimation in Unbalanced Mixed-Effects Models**  
Samaradasa Weerahandi, Pfizer Inc.  
Peijin Xie, Hershey's Company  
Ching-Ray Yu and Kelly H. Zou\*, Pfizer Inc.

**10E. Flexible Test for Interactions in Smoothing Spline ANOVA Models through the Use of Distance Correlation**  
Sebastian J. Teran Hidalgo\*, Michael Wu and Michael Kosorok, University of North Carolina, Chapel Hill

**10F. Optimal Global Test for Functional Linear Regression Models and its Applications**  
Xiao Wang and Simeng Qu\*, Purdue University

**10G. Model Tumor Pattern and Compare Treatment Effects using Semiparametric Linear Mixed-Effects Models**  
Changming Xia\*, University of Rochester  
Jianrong Wu, St. Jude Children's Research Hospital  
Hua Liang, The George Washington University

**10H. Robust Variance Component Analysis with Applications in Biological Assay Validation**  
Binbing Yu\*, MedImmune, LLC.

**10I. Oracle Inference for GMM Models**  
Mihai C. Giurcanu\* and Brett D. Presnell, University of Florida

**10J. Covariate-dependent Functional Inference for the Life-time Circadian Rhythm of Physical Activity**  
Luo Xiao\*, Lei Huang and Ciprian Crainiceanu, Johns Hopkins Bloomberg School of Public Health

## 11. POSTERS: VARIABLE SELECTION, MACHINE LEARNING AND OTHER

Sponsor: ENAR

**11A. An Extended Beta Regression Model**  
Min Yi\* and Nancy Flournoy, University of Missouri, Columbia

**11B. Model-Adjusted Standardization to Account for Unmeasured Cluster-Level Covariates with Complex Survey Data**  
Zhuangyu Cai\* and Babette Brumback, University of Florida

**11C. A New Multiple Comparisons with the Best Procedure**  
Tianshuang Wu\* and Susan Murphy, University of Michigan

**11D. Mixture of D-vine Copulas for Modeling Dependence**  
Daeyoung Kim, Sungkyunkwan University, Korea  
Jong-Min Kim, University of Minnesota, Morris  
Shu-Min Liao, Amherst College  
Yoosung Jung\*, Prairie View A&M University

**11E. Ensemble Variable Selection and Estimation (EVE)**  
Sunnyoung Shin\*, Yufeng Liu and Jason Fine, University of North Carolina, Chapel Hill

**11F. Support Vector Classifiers and Missing Data: An Investigation of the Complete-Case Solution and a Proposal of an EM-like Solution**  
Thomas G. Stewart\*, Donglin Zeng and Michael C. Wu, University of North Carolina, Chapel Hill

**11G. Evaluating Novel Intradialytic Sampling Designs for Individual Pharmacokinetic Analysis using Monte Carlo Simulation**  
Minchun Zhou\*, William Henry Fissell and Matthew Stephen Shotwell, Vanderbilt University

**11H. A Study on the Statistical Properties of the European Pharmacopoeia Test for Uniformity of Dosage Units using Large Sample Sizes**  
Meiyu Shen\*, Yi Tsong and Xiaoyu Dong, U.S. Food and Drug Administration

**11I. Variable Selection When Some Predictors are Measured with Error**  
Guangning Xu\* and Leonard A. Stefanski, North Carolina State University

\* = Presenter | ■ = Student Award Winner

### 11J. Variable Selection for Optimal Treatment Regimes

**Na Zhang\***, **Eric Laber** and **Howard Bondell**,  
North Carolina State University

### 11K. Promoting Similarity of Model Sparsity Structures in Integrative Analysis

**Yuan Huang\*** and **Runze Li**, The Pennsylvania State University  
**Jian Huang**, University of Iowa  
**Shuangge Ma**, Yale University

## Monday, March 17

8:30 am – 10:15 a.m.

### 12. MASSIVE ONLINE OPEN STATISTICS (MOOS): SHOULD WE BE TEACHING STATISTICS TO 100,000 AT A TIME?

*Grand Ballroom I (3rd Floor)*

**Sponsors:** ENAR, ASA Section on Statistical Education, ASA Statistical Learning and Data Mining Section

**Organizer:** **Jeffrey Leek**, Johns Hopkins Bloomberg School of Public Health

**Chair:** **Brian Caffo**, Johns Hopkins Bloomberg School of Public Health

8:30

### MOOCs for Statistics and the Statistics of MOOCs

**Joseph Blitzstein\***, Harvard University

8:55

### Can We Teach 100,000 People Data Analysis at a Time?

**Jeffrey T. Leek\***,  
Johns Hopkins Bloomberg School of Public Health

9:20

### Statistical Reasoning for the Masses

**John McGready\***, Johns Hopkins Bloomberg School of Public Health

9:45

### Massive Online Open Statistics (MOOS): Should We be Teaching Statistics to 100,000 at a Time?

**Rebecca Nugent\***, Carnegie Mellon University

10:10

### Floor Discussion

### 13. COUNCIL FOR EMERGING AND NEW STATISTICIANS (CENS) INVITED SESSION: SHOULD I DO A POSTDOC?

*Grand Ballroom V (3rd Floor)*

**Sponsors:** ENAR, ASA Mental Health Statistics Section

**Organizer:** **Tapan Mehta**, University of Alabama, Birmingham

**Chair:** **Naomi Brownstein**, Florida State University

8:30

### My Experiences as a Postdoc in Biostatistics

**Joshua Warren\***, University of North Carolina, Chapel Hill

9:00

### Is Post-Doctoral Fellowship Key to Academic Success?

**Hemant K. Tiwari\***, University of Alabama, Birmingham

9:30

### Should I do a Post-Doctoral Fellowship? The NICHD Experience

**Paul S. Albert\***, Eunice Kennedy Shriver National Institute of Child Health and Human Development, National Institutes of Health

10:10

### Floor Discussion

### 14. ADAPTIVE RANDOMIZED TRIAL DESIGNS AND IMPROVED ANALYSIS METHODS TO LEARN WHICH SUBPOPULATIONS BENEFIT FROM WHICH TREATMENTS

*Grand Ballroom II (3rd Floor)*

**Sponsors:** IMS, ASA Biometrics Section, ASA Biopharmaceutical Section

**Organizer:** **Michael Rosenblum**, Johns Hopkins Bloomberg School of Public Health

**Chair:** **Yi (Yvonne) Huang**, Johns Hopkins Bloomberg School of Public Health

8:30

### Impacts of Predictive Genomic Classifier Performance on Subpopulation-Specific Treatment Effects Assessment

**Sue-Jane Wang\***, U.S. Food and Drug Administration  
**Ming-Chung Li**, National Cancer Institute, National Institutes of Health

8:55

### SHINE Shadow: A Bayesian Adaptive Trial vs. a Group Sequential Trial in Stroke

**Jason T. Connor\*** and **Kristine R. Broglio**, Berry Consultants  
**Valerie L. Durkalski**, Medical University of South Carolina

9:20

### Adaptive Enrichment Designs for Clinical Trials

**Noah Simon\***, University of Washington  
**Richard Simon**, National Cancer Institute, National Institutes of Health

9:45

### Constructing Confidence Sets for the Optimal Regime

**Sherri Rose\***, Harvard University  
**Tuo Zhao**, Johns Hopkins University  
**Han Liu**, Princeton University  
**Michael Rosenblum**, Johns Hopkins University

10:10

### Floor Discussion

## 15. STATISTICAL METHODS FOR COMPLEX STRUCTURED BIOMEDICAL OBJECT DATA

*Grand Ballroom VI (3rd Floor)*

**Sponsors:** ENAR, ASA Statistical Learning and Data Mining Section

**Organizer:** **Veera Baladandayuthapani**, University of Texas MD Anderson Cancer Center

**Chair:** **Veera Baladandayuthapani**, University of Texas MD Anderson Cancer Center

8:30

### Object Oriented Data Analysis: Backwards PCA

**J. S. Marron\***, University of North Carolina, Chapel Hill

8:55

### Additive and Interaction Models for Nonparametric Functional and Object Regression, with Application to Ophthalmological Multi-level Functional Data on Spherical Domains

**Jeffrey S. Morris\*** and **Veera Baladandayuthapani**, University of Texas MD Anderson Cancer Center  
**Massimo Fazio**, University of Alabama, Birmingham

9:20

### On Synergy Between Statistical Shape Analysis (SSA) and Functional Data Analysis (FDA)

**Anuj Srivastava\***, Florida State University  
**Sebastian Kurtek**, The Ohio State University  
**Eric Klassen**, Florida State University  
**Jingyong Su**, Texas Tech University

9:45

### Bayesian Spatial Functional Models for High-dimensional Genomics Data

**Veerabhadran Baladandayuthapani\***, **Lin Zhang**, **Jeffrey Morris** and **Keith Baggerly**, University of Texas MD Anderson Cancer Center

10:10

### Floor Discussion

\* = Presenter | ■ = Student Award Winner

## 16. MULTIVARIATE ANALYSIS IN HIGH DIMENSIONS

*Grand Ballroom III (3rd Floor)*

**Sponsor:** IMS

**Organizer:** **Adam Rothman**, University of Minnesota

**Chair:** **Mark Fiecas**, University of Warwick, UK

8:30

### Laplacian Shrinkage for Estimation of Inverse Covariance Matrices from Heterogenous Samples

**Takumi Saegusa** and **Ali Shojaie\***, University of Washington

8:55

### Joint Mean-Covariance Models for Incomplete Multivariate Longitudinal Data

**Mohsen Pourahmadi\***, Texas A&M University

9:20

### Prediction in Abundant High-dimensional Linear Regression

**Dennis Cook\***, University of Minnesota  
**Liliana Forzani**, Instituto de Matemática Aplicada del Litoral and Facultad de Ingeniería Química CONICET and UNL  
**Adam J. Rothman**, University of Minnesota

9:45

### Properties of Optimizations used in Penalized Gaussian Likelihood Inverse Covariance Matrix Estimation

**Adam J. Rothman\***, University of Minnesota  
**Liliana Forzani**, Instituto de Matemática Aplicada del Litoral and Facultad de Ingeniería Química CONICET and UNL

10:10

### Floor Discussion

## 17. RECENT ADVANCES IN LIFETIME DATA ANALYSIS

*Grand Ballroom IV (3rd Floor)*

**Sponsor:** ENAR

**Organizer:** **Mei-Ling Ting Lee**, University of Maryland, College Park

**Chair:** **Xin He**, University of Maryland, College Park

8:30

### Bayesian Threshold Regression for Informatively Censored Current Status Data

**Tao Xiao**, University of Maryland, College Park and The Ohio State University  
**Michael L. Pennell\***, The Ohio State University

**8:55**  
**Semiparametric Estimation for the Additive Hazards Model with Left-truncated and Right-censored Data**  
**Chiung-Yu Huang\***, Johns Hopkins University  
**Jing Qin**, National Institute of Allergy and Infectious Diseases, National Institutes of Health

**9:20**  
**Semiparametric Inference on the Absolute Risk Reduction and the Restricted Mean Survival Difference**  
**Song Yang\***, National Heart, Lung, and Blood Institute, National Institutes of Health

**9:45**  
**Evaluating Calibration of Risk Prediction Models**  
**Ruth Pfeiffer\***, National Cancer Institute, National Institutes of Health

**10:10**  
**Floor Discussion**

## 18. CONTRIBUTED PAPERS: EPIDEMIOLOGIC METHODS

*Atlantic Room (3rd Floor)*

**Sponsor:** ENAR

**Chair:** **Emily Mitchell**, Eunice Kennedy Shriver National Institute of Child Health and Human Development, National Institutes of Health

**8:30**  
**Modeling Epidemiological Features of Disease Outbreaks**  
**Manasi Sheth-Chandra\***, Booz Allen Hamilton  
**N. Rao Chaganty**, Old Dominion University

**8:45**  
**A Stochastic Model for Explicit Estimation of Effect Modification in Finite Sample**  
**Xiaoshan Wang\*** and **Jacqueline Starr**, Forsyth Institute

**9:00**  
**Modeling the Effects of Climate Change and Air Quality on Asthma, Accounting for Uncertainty**  
**Stacey E. Alexeeff\***, **Stephan R. Sain** and **Doug Nychka**, National Center for Atmospheric Research

**9:15**  
**One Novel Approach to Handle Random Measurement Error using Hidden Markov Models**  
**Lola Luo\***, **Dylan Small** and **Jason A. Roy**, University of Pennsylvania

**9:30**  
**Quantifying Circadian Trajectory of Fatigability using the Proportional Intensity Model**  
**Jiawei Bai\***, **Jennifer Schrack** and **Mei-Cheng Wang**, Johns Hopkins University  
**Luigi Ferrucci**, National Institute of Aging, National Institutes of Health  
**Ciprian M. Crainiceanu**, Johns Hopkins University

**9:45**  
**A Comparison of Methods for Biomarker Associations with Endogenous Treatment**  
**Andrew J. Spieker\***, **Joseph AC Delaney** and **Robyn L. McClelland**, University of Washington

**10:00**  
**Modeling Temporal Patterns in Exposure/Response Relationships with Change Points, with an Application to Incident Obstructive Airway Disease in Firefighters Exposed to the World Trade Center Rescue/Recovery Effort**  
**Charles B. Hall\***, Albert Einstein College of Medicine of Yeshiva University  
**Michelle Glaser**, **Mayris Webber**, **Xiaoxue Liu** and **Rachel Zeig-Owens**, Montefiore Medical Center  
**David Prezant**, Fire Department of the City of New York

## 19. CONTRIBUTED PAPERS: COMPUTATIONAL METHODS AND IMPLEMENTATION

*Bristol Room (3rd Floor)*

**Sponsor:** ENAR

**Chair:** **Ruiwen Zhang**, SAS Inc.

**8:30**  
**Performance of Shannon's Maximum Entropy Distribution under Some Restrictions**  
**Sinan Saracli\*** and **Hatice Cicek**, Afyon Kocatepe University

**8:45**  
**Propensity Score Matching with Survival Outcomes: Critical Considerations in the Choice of the Caliper Size**  
**Adin-Cristian Andrei\***, **Zhi Li**, **S. Chris Malaisrie**, **Edwin McGee**, **Jane Kruse** and **Patrick M. McCarthy**, Bluhm Cardiovascular Institute, Northwestern University

**9:00**  
**Model Free Variable Rank using Randomized Decision Tree, an Ensemble of Trees**  
**Bong-Jin Choi\*** and **Chris P. Tsokos**, University of South Florida

**9:15**  
**Optimal Computational and Statistical Rates of Convergence for Sparse Nonconvex Learning Problems**  
**Zhaoran Wang\*** and **Han Liu**, Princeton University  
**Tong Zhang**, Rutgers University

**9:30**  
**A Modified EM Algorithm for Regression Analysis of Data with Non-ignorable Non-response**  
**Yang Zhang\*** and **Gong Tang**, University of Pittsburgh

**9:45**  
**A Computationally Fast and Asymptotically Efficient Approach for the Broken-stick Model**  
**Ritabrata Das\***, **Moulinath Banerjee** and **Bin Nan**, University of Michigan

## 20. CONTRIBUTED PAPERS: NON-PARAMETRIC AND SEMIPARAMETRIC METHODS IN FUNCTIONAL DATA ANALYSIS

*Grand Ballroom X (3rd Floor)*

**Sponsor:** ENAR

**Chair:** **Adam Ciarleglio**, NYU School of Medicine

**8:30**  
**Restricted Likelihood Ratio Tests for Linearity in Scalar-on-Function Regression**  
**Mathew W. McLean\***, Texas A&M University  
**Giles Hooker** and **David Ruppert**, Cornell University

**8:45**  
**Incorporating Covariates in Skewed Functional Data Models**  
**Meng Li\***, **Ana-Maria Staicu** and **Howard D. Bondell**, North Carolina State University

**9:00**  
**Simultaneous Inference for Repeated Functional Data**  
**Guanqun Cao\***, Auburn University  
**Lily Wang**, University of Georgia

**9:15**  
**Generalized Functional Concurrent Model**  
**Janet S. Kim\***, **Arnab Maity** and **Ana-Maria Staicu**, North Carolina State University

**9:30**  
**Variable-Domain Functional Regression**  
**Jonathan E. Gellar** ■ and **Elizabeth Colantuoni**, Johns Hopkins Bloomberg School of Public Health  
**Dale M. Needham**, Johns Hopkins School of Medicine  
**Ciprian M. Crainiceanu**, Johns Hopkins Bloomberg School of Public Health

**9:45**  
**Interaction Models for Functional Data**  
**Joseph Usset\***, **Ana-Maria Staicu** and **Arnab Maity**, North Carolina State University

**10:00**  
**A Novel Statistical Method based on Dynamic Models for Classification**  
**Lerong Li\*** and **Momiaio Xiong**, University of Texas School of Public Health, Houston

## 21. CONTRIBUTED PAPERS: STATISTICAL METHODS FOR MICROARRAY AND BIOMARKER DATA

*Grand Ballroom VII (3rd Floor)*

**Sponsor:** ENAR

**Chair:** **Danping Liu**, Eunice Kennedy Shriver National Institute of Child Health and Human Development, National Institutes of Health

**8:30**  
**Modeling qRT-PCR Dynamics with Application to Cancer Biomarkers Quantification**  
**Inna Chervoneva\***, Thomas Jefferson University

**8:45**  
**Evaluation Drug Efficacy in the Presence of the Imperfect Companion Diagnostic Device**  
**Meijuan Li\***, U.S. Food and Drug Administration

**9:00**  
**Joint Graphical Models for Relational Structures in Multi-Dimensional Phenotypic Data**  
**Vivian H. Shih\***, Novartis Pharmaceuticals  
**Catherine A. Sugar**, University of California, Los Angeles

**9:15**  
**Sample Size Methods for Training Classifiers Developed from Regularized Logistic Regression**  
**Sandra Safo\***, **Xiao Song** and **Kevin K. Dobbin**, University of Georgia

**9:30**  
**Bilaterally Contaminated Normal Model with Nuisance Parameter and Its Applications**  
**Qian Fan\***, University of Kentucky  
**Hongying Dai**, Children's Mercy Hospital  
**Richard J. Charnigo**, University of Kentucky

**9:45**  
**Correlation Coefficient Inference for Left-Censored Biomarker Data with Known Detection Limits**  
**Courtney E. McCracken**, Emory University  
**Stephen W. Looney\***, Georgia Regents University

**10:00**  
**A Semi-parametric Model for Time-dependent Predictive Accuracy Curves of Biomarkers**  
**Weining Shen\***, **Jing Ning** and **Ying Yuan**, University of Texas MD Anderson Cancer Center

\* = Presenter | ■ = Student Award Winner

## 22. CONTRIBUTED PAPERS: MACHINE LEARNING

*Grand Ballroom IX (3rd Floor)*

**Sponsor:** ENAR

**Chair:** Qing He, Emory University

**8:30**

### Joint Estimation of Multiple Graphical Models from High Dimensional Dependent Data

Huitong Qiu ■ and Fang Han, Johns Hopkins University

Han Liu, Princeton University

Brian S. Caffo, Johns Hopkins University

**8:45**

### MBACT - Multiclass Bayesian Additive Classification Trees

Bereket P. Kindo\*, Hao Wang and Edsel A. Pena, University of South Carolina

**9:00**

### Random Forest Importance Scores: Significance Testing and Conditional Importance

Eric Bair\* and Lira Pi, University of North Carolina, Chapel Hill

**9:15**

### Large-Margin Classifier Selection via Decision Boundary Instability

Wei Sun\* and Guang Cheng, Purdue University

Yufeng Liu, University of North Carolina, Chapel Hill

**9:30**

### Bias Correction for Selecting the Minimal-error Classifier from Many Machine Learning Models

Ying Ding\*, Shaowu Tang, Ge Liao, Jia Jia, Yan Lin and George C. Tseng, University of Pittsburgh

**9:45**

### Ensemble Learning of Inverse Probability Weights for Marginal Structural Modeling in Large Observational Datasets

Susan Gruber\* and Roger W. Logan, Harvard School of Public Health

Inmaculada Jarrin and Susana Monge, Instituto de Salud Carlos III, Madrid, Spain

Miguel Hernan, Harvard School of Public Health

**10:00**

### Ordinal Logic Forest: Discovering Interactions Among Binary Predictors for Classifying Ordinal Responses

Bethany J. Wolf\* and Elizabeth G. Hill, Medical University of South Carolina

Elizabeth H. Slate, Florida State University

## 23. CONTRIBUTED PAPERS: MULTIPLE TESTING

*Chasseur Ballroom (3rd Floor)*

**Sponsor:** ENAR

**Chair:** Simina M. Boca, National Cancer Institute, National Institutes of Health

**8:30**

### Sizing Clinical Trials that Compare Two Interventions using Two Time-to-Event Outcomes

Yuki Ando, Pharmaceuticals and Medical Devices Agency  
Toshimitsu Hamasaki\*, Osaka University Graduate School of Medicine and National Cerebral and Cardiovascular Center  
Tomoyuki Sugimoto, Hirosaki University Graduate School of Science & Technology

Scott R. Evans, Harvard School of Public Health

Yuko Ohno, Osaka University Graduate School of Medicine

**8:45**

### Multiple Simultaneous Tests for Noninferiority and Superiority: A Graphical Approach

Heng Li and Vandana Mukhi\*, U.S. Food and Drug Administration

**9:00**

### Multiple Testing that Considers Assumptions and Network

Demba Fofana\*, E. O. George and Dale Bowman, University of Memphis

**9:15**

### Testing the Disjunction Hypothesis using Voronoi Diagrams, with Applications to Genetics

Daisy Phillips\* and Debashis Ghosh, The Pennsylvania State University

**9:30**

### A Class of Improved Hybrid Hochberg-Hommel Type Step-Up Multiple Test Procedures

Jiangtao Gou\* and Ajit C. Tamhane, Northwestern University

Dong Xi, Novartis Pharmaceuticals Corporation

Dror Rom, Prosoft Software, Inc.

**9:45**

### Identifying Multiple Regulation Across a Diverse Set of Outcomes

Denis M. Agniel\* and Tianxi Cai, Harvard University

**10:00**

### Dorfman Testing with Correlated Responses

Elena K. Bordonali\*, Michael G. Hudgens and

Bahjat F. Qaqish, University of North Carolina, Chapel Hill

## 24. CONTRIBUTED PAPERS: METHODS FOR STATISTICAL GENETICS

*Grand Ballroom VIII (3rd Floor)*

**Sponsor:** ENAR

**Chair:** Peng Wei, University of Texas School of Public Health

8:30

### Fitting Generalized Linear Mixed Models to Family Data in Genetic Association Studies

**Tao Wang\***, **Peng He** and **Kwang Woo Ahn**, Medical College of Wisconsin

**Xujing Wang**, University of Alabama, Birmingham

**Soumitra Ghosh**, GlaxoSmithKline

**Purushottam Laud**, Medical College of Wisconsin

8:45

### Kernel Methods for Regression Analysis of Microbiome Compositional Data

**Jun Chen\***, Harvard School of Public Health

**Hongzhe Li**, University of Pennsylvania

9:00

### Latent Class Quantitative Trait Loci (QTL) Mapping

**Shuyun Ye\***, **Xiaomao Li**, **Mark Keller**, **Alan Attie** and

**Christina Kendziorski**, University of Wisconsin, Madison

9:15

### Using Gene Expression to Improve the Power of Genome-Wide Association Analysis

**Yen-Yi Ho\*** and **Emily C. Baechler**, University of Minnesota

**Ward Ortmann**, **Timothy W. Behrens**, **Robert R. Graham**

and **Tushar R. Bhangale**, Genentech, Inc.

**Wei Pan**, University of Minnesota

9:30

### Extending Linear Predictors to Impute Genotypes in Pedigrees

**Wenan Chen\*** and **Daniel J. Schaid**, Mayo Clinic

9:45

### Inferring Rare Disease Risk Variants based on Exact Probabilities of Sharing by Multiple Affected Relatives

**Alexandre Bureau\***, Institut universitaire en santé mentale de Québec

**Samuel Younkin**, University of Wisconsin, Madison

**Margaret M. Parker**, Johns Hopkins Bloomberg School of Public Health

**Joan E. Bailey-Wilson**, National Human Genome Research Institute, National Institutes of Health

**Mary L. Marazita**, University of Pittsburgh

**Jeffrey C. Murray**, University of Iowa

**Elisabeth Mangold**, University of Bonn

**Hasan Albacha-Hejazi**, Dr. Hejazi Clinic

**Terri H. Beaty** and **Ingo Ruczinski**, Johns Hopkins

Bloomberg School of Public Health

10:00

### People Can't See Statistical Significance: A Massive Randomized Trial on the Visual Perception of Relationships

**Aaron Fisher\***, **Georgiana B. Anderson** and **Jeff Leek**, Johns Hopkins Bloomberg School of Public Health

## Monday, March 17

10:15 am – 10:30 pm

### Refreshment Break with our Exhibitors

*Grand Ballroom Foyer (3rd Floor)*

## Monday, March 17

10:30 am – 12:15 pm

## 25. STATISTICAL INNOVATIONS FOR STUDYING THE HUMAN BRAIN FUNCTION

*Grand Ballroom II (3rd Floor)*

**Sponsors:** ENAR, ASA Section on Statistics in Imaging

**Organizer:** Mark Fiecas, University of Warwick

**Chair:** Mark Fiecas, University of Warwick

10:30

### A New Method for Estimating Changes in Granger Causality in EEG Data

**Ivor Cribben\***, University of Alberta

10:55

### Genome-wide Scan of Brain Phenotypes Discovers Common Genetic Variants Influencing Cortical Surface Area

**Chi-Hua Chen\***, **Andrew Schork** and **Wes Thompson**, University of California, San Diego

**Ole Andreassen**, University of Oslo

**Anders Dale**, University of California, San Diego

11:20

### Comparison of Parametric and Semiparametric Statistical Methods and Signal Processing Methodology for fMRI Signal Analysis Illustrated using a Gustatory Experiment

**Jaroslav Harezlak\***, Indiana University Fairbanks School of Public Health

**Mario Dzemidzic**, Indiana University School of Medicine

**Maria A. Kudela** and **Jacek Urbanek**, Indiana University Fairbanks School of Public Health

**Brandon G. Oberlin** and **David A. Kareken**, Indiana

University School of Medicine

\* = Presenter | ■ = Student Award Winner

11:45

**A Semi-parametric Quadratic Inference Approach for Longitudinal fMRI Data**

**Yu Chen\***, **Timothy D. Johnson** and **Min Zhang**,  
University of Michigan

12:10

**Floor Discussion**

**26. META-ANALYSIS OF GENE-ENVIRONMENT INTERACTION IN THE POST-GWAS ERA**

*Grand Ballroom VI (3rd Floor)*

**Sponsors:** ENAR, ASA Section on Statistics and the Environment

**Organizer:** **Bhramar Mukherjee**, University of Michigan

**Chair:** **Jaeil Ahn**, University of Texas MD Anderson Cancer Center

10:30

**Testing GxE in Genome-wide Association Studies**

**Li Hsu\***, Fred Hutchinson Cancer Research Center

10:55

**Bayesian Meta-analysis Methods for Detecting G-E Interactions in Genomic Data**

**Xiaoquan Wen\***, University of Michigan

11:20

**The Role of Covariate Heterogeneity in Meta-analysis of Gene-environment Interactions with Quantitative Traits**

**Bhramar Mukherjee\***, University of Michigan  
**Shi Li**, Eli Lilly and Company

11:45

**Meta and Mega Analysis of G x E Interactions with Complex Disease Outcomes: Experience and Insights from the CHARGE Consortium**

**Kenneth Rice\*** and **Colleen Sitlani**,  
University of Washington

12:10

**Floor Discussion**

**27. STATISTICS METHODS FOR HIGH-THROUGHPUT GENOMICS**

*Grand Ballroom V (3rd Floor)*

**Sponsors:** ENAR, ASA Biometrics Section, ASA Biopharmaceutical Section

**Organizer:** **Hui Jiang**, University of Michigan

**Chair:** **Hui Jiang**, University of Michigan

10:30

**Statistical Issues with RNAseq Data**

**Rafael Irizarry\***, Dana-Farber Cancer Institute and Harvard School of Public Health

10:55

**Model-based Estimation of Abundances of Species, Microbial Genes and Pathways in Metagenomic Data**

**Hongzhe Li\*** and **Eric Chen**, University of Pennsylvania

11:20

**Statistical Analysis of Time Course ChIP-seq Data**

**Xuekui Zhang** and **Hongkai Ji\***, Johns Hopkins Bloomberg School of Public Health

11:45

**Sequencing Thousands of Human Genomes**

**Goncalo R. Abecasis**, University of Michigan School of Public Health

12:10

**Floor Discussion**

**28. PANEL DISCUSSION: PERSONALIZED MEDICINE: BETTER TREATMENT FOR THE PATIENT OR THE RIGHT PATIENT FOR THE TREATMENT?**

*Grand Ballroom VIII (3rd Floor)*

**Sponsors:** ENAR, ASA Biopharmaceutical Section

**Organizer:** **Olga Marchenko**, Innovation, Quintiles

**Chair:** **Olga Marchenko**, Innovation, Quintiles

10:30

**Personalized Medicine: Better Treatment for the Patient or the Right Patient for the Treatments?**

**Anastasios A. Tsiatis**, North Carolina State University

10:55

**Keaven M. Anderson**, Merck & Company, Inc.

11:20

**Discussion**

**Stephen J. Ruberg**, Eli Lilly and Company — Distinguished Research Fellow

**Sandeep M. Menon**, Pfizer Inc. and Boston University

**Lisa M. LaVange**, U.S. Food and Drug Administration

**Ilya Lipkovich**, Quintiles

12:00

**Floor Discussion**

\* = Presenter | ■ = Student Award Winner

## 29. RECENT ADVANCES IN STATISTICAL METHODS FOR META-ANALYSIS

*Grand Ballroom III (3rd Floor)*

**Sponsors:** ENAR, ASA Section on Bayesian Statistical Science, ASA Biopharmaceutical Section

**Organizer:** **Yong Chen**, University of Texas Health Science Center at Houston

**Chair:** **Haitao Chu**, University of Minnesota

10:30

### Bayesian Network Meta-Analysis for Categorical Outcomes

**Christopher H. Schmid\*** and **Thomas A. Trikalinos**, Brown University

11:00

### Incorporation of Mixed Bivariate Outcomes and Individual Patient Data in Network Meta Analysis

**Bradley P. Carlin\*** and **Hwanhee Hong**, University of Minnesota  
**Haoda Fu** and **Karen L. Price**, Eli Lilly and Company

11:30

### Meta-analysis of Diagnostic Test Accuracy Comparisons: Network Methods

**Wei Cheng**, **Constantine Gatsonis\***, **Christopher Schmid** and **Thomas Trikalinos**, Brown University

12:00

### Floor Discussion

## 30. SUBGROUP ANALYSIS AND PERSONALIZED PREDICTION

*Grand Ballroom IX (3rd Floor)*

**Sponsors:** ENAR, ASA Biopharmaceutical Section

**Organizer:** **Annie Qu**, University of Illinois, Urbana-Champaign

**Chair:** **Annie Qu**, University of Illinois, Urbana-Champaign

10:30

### Personalized Prediction

**Yunzhang Zhu**, **Xiaotong Shen\***, and **Changqing Ye**, University of Minnesota

10:55

### Personalized Treatment for Longitudinal Data

**Hyunkeun Cho\***, Western Michigan University  
**Peng Wang**, Bowling Green State University  
**Annie Qu**, University of Illinois, Urbana-Champaign

11:20

### Multiway Clustering with Hidden Structure

**Bruce G. Lindsay\***, The Pennsylvania State University  
**Francesco Bartolucci**, University of Perugia  
**Francesca Chiaromonte**, The Pennsylvania State University

11:45

### Model-based Inference in Subgroup Analysis

**Xuming He\*** and **Juan Shen**, University of Michigan

12:10

### Floor Discussion

## 31. LATENT VARIABLE MODELING FOR MULTIPLE OUTCOMES AND GROWTH MODELS IN PSYCHIATRIC STUDIES

*Grand Ballroom VII (3rd Floor)*

**Sponsors:** ENAR, ASA Mental Health Statistics Section

**Organizer:** **Samprit Banerjee**, Cornell University

**Chair:** **Yuanjia Wang**, Columbia University

10:30

### Shared Versus Specific Effects of Treatment on Multiple Outcomes in Clinical Trials using Latent Variable Modeling

**Melanie Wall\***, Columbia University

10:55

### Using Multiple Imputation to Harmonize Data Across Multiple Trials that use Different Outcome Measures

**Juned Siddique\***, Northwestern University  
**Ahnalee Brinks**, University of Miami  
**Charles H. Brown**, Northwestern University  
**Jerome P. Reiter**, Duke University

11:20

### Simultaneous Estimation of Mixture Model for Multilevel Data

**Haiqun Lin\***, **Shu-xia Li**, **Xiao Xu** and **Harlan M. Krumholz**, Yale University

11:45

### Three Novel Applications of Latent Variable Modeling: A Discussion

**Samprit Banerjee\***, Cornell University

12:10

### Floor Discussion

## 32. CONTRIBUTED PAPERS: BAYESIAN ANALYSIS OF HIGH DIMENSIONAL DATA

*Grand Ballroom I (3rd Floor)*

**Sponsor:** ENAR

**Chair:** **Mark Reimers**, Virginia Commonwealth University

10:30

### Constrained Priors and X-inactivation

**Alan B. Lenarcic\***, **John Calaway**, **Fernando Pardo** and **William Valdar**, University of North Carolina, Chapel Hill

\* = Presenter | ■ = Student Award Winner

10:45

**Bayesian Approach for Predicting Protein Secondary Structure**

**David B. Dahl**, Brigham Young University  
**Qiwei Li\*** and **Marina Vannucci**, Rice University  
**Hyun Joo** and **Jerry W. Tsai**, University of the Pacific

11:00

**A Hierarchical Bayesian Model for Inference of Copy Number Variants and Their Association to Gene Expression**

**Alberto Cassese\***, Rice University  
**Michele Guindani**, University of Texas  
MD Anderson Cancer Center  
**Mahlet G. Tadesse**, Georgetown University  
**Francesco Falciani**, University of Liverpool  
**Marina Vannucci**, Rice University

11:15

**Sampling Designs for Multi-Species Assemblage with Unknown Heterogeneity**

**Hongmei Zhang**, University of South Carolina  
**Kaushik Ghosh\***, University of Nevada, Las Vegas  
**Pulak Ghosh**, Indian Institute of Management, Bangalore

11:30

**Bayes Multiple Classification Function in Logic Regression Models**

**Wensong Wu\*** and **Tan Li**, Florida International University

11:45

**Using Informative Priors Obtained from Historical Data Significantly Improves Detection of Differentially Expressed Genes using Microarray Data**

**Ben Li\*** and **Qing He**, Emory University  
**Zhaonan Sun** and **Yu Zhu**, Purdue University  
**Zhaohui Qin**, Emory University

12:00

**Smoothing Functional Data with a Hierarchical Bayesian Model**

**Jingjing Yang\***, Rice University  
**Hongxiao Zhu**, Virginia Tech  
**Dennis D. Cox**, Rice University

**33. CONTRIBUTED PAPERS: GENETICS AND EPIDEMIOLOGIC STUDY DESIGN**

*Grand Ballroom IV (3rd Floor)*

**Sponsor:** ENAR

**Chair:** **Osorio Meirelles**, National Institute on Aging, National Institutes of Health

10:30

**Control Function Assisted IPW Estimation with a Secondary Outcome in Case-control Studies**

**Tamar Sofer\*** and **Eric J. Tchetgen Tchetgen**, Harvard School of Public Health

10:45

**Prediction of Cancer Drugs' Sensitivities using High-Dimensional Genomic Features**

**Ting-Huei Chen\*** and **Wei Sun**, University of North Carolina, Chapel Hill

11:00

**Enhancing Genetic Case-control Studies using Sample Surveys**

**Parichoy Pal Choudhury\*** and **Daniel Scharfstein**, Johns Hopkins University  
**Joshua Galanter** and **Chris Gignoux**, University of California, San Francisco  
**Lindsey Roth**, Kaiser Permanente  
**Sam Oh**, **Esteban Burchard** and **Saunak Sen**, University of California, San Francisco

11:15

**The Effect of FTO Gene Variants and Physical Activity Interaction on Trunk Fat Percentage Among the Population of Newfoundland**

**Anthony Payne**, **Taraneh Abarin\***, **Farrell Cahill**, **Guang Sun** and **J Concepción Loredo-Osti**, Memorial University

11:30

**On the Underlying Assumptions of Threshold Boolean Networks as a Model for Genetic Regulatory Network Behavior**

**Van Tran\***, **Mathew N. McCall**, **Helene McMurray** and **Anthony Almudevar**, University of Rochester Medical Center

11:45

**Evaluation of Illumina Infinium 450K Methylation Chip using Technical Replicates**

**Maitreyee Bose\***, **Weihua Guan**, **Chong Wu**, **James Pankow**, **Ellen Demerath** and **Jan Bressler**, University of Minnesota

12:00

**Leveraging Family History in Genetic Association Studies**

**Arpita Ghosh\***, Public Health Foundation of India  
**Patricia Hartge**, National Cancer Institute, National Institutes of Health  
**Peter Kraft** and **Amit D. Joshi**, Harvard School of Public Health  
**Regina G. Ziegler**, National Cancer Institute, National Institutes of Health  
**Myrto Barrdahl**, German Cancer Research Center  
**Stephen J. Chanock**, **Sholom Wacholder** and **Nilanjan Chatterjee**, National Cancer Institute, National Institutes of Health

\* = Presenter | ■ = Student Award Winner

## 34. CONTRIBUTED PAPERS: NON-LINEAR MODELS

*Grand Ballroom X (3rd Floor)*

**Sponsor:** ENAR

**Chair:** Phebe Brenne Kemmer, Emory University

**10:30**

**Single Index Change Point Model with an Application of Environmental Health Study on Mortality and Temperature**

**Hamdy Mahmoud\*** and **Inyoung Kim**, Virginia Tech  
**Ho Kim**, Seoul National University

**10:45**

**A Model for Extreme Stacking of Data Censored at Endpoints of a Distribution with a Continuous Interior: Illustration with W-shaped Data**

**Robert Gallop\***, **Randall H. Rieger** and **Scott McClintock**,  
West Chester University  
**David C. Atkins**, University of Washington

**11:00**

**Estimating a Dengue Ordinary Differential Equation Model with the Mesh Adaptive Direct Search Method**

**Yu-Ting Weng\***, University of Pittsburgh  
**Shawn T. Brown** and **Nathan Stone**, Pittsburgh  
Supercomputing Center  
**Abdus S. Wahed**, University of Pittsburgh

**11:15**

**Parametric and Nonparametric Spherical Regression**

**Michael M. Rosenthal** ■, **Wei Wu**, **Eric Klassen**  
and **Anuj Srivastava**, Florida State University

**11:30**

**Non-parametric Tests for One-Sided Interaction in Shape Restricted Models**

**Mingyu Xi\***, University of Maryland, Baltimore County

**11:45**

**Sparse Kernel Machine Regression for Ordinal Outcomes**

**Yuanyuan Shen\***, Harvard School of Public Health  
**Katherine Liao**, Brigham and Women's Hospital  
**Tianxi Cai**, Harvard School of Public Health

**12:00**

**Regression Models on Riemannian Symmetric Spaces**

**Emil A. Cornea\***, **Hongtu Zhu** and **Joseph G. Ibrahim**,  
University of North Carolina, Chapel Hill

## 35. CONTRIBUTED PAPERS: SURVIVAL ANALYSIS FOR CLINICAL TRIAL DATA

*Atlantic Room (3rd Floor)*

**Sponsor:** ENAR

**Chair:** Chi Hyun Lee, University of Minnesota

**10:30**

**Sample Size Calculation Based on Efficient Unconditional Tests for Clinical Trials with Historical Controls**

**Guogen Shan\*** and **Sheniz Moonie**,  
University of Nevada, Las Vegas

**10:45**

**Sieve Estimation in a Markov Illness-Death Process Under Dual Censoring**

**Audrey Boruvka\*** and **Richard J. Cook**,  
University of Waterloo

**11:00**

**A Simple Locally Efficient Estimator for Relative Risk in Case-cohort Studies**

**Emmanuel Sampene\*** and **Abdus S. Wahed**,  
University of Pittsburgh

**11:15**

**Generation of Virtual Control Groups for Single Arm Prostate Cancer Adjuvant Trials**

**Zhenyu Jia\***, University of Akron and Northeast Ohio  
Medical University  
**Michael B. Lilly**, Medical University of South Carolina  
**Dan A. Mercola**, University of California, Irvine

**11:30**

**Imbalanced Randomization in Non-inferiority Trials can be Highly Efficient**

**Rick Chappell\***, University of Wisconsin Madison

**11:45**

**Estimating Survival Benefit in Randomized Clinical Trials with Treatment Arm Switching After Disease Progression**

**Shan Kang\*** and **Thomas M. Braun**, University of Michigan

**12:00**

**Semiparametric Proportional Rates Regression for the Composite Endpoint of Recurrent and Terminal Events**

**Lu Mao\*** and **Danyu Lin**, University of North Carolina,  
Chapel Hill

\* = Presenter | ■ = Student Award Winner

## 36. CONTRIBUTED PAPERS: CLUSTERED DATA METHODS

*Bristol Room (3rd Floor)*

**Sponsor:** ENAR

**Chair:** Michael D. Larsen, The George Washington University

**10:30**

**A New Semiparametric Approach to Finite Mixture of Regressions using Penalized Regression via Fusion**

**Erin Austin\***, **Wei Pan** and **Xiaotong Shen**,  
University of Minnesota

**10:45**

**Semi-Parametric Models for Clustered Survival Data with Random Cluster Size**

**Shuling Liu\***, **Amita K. Manatunga** and **Limin Peng**,  
Emory University

**11:00**

**Identification of Biologically Relevant Subtypes via Preweighted Sparse Clustering**

**Sheila Gaynor\***, Harvard University  
**Eric Bair**, University of North Carolina, Chapel Hill

**11:15**

**Estimation Methods for Copula Models for Discrete Clustered and Longitudinal Data**

**N. Rao Chaganty\***, Old Dominion University

**11:30**

**Biclustering via Sparse Clustering**

**Qian Liu** ■, **Guanhua Chen**, **Michael R. Kosorok**  
and **Eric Bair**, University of North Carolina, Chapel Hill

**11:45**

**Composite Likelihood Inference for Multivariate Finite Mixture Models with Application to Flow Cytometry Data**

**Fei Ma\*** and **Ollivier Hyrien**, University of Rochester

**12:00**

**Weighted Quartile Sum Regression for Assessing the Association of Environmental Chemical Mixtures and Oral Health**

**Bhanu M. Evani\*** and **Chris Gennings**,  
Virginia Commonwealth University

## 37. CONTRIBUTED PAPERS: STATISTICAL METHODS FOR LONGITUDINAL DATA

*Chasseur Room (3rd Floor)*

**Sponsor:** ENAR

**Chair:** Chulmin Kim, University of West Georgia

**10:30**

**Sample Size Determination for Longitudinal Binary Response Data based on Testing the Difference in Rate of Change in Log Odds Ratio between Groups**

**Kush Kapur\***, Boston Children's Hospital and Harvard Medical School

**Dulal K. Bhaumik**, University of Illinois, Chicago

**10:45**

**Model Selection of Generalized Estimating Equations with Multiple Imputation and High-dimensional Covariates for Missing Longitudinal Data**

**Ming Wang\***, The Pennsylvania State College of Medicine

**11:00**

**An EM Algorithm for Multilevel Multivariate Mixed Effect Model with Unstructured Error Covariance**

**Yun Ling\*** and **Stewart J. Anderson**,  
University of Pittsburgh

**11:15**

**Regression Methodology for Comparing Longitudinal Rates of Change**

**Matthew W. Bryan\***, University of Pennsylvania  
**Patrick Heagerty**, University of Washington

**11:30**

**Three-step Estimation via Local Polynomial Smoothing for Unevenly Sampled Longitudinal Data**

**Lei Ye\***, **Ada O. Youk**, **Susan M. Sereika** and **Lora E. Burke**,  
University of Pittsburgh

11:45

**The Use of Tight Clustering Techniques for Group-based Trajectory Modeling of Longitudinal Data Accounting for Random Intercepts**

**Ching-Wen Lee\*** and **Lisa A. Weissfeld**, University of Pittsburgh

12:00

**Monotone Spline-based Nonparametric Estimation of Longitudinal Data with Mixture Distribution**

**Wenjing Lu\*** and **Ying Zhang**, University of Iowa

## Monday, March 17

12:15 pm – 1:30 pm

### ROUNDTABLE LUNCHEONS

*Dover Rooms (3rd Floor)*

## Monday, March 17

1:45 pm – 3:30 pm

### 38. RECENT DEVELOPMENTS IN ESTIMATING THE HEALTH EFFECTS OF AIR POLLUTION AND REGULATION

*Grand Ballroom VIII (3rd Floor)*

**Sponsors:** ENAR, ASA Section on Bayesian Statistical Science, Statistics and the Environment

**Organizer:** **Brian Reich**, North Carolina State University

**Chair:** **Brian Reich**, North Carolina State University

1:45

**A Distributed Exposure Time-to-Event Model for Estimating Associations Between Air Pollution and Preterm Birth**

**Howard H. Chang\***, Emory University

**Joshua L. Warren**, University of North Carolina, Chapel Hill

**Lyndsey A. Darrow**, Emory University

**Brian J. Reich**, North Carolina State University

**Lance A. Waller**, Emory University

2:10

**Bayesian Kernel Machine Regression for Estimating the Health Effects of Pollution Mixtures**

**Brent A. Coull\*** and **Jennifer F. Bobb**, Harvard School of Public Health

**Gregory A. Wellenius**, Brown University

**Murray Mittleman**, Beth Israel Deaconess Medical Center

2:35

**Estimating the Health Benefit of Reducing Indoor Air Pollution in a Randomized Environmental Intervention**

**Roger D. Peng\***, **Arlene Butz**, **Amber J. Hackstadt**, **D’Ann L. Williams**, **Gregory B. Diette**, **Patrick N. Breyse** and **Elizabeth C. Matsui**, Johns Hopkins University

3:00

**Influence of Time-varying Air Pollution Exposure on Rate of Change Estimates for Progression of Cardiovascular Disease**

**Lianne Sheppard\*** and **Adel Lee**, University of Washington

3:25

**Floor Discussion**

### 39. RECENT ADVANCES IN CAUSAL INFERENCE

*Grand Ballroom III (3rd Floor)*

**Sponsors:** IMS, ASA Mental Health Statistics Section, ASA Biometrics Section

**Organizer:** **Dylan Small**, University of Pennsylvania

**Chair:** **Dylan Small**, University of Pennsylvania

1:45

**Causal Inference with Social Network Data: Inflated Effective Sample Sizes, Deflated Standard Errors, and Other Perils**

**Elizabeth Ogburn \***, Johns Hopkins University

2:10

**Causal Inference with Continuous Treatments**

**Yeying Zhu\***, University of Waterloo

**Donna L. Coffman** and **Debashis Ghosh**,

The Pennsylvania State University

2:35

**Balancing Covariates via Propensity Score Weighting: A New Perspective**

**Fan Li\***, Duke University

**Alan Zaslavsky**, Harvard Medical School

**Kari Lock Morgan**, Duke University

3:00

**Robust Estimation of Causal Effects of Erythropoiesis-stimulating Agents (ESAs) on Mortality**

**Roe Gutman\*** and **David D. Dore**, Brown University

3:25

**Floor Discussion**

\* = Presenter | ■ = Student Award Winner

## 40. SOCIAL NETWORK DATA: CHALLENGES AND OPPORTUNITIES

*Grand Ballroom II (3rd Floor)*

**Sponsors:** IMS, ASA Statistical Learning and Data Mining Section

**Organizer:** Elizabeth Ogburn, Harvard University

**Chair:** Iván Díaz, Johns Hopkins University

1:45

### What, if Anything, Do We Learn by Fitting an Exponential-family Random Graph Model?

**Cosma Shalizi\*** and **Alessandro Rinaldo**, Carnegie Mellon University

2:10

### Bayesian Inference for Non-Ignorable Sampling in Social Networks

**Simon Lunagomez\*** and **Edoardo M. Airoidi**, Harvard University

2:35

### Targeted Learning of Causal Effects for Networks

**Mark J. van der Laan\***, University of California, Berkeley

3:00

### Diffusion Matters, But How?

**Kevin A. Bryan\***, Northwestern University

3:25

### Floor Discussion

## 41. STATISTICS AND COMPUTING FOR HIGH-THROUGHPUT SEQUENCING DATA

*Grand Ballroom V (3rd Floor)*

**Sponsors:** ENAR, ASA Statistical Learning and Data Mining Section

**Organizer:** Hongkai Ji, Johns Hopkins School of Public Health

**Chair:** Hongkai Ji, Johns Hopkins School of Public Health

1:45

### Computational Challenges in Exome and RNA-Seq Analysis

**Steven L. Salzberg\***, Johns Hopkins University

2:10

### Statistical Modeling of Alternative Splicing with RNA-Seq Data

**Hui Jiang\***, University of Michigan

**Julia Salzman**, Stanford University

**Yang Shi**, University of Michigan

2:35

### Statistical Analysis of Deep Sequencing Data from Tumor Samples

**Lin Hou**, Yale School of Public Health

**Mengjie Chen**, Yale University

**Hongyu Zhao\***, Yale School of Public Health

3:00

### Models and Statistics for Detection of Genome Structural Variation

**Nancy R. Zhang\***, University of Pennsylvania

**David Siegmund**, Stanford University

**Benjamin Yakir**, The Hebrew University

3:25

### Floor Discussion

## 42. VARIABLE SELECTION AND ANALYSIS OF HIGH DIMENSIONAL DATA

*Grand Ballroom I (3rd Floor)*

**Sponsors:** ENAR, ASA Statistical Learning and Data Mining Section

**Organizer:** Lily Wang, University of Georgia

**Chair:** Lily Wang, University of Georgia

1:45

### Regularized Semiparametric Functional Linear Regression

**Helen Zhang\***, University of Arizona

2:10

### Dimension Reduction for Tensor Regression

**Peng Zeng\***, Auburn University

**Wenxuan Zhong**, University of Georgia

2:35

### Sparse Group LASSO for Pathway Based GWAS

**Tatiana V. Apanasovich\***, The George Washington University

3:00

### Floor Discussion

## 43. FUNCTIONAL DATA ANALYSIS AND ITS APPLICATIONS IN GENETICS

*Grand Ballroom VI (3rd Floor)*

**Sponsor:** ENAR

**Organizer:** **Ruzong Fan**, Eunice Kennedy Shriver National Institute of Child Health and Human Development, National Institutes of Health

**Chair:** **Yifan Wang**, National Institutes of Health

**1:45**

### Most Predictive Interval Selection for Functional Predictors, with Application to Classifying Tumor Stages from Mass Spectra

**Andreas Kryger Jensen**, University of Southern Denmark, Odense

**Hans-Georg Müller\***, University of California, Davis

**2:10**

### Restricted Likelihood Ratio Tests for Functional Effects in the Functional Linear Model

**Bruce J. Swihart\***, Johns Hopkins Bloomberg School of Public Health

**Jeff Goldsmith**, Columbia University

**Ciprian M. Crainiceanu**, Johns Hopkins Bloomberg School of Public Health

**2:35**

### Gene-gene Interaction Analysis for Next-generation Sequencing

**Momiao Xiong\***, University of Texas School of Public Health

**Yun Zhu** and **Jinying Zhao**, Tulane University

**3:00**

### Functional Regression Models for Association Analysis of Complex Traits

**Ruzong Fan\***, **Yifan Wang** and **James L. Mills**, Eunice Kennedy Shriver National Institute of Child Health and Human Development, National Institutes of Health

**Alexander F. Wilson** and **Joan E. Bailey-Wilson**, National Human Genome Research Institute, National Institutes of Health

**Momiao Xiong**, University of Texas, Houston

**3:25**

### Floor Discussion

## 44. EMERGING STATISTICAL CHALLENGES WITH COMPLEX LONGITUDINAL OR FUNCTIONAL DATA

*Grand Ballroom IX (3rd Floor)*

**Sponsor:** ENAR, ASA Biometrics Section

**Organizer:** **Lu Wang**, University of Michigan

**Chair:** **Lu Wang**, University of Michigan

**1:45**

### Consistent Estimation of Covariate Effects for Some Between-/Within-Cluster Covariate Decomposition Methods When Data are Missing at Random

**John Neuhaus\*** and **Charles McCulloch**, University of California, San Francisco

**2:10**

### Handling Missing Data for Multiple Waves of Longitudinal Data

**Xuan Bi** and **Annie Qu\***,

University of Illinois, Urbana-Champaign

**2:35**

### A Broad Framework for Joint Modeling and Some Tales from the Unexpected

**Geert Molenberghs\***, I-BioStat, Hasselt Universiteit and Katholieke Universiteit Leuven, Belgium

**Michael G. Kenward**, London School of Hygiene and Tropical Medicine, UK

**Marc Aerts**, Hasselt Universiteit, Belgium

**Geert Verbeke**, Katholieke Universiteit Leuven and Hasselt Universiteit, Belgium

**Anastasios Tsiatis** and **Marie Davidian**, North Carolina State University

**Dimitris Rizopoulos**, Erasmus University, The Netherlands

**3:00**

### Modeling and Estimation Methods for Physical Activity Data

**Haocheng Li** and **Raymond J. Carroll\***, Texas A&M University

**John Staudenmayer**, University of Massachusetts, Amherst

**3:25**

### Floor Discussion

\* = Presenter | ■ = Student Award Winner

## 45. CONTRIBUTED PAPERS: GENOME WIDE ASSOCIATION STUDIES

*Grand Ballroom IV (3rd Floor)*

**Sponsor:** ENAR

**Chair:** Alexandre Bureau, Université Laval

1:45

### Testing Calibration of Risk Models at Extremes of Disease-risk

**Minsun Song\***, National Cancer Institute, National Institutes of Health

**Peter Kraft** and **Amit D. Joshi**, Harvard School of Public Health

**Myrto Barrdahl**, German Cancer Research Center  
**Nilanjan Chatterjee**, National Cancer Institute, National Institutes of Health

2:00

### An Adaptive Genetic Association Test using Double Kernel Machines

**Xiang Zhan\*** and **Debashis Ghosh**, The Pennsylvania State University

2:15

### Multi-Marker Tests for Joint Association in Longitudinal Studies using the Genetic Random Field Model

**Zihuai He\***, **Min Zhang**, **Jennifer Smith**, **Sharon Kardia**, **Ana Diez Roux** and **Seunggeun Lee**, University of Michigan

**Xiuqing Guo** and **Walter Palmas**, Columbia University  
**Bhramar Mukherjee**, University of Michigan

2:30

### More Powerful Genetic Association Testing via a New Statistical Framework for Integrative Genomics

**Sihai D. Zhao\***, **Tony Cai** and **Hongzhe Li**, University of Pennsylvania

2:45

### Principal Component Regression and Linear Mixed Model in Association Analysis of Structured Samples: Competitors or Complements?

**Yiwei Zhang** ■, Novartis Pharmaceuticals  
**Wei Pan**, University of Minnesota

3:00

### A Versatile Omnibus Test for Detecting Mean and Variance Heterogeneity for Quantitative Traits

**Peng Wei\***, **Ying Cao** and **Taylor Maxwell**, University of Texas School of Public Health

3:15

### Flexible and Robust Methods for Rare-variant Testing of Quantitative Traits in Pedigrees

**Yunxuan Jiang\***, **Karen N. Conneely** and **Michael P. Epstein**, Emory University

## 46. CONTRIBUTED PAPERS: APPLICATIONS OF BAYESIAN METHODS

*Atlantic Room (3rd Floor)*

**Sponsor:** ENAR

**Chair:** Jing Zhang, University of Minnesota

1:45

### Semi-parametric Bayesian Clustering of Ophthalmology Data

**Xin Tong\***, University of South Carolina

**Hongmei Zhang**, University of Memphis

2:00

### A Nonparametric Bayesian Latent Factor Model for Body Image Evaluation

**Kassie Fronczyk\***, Rice University

**Michele Guindani**, University of Texas MD Anderson Cancer Center

**Marina Vannucci**, Rice University

2:15

### Bayes Sensitivity Analysis with Fisher-Rao Metric

**Sebastian Kurtek** and **Karthik Bharath\***, The Ohio State University

2:30

### Bayesian Inference on Multiple Proportions for Misclassified Binomial Data

**Dewi Rahardja** and **Haiwen Shi\***, U.S. Food and Drug Administration

2:45

### Longitudinal Mediation Analysis

**Chanmin Kim\*** and **Michael J. Daniels**, University of Texas, Austin

**Jason A. Roy**, University of Pennsylvania

**Beth H. Marcus**, University of California, San Diego

3:00

### Estimation of Contact Network Properties using Multiple HIV Epidemic Data Sources

**Ravi Goyal\*** and **Nicole B. Carnegie**, Harvard University

3:15

### Bayesian Variable Selection for a Regression Model with a Misclassified Binary Covariate

**Daniel P. Beavers\***, Wake Forest School of Medicine

**James D. Stamey**, Baylor University

## 47. CONTRIBUTED PAPERS: HIGH DIMENSIONAL DATA

*Grand Ballroom VII (3rd Floor)*

**Sponsor:** ENAR

**Chair:** Yuval Benjamini, Stanford University

1:45

### Inference for Survival Prediction in the High Dimensional Setting

Jennifer A. Sinnott\* and Tianxi Cai, Harvard University

2:00

### Testing High-dimensional Nonparametric Function with Application to Gene Set Analysis

Tao He\*, Ping-Shou Zhong, Yuehua Cui and Vidyadhar Mandrekar, Michigan State University

2:15

### Variable Selection and Inference for Ultra-High Dimensional Survival Data With Missing Covariates Under Proportional Hazards Models

Yang Ning\* and Grace Yi, University of Waterloo  
Baojiang Chen, University of Nebraska  
Nancy Reid, University of Toronto

2:30

### An EM Test for the Contaminated Chi-Square Model

Feng Zhou\*, University of Kentucky  
Hongying Dai, Children's Mercy Hospital  
Richard Charnigo, University of Kentucky

2:45

### Biostatistical Matrix Time Series Models

Seyed Yaser Samadi\* and Lynne Billard, University of Georgia

3:00

### Supervised Singular Value Decomposition and Its Asymptotic Properties

Gen Li ■ and Haipeng Shen, University of North Carolina, Chapel Hill  
Dan Yang, Rutgers, The State University of New Jersey  
Andrew Nobel, University of North Carolina, Chapel Hill

3:15

### brainR: Interactive 3 and 4d Images of High Resolution Neuroimage Data

John Muschelli\*, Elizabeth M. Sweeney and Ciprian M. Crainiceanu, Johns Hopkins Bloomberg School of Public Health

## 48. CONTRIBUTED PAPERS: CLINICAL TRIALS

*Bristol Room (3rd Floor)*

**Sponsor:** ENAR

**Chair:** Ashutosh Ranjan, University of Alabama, Birmingham

1:45

### Outcome-adaptive Allocation with Natural Lead-in for Three-group Trials with Binary Outcomes

Ghalib A. Bello\* and Roy T. Sabo, Virginia Commonwealth University

2:00

### Trial Design and Analysis Challenges When Studying Therapies Designed to Control Growth of Brain Metastases in Cancer Patients

Sujata M. Patil\*, Memorial Sloan-Kettering Cancer Center

2:15

### Understanding Inconsistencies Between Replicate Trials: Insomnia Case Study

Richard Entsuah, Kenneth Liu\*, Junshui Ma, Duane Snavelly and Ellen Snyder, Merck

2:30

### Sample Size Determination for a Three-arm Equivalence Trial of Normally Distributed Responses

Yu-Wei Chang\*, Temple University  
Yi Tsong and Xiaoyu Dong, U.S. Food and Drug Administration  
Zhigen Zhao, Temple University

2:45

### The Utility of Bayesian Predictive Probabilities for Interim Monitoring of Clinical Trials

Benjamin R. Saville\*, Vanderbilt University School of Medicine  
Jason Connor, Berry Consultants  
Gregory Ayers and JoAnn Alvarez, Vanderbilt University School of Medicine

3:00

### Evaluation of Bias for Outcome Response Adaptive Randomization Designs

Yaping Wang\*, University of Texas MD Anderson Cancer Center and University of Texas School of Public Health  
Hongjian Zhu, University of Texas School of Public Health  
J. Jack Lee, University of Texas MD Anderson Cancer Center

3:15

### Analysis of the Anticipated Power of a Test: Browne (1995) Revisited

Paul W. Stewart\*, University of North Carolina, Chapel Hill

\* = Presenter | ■ = Student Award Winner

## 49. CONTRIBUTED PAPERS: PERSONALIZED MEDICINE AND VARIABLE SUBSET SELECTION

*Grand Ballroom X (3rd Floor)*

**Sponsor:** ENAR

**Chair:** Na Zhang, North Carolina State University

**1:45**

### Multivariate Markov Models for the Conditional Probability of Toxicity in Phase II Trials

Laura L. Fernandes\*, Susan Murray and Jeremy MG Taylor, University of Michigan

**2:00**

### Latent Supervised Learning for Estimating Treatment Effect Heterogeneity

Susan Wei\* and Michael R. Kosorok, University of North Carolina, Chapel Hill

**2:15**

### Personalized Selection of Radiation Therapy Dose using Statistical Models for Toxicity and Efficacy with Dose and Biomarkers as Covariates

Matthew Schipper\* and Jeremy MG Taylor, University of Michigan

Feng-Ming Kong, Georgia Regents University

Randy TenHaken and Martha Matuzak, University of Michigan

**2:30**

### Simultaneous Inference for Assessing the Effects of a SNP on Treatment Efficacy in Personalized Medicine

Ying Ding\*, University of Pittsburgh

Grace Li and Stephen J. Ruberg, Eli Lilly and Company

Jason C. Hsu, Eli Lilly and Company and The Ohio State University

**2:45**

### Consistent Variable Selection for Quantile Regression with Varying Covariate Effects

Qi Zheng\* and Limin Peng, Emory University

**3:00**

### Consistent Bi-level Variable Selection via Composite Group Bridge Regression

Indu Seetharaman, Kansas State University

Kun Chen\*, University of Connecticut

**3:15**

### Penalized Regression for Interval-Censored Times of Disease Progression: Selection of HLA Markers in Psoriatic Arthritis

Ying Wu\* and Richard Cook, University of Waterloo

## 50. CONTRIBUTED PAPERS: ANALYSIS OF CLUSTERED DATA

*Chasseur Room (3rd Floor)*

**Sponsor:** ENAR

**Chair:** Jacek Urbanek, Indiana University Fairbanks School of Public Health

**1:45**

### Statistical Methods for Assessing Perception in Children with Cochlear Implants

Michael D. Larsen\* and Cynthia Core, The George Washington University

Janean Wilson, Children's National Medical Center

James Mahshie, The George Washington University

**2:00**

### Identify Common Clusters in Independent Populations with Application to Psychiatry

Yun Zhang\*, Kehui Chen, Allan Sampson and David Volk, University of Pittsburgh

2:15

**Generalized Estimating Equation in Analyzing Group-Randomized Trials with Limited Number of Groups**

**Peng Li\*** and **David T. Redden**, University of Alabama, Birmingham

2:30

**Accounting for Covariates in Differential Methylation Analysis with Next-generation Sequencing**

**Hongyan Xu\***, Georgia Regents University  
**Robert Podolsky**, Wayne State University  
**Duchwan Ryu** and **Varghese George**, Georgia Regents University

2:45

**Evaluating Predictors of Individual Dietary Intake Latent Values under Different Mixed Models**

**Shuli Yu\*** and **Edward J. Stanek III**, University of Massachusetts, Amherst

3:00

**A Markov Mixture Model for Longitudinal Course of Youth Bipolar Disorder**

**Jieyu Fan\***, **Satish Iyengar** and **Boris Birmaher**, University of Pittsburgh  
**Adriana Lopez**, Carnegie Mellon University, Qatar  
**Rasim S. Diler**, University of Pittsburgh  
**David Axelson**, The Ohio State University  
**Benjamin Goldstein**, University of Toronto  
**Tina Goldstein**, University of Pittsburgh  
**Fangzi Liao** and **Mary K. Gill**, Western Psychiatric Institute and Clinic

3:15

**Longitudinal Multivariate Outcome Data from Couples: Application to HPV Transmission Couple Studies**

**Xiangrong Kong\***, Johns Hopkins University Bloomberg School of Public Health

# Monday, March 17

## Refreshment Break with Our Exhibitors

*Grand Ballroom Foyer (3rd Floor)*

# Monday, March 17

3:45 pm – 5:30 pm

## 51. THE ROLE OF STATISTICS IN SHAPING PUBLIC POLICY

*Grand Ballroom II (3rd Floor)*

**Sponsors:** ENAR, ASA Government Statistics Section

**Organizer:** **Hernando Ombao**, University of California at Irvine

**Chair:** **Hernando Ombao**, University of California at Irvine

3:45

### Statisticians: Guardians of Democracy!

**Roderick J. Little\***, University of Michigan

4:30

### Big Statistics, Major Policies, and... a Little Politics

**Sally C. Morton\***, University of Pittsburgh

5:15

### Floor Discussion

## 52. PANEL DISCUSSION: HAVING IT ALL: WEIGHTING TO ACHIEVE BALANCE

*Grand Ballroom V (3rd Floor)*

**Sponsor:** ENAR

**Organizers:** **Shari Messinger**, University of Miami and **Leslie McClure**, University of Alabama, Birmingham

**Chairs:** **Shari Messinger**, University of Miami and **Leslie McClure**, University of Alabama at Birmingham

3:45

**Thomas M. Braun**, University of Michigan  
**Mary D. Sammel**, University of Pennsylvania  
**Telba Z. Irony**, U.S. Food and Drug Administration  
**Aarti Shah**, Eli Lilly & Company  
**Francesca Dominici**, Harvard School of Public Health

5:15

### Floor Discussion

\* = Presenter | ■ = Student Award Winner

## 53. BIOSTATISTICAL METHODS FOR INTEGRATIVE GENOMICS

*Grand Ballroom VI (3rd Floor)*

**Sponsor:** ENAR

**Organizer:** **Wei Sun**, University North Carolina, Chapel Hill

**Chair:** **Wei Sun**, University North Carolina, Chapel Hill

3:45

**A Brief Overview of Modelling Approaches in Integrative Genomics, with Special Reference to eQTL Analyses**

**Sylvia T. Richardson\***, Cambridge Institute of Public Health

4:25

**Information Integrative Framework for Sparse K-means to Combine multi-Cohort and Multi-omics Data**

**Zhiguang Huo**, **Sunghwan Kim** and **George C. Tseng\***, University of Pittsburgh

4:45

**EgoNet: Identification of Disease Ego-network Modules**

**Rendong Yang**, **Zhaohui S. Qin** and **Tianwei Yu\***, Emory University

5:05

**Extensions to Hidden Markov Models and Their Application to Integrated Analysis of Multiple Chromatin Immunoprecipitation Data**

**Hyung Won Choi**, National University of Singapore  
**Damian Famian** and **Alexey Nesvizhskii**, University of Michigan

**Debashis Ghosh**, The Pennsylvania State University  
**Zhaohui S. Qin\***, Emory University

5:25

Floor Discussion

## 54. SAFETY SURVEILLANCE MONITORING THROUGH SIGNAL DETECTION

*Grand Ballroom I (3rd Floor)*

**Sponsors:** ENAR, ASA Biopharmaceutical Section

**Organizer:** **Theodore Lystig**, Medtronic, Inc.

**Chair:** **Laura Hatfield**, Harvard Medical School

3:45

**Methodological Challenges for Sequential Medical Product Safety Surveillance using Observational Healthcare Data**

**Andrea J. Cook\*** and **Jennifer C. Nelson**, Group Health Research Institute

4:10

**Graphical Approaches for Disproportionality Analysis of Spontaneously-Reported Adverse Events in Pharmacovigilance**

**Richard C. Zink\***, JMP Life Sciences at SAS Institute, Inc.

4:35

**Likelihood Ratio Tests for Active Surveillance**

**Ram C. Tiwari\***, U.S. Food and Drug Administration

5:00

**Discussion of Safety Surveillance Monitoring Through Signal Detection**

**Theodore Lystig\***, Medtronic, Inc.

5:25

Floor Discussion

## 55. MULTIPLE TESTING AND SIMULTANEOUS INFERENCE IN COMPLEX SETTINGS

*Grand Ballroom III (3rd Floor)*

**Sponsors:** ENAR, ASA Statistical Learning and Data Mining Section, ASA Biopharmaceutical Section

**Organizer:** **Yi-Hui Zhou**, North Carolina State University

**Chair:** **Yi-Hui Zhou**, North Carolina State University

3:45

**False Discovery Rate Control and Group Testing for Complex Omics Data**

**Andrew B. Nobel\*** and **Gen Li**, University of North Carolina, Chapel Hill

**Andrey Shabalyn**, Virginia Commonwealth University

**Ivan Rusyn**, University of North Carolina, Chapel Hill

**Fred A. Wright**, North Carolina State University

4:10

**Another Look at Robust PC-based Stratification Control for Multiple Testing**

**Yi-Hui Zhou\***, North Carolina State University

4:35

**Simultaneous Inference of Multiple Rare Variants: Design, Power and Interpretation of Findings**

**Andriy Derkach**, University of Toronto

**Jerry F. Lawless**, University of Waterloo

**Lei Sun\***, University of Toronto

5:00

**Extending the Projack to Complex Settings**

**Fred A. Wright\*** and **Yi-Hui Zhou**, North Carolina State University

5:25

Floor Discussion

## 56. NEW DEVELOPMENTS IN BAYESIAN NONPARAMETRICS

*Grand Ballroom IX (3rd Floor)*

**Sponsors:** IMS, ASA Section on Bayesian Statistical Science

**Organizer:** Jian Kang, Emory University School of Public Health

**Chair:** Jian Kang, Emory University School of Public Health

3:45

### Scalable Bayesian ASA Section on Nonparametric Statistics

David B. Dunson\*, Duke University

4:10

### Bayesian Models of Structured Sparsity for Discovery of Regulatory Genetic Variants

Ryan P. Adams\*, Harvard University  
Barbara Engelhardt, Duke University

4:35

### Bayesian Nonparametric Inference of Population Admixtures

Maria De Iorio\*, University College London  
Stefano Favaro, Università degli Studi di Torino  
Yee Whye Teh, University of Oxford  
Lloyd Elliott, University College London

5:00

### Pre-surgical Assessment of Peritumoral Brain Activation Via a Bayesian Non-parametric Potts Model

Timothy D. Johnson\*, University of Michigan

5:25

### Floor Discussion

## 57. CONTRIBUTED PAPERS: STATISTICAL GENETICS AND GENOMICS

*Grand Ballroom VIII (3rd Floor)*

**Sponsor:** ENAR

**Chair:** Sihai Dave Zhao, University of Pennsylvania

3:45

### Sparse Multivariate Factor Analysis Regression Models and Its Applications to Integrative Genomics Analysis

Yan Zhou\* and Peter Song, University of Michigan  
Pei Wang, Fred Hutchinson Cancer Research Center  
Ji Zhu, University of Michigan

4:00

### A General Statistical Framework for Transcript Assemblies

Alyssa Frazee\*, Geo Pertea, Steven Salzberg and Jeff Leek, Johns Hopkins University

4:15

### Nonparametric Test for Differential Binding Analysis with ChIP-Seq Data

Qian Wu\*, Kyoung-Jae Won and Hongzhe Li, University of Pennsylvania

4:30

### A Statistical Framework for Expression QTL Mapping via Two-way Mixture Model

Ningtao Wang\*, Yaqun Wang, Bruce Lindsay and Rongling Wu, The Pennsylvania State University

4:45

### SVM with Bootstrap for Soft Clustering of Populations

Matey Neykov\*, Harvard University

5:00

### Functional Principal Component Analysis for Next Generation Sequencing

Lieven Clement\*, Ghent University

5:15

### The Generalized Higher Criticism for Testing SNP-sets in Genetic Association Testing

Ian J. Barnett ■ and Xihong Lin, Harvard University

## 58. CONTRIBUTED PAPERS: IMAGING

*Grand Ballroom IV (3rd Floor)*

**Sponsor:** ENAR

**Chair:** Sheng Luo, University of Texas Health Science Center at Houston

3:45

### Modeling Covariate Effects in Group Independent Component Analysis with Applications to Functional Magnetic Resonance Imaging

Ran Shi\* and Ying Guo, Emory University

4:00

### Quantile Mapping for Multi-modal Imaging Data

Huaihou Chen\*, Philip T. Reiss, Clare Kelly and Xavier F. Castellanos, New York University School of Medicine

4:15

### Latent Variable Models for Longitudinal MR Imaging Data with Multiple Outcomes

Xiao Wu\*, University of Florida  
Michael J. Daniels, University of Texas, Austin

### 4:30 A Novel Brain Connectivity Network Model: Build Bridges Between Network Communities

Shuo Chen\*, University of Maryland, College Park

\* = Presenter | ■ = Student Award Winner

**4:45**  
**A Bayesian Model for Brain Activation and Connectivity**  
**Zhe Yu\*** and **Hernando Ombao**, University of California, Irvine  
**Raquel Prado**, University of California, Santa Cruz  
**Erin Burke** and **Steve Cramer**, University of California, Irvine

**5:00**  
**Pre-Surgical fMRI Data Analysis using a Spatially Adaptive Conditional Autoregressive Model**  
**Zhuqing Liu\***, **Veronica J. Berrocal** and **Timothy D. Johnson**, University of Michigan

**5:15**  
**Spatial and Temporal Pattern in the Brain Accounting Cognitive Changes After Mild Traumatic Brain Injury**  
**Namhee Kim\***, **Craig A. Branch** and **Michael L. Lipton**, Albert Einstein College of Medicine

## 59. CONTRIBUTED PAPERS: SEMI-PARAMETRIC AND NON-PARAMETRIC MODELS IN SURVIVAL ANALYSIS

*Grand Ballroom VII (3rd Floor)*

**Sponsor:** ENAR

**Chair:** **Tian Dai**, Emory University

**3:45**  
**Semiparametric Bayes Estimation of Gap-Time Distribution with Correlated Recurrent Event Data**  
**AKM F. Rahman\*** and **Edsel A. Pena**, University of South Carolina, Columbia

**4:00**  
**Quantile Regression Models for Current Status Data**  
**Fang-Shu Ou** ■, **Donglin Zeng** and **Jianwen Cai**, University of North Carolina, Chapel Hill

**4:15**  
**Competing Risks Regression Under Random Signs Censoring**  
**Jonathan Yabes\*** and **Joyce Chang**, University of Pittsburgh

**4:30**  
**Regression Analysis of Informatively Interval-censored Failure Time Data with Cox Model**  
**Ling Ma\***, University of Missouri, Columbia  
**Tao Hu**, Capital Normal University, China  
**Jianguo Sun**, University of Missouri, Columbia

**4:45**  
**Floor Discussions**

**5:00**  
**Weighted Estimation of the Accelerated Failure Time Model in the Presence of Dependent Censoring**  
**Youngjoo Cho\*** and **Debashis Ghosh**, The Pennsylvania State University

**5:15**  
**Model Assisted Cox Regression**  
**Shoubhik Mondal\*** and **Sundarraman Subramanian**, New Jersey Institute of Technology

## 60. CONTRIBUTED PAPERS: HIERARCHICAL MODELS

*Atlantic Room (3rd Floor)*

**Sponsor:** ENAR

**Chair:** **Michelle Ross**, University of Pennsylvania

**3:45**  
**Examining the Spatio-temporal Trend Between Alcohol Outlets and Violence using Integrated Nested Laplace Approximations**  
**Loni P. Tabb\***, Drexel University  
**Tony H. Grubestic**, Oregon State University

**4:00**  
**The Role of Prior Effective Sample Size in the Design of Bayesian Medical Device Studies**  
**Gene A. Pennello** and **Laura Thompson\***, U.S. Food and Drug Administration

**4:15**  
**A Hybrid Bayesian Hierarchical Model Combining Cohort and Case-control Studies for Meta-analysis of Diagnostic Tests: Accounting for Disease Prevalence and Partial Verification Bias**  
**Xiaoye Ma\***, University of Minnesota  
**Yong Chen**, University of Texas  
**Stephen Cole**, University of North Carolina, Chapel Hill  
**Haitao Chu**, University of Minnesota

**4:30**  
**Group Comparison of Pulsatile Hormone Times Series**  
**TingTing Lu\*** and **Timothy D. Johnson**, University of Michigan

**4:45**  
**Population Size Estimation with Inactive Lists: Hierarchical Mixture Models and Missing Data with Application to Armed Conflict Data**  
**Shira Mitchell\*** and **Al Ozonoff**, Harvard University  
**Kristian Lum**, Virginia Polytechnic Institute and State University  
**Alan M. Zaslavsky** and **Brent A. Coull**, Harvard University

**5:00**  
**Bayesian Hierarchical Joint Modeling of Repeatedly Measured Continuous and Ordinal Markers of Disease Severity**  
**Olive D. Buhule\***, **Abdus S. Wahed** and **Ada O. Youk**,  
University of Pittsburgh

**5:15**  
**Hierarchical Nearest-Neighbor Gaussian Process Models for Massive Geostatistical Datasets**  
**Abhirup Datta\*** and **Sudipto Banerjee**, University of Minnesota  
**Andrew O. Finley**, Michigan State University

## 61. CONTRIBUTED PAPERS: METHODS FOR REMOVING SELECTION BIAS AND CONFOUNDING

*Grand Ballroom X (3rd Floor)*

**Sponsor:** ENAR

**Chair:** **Yenny Webb-Vargas**,  
Johns Hopkins Bloomberg School of Public Health

**3:45**  
**Stable Weights that Balance Covariates for Causal Inference and Estimation with Incomplete Data**  
**Jose Zubizarreta** ■, Columbia University

**4:00**  
**Matching using Propensity Score Methods for Time-varying Treatments**  
**Pallavi S. Mishra-Kalyani\***, **Brent A. Johnson** and **Qi Long**, Emory University

**4:15**  
**Estimating Causal Effects in an Observational Study with a Survival Time Endpoint**  
**Jaeun Choi\*** and **Mary Beth Landrum**,  
Harvard Medical School  
**A. James O'Malley**, Dartmouth College  
**Bruce Landon**, Harvard Medical School

**4:30**  
**Weighting to Strengthen an Instrumental Variable**  
**Doug Lehmann\***, **Yun Li** and **Yi Li**, University of Michigan

**4:45**  
**Propensity Score Bin Bootstrapping Method in Estimation of Cost-Effectiveness**  
**Zugui Zhang\***, **Paul Kolm** and **William S. Weintraub**,  
Christiana Care Health System

**5:00**  
**Maximum Likelihood Adjustment for Mis-measured Exposure using External Validation Data and Propensity Scores**  
**Danielle Braun\***, Harvard School of Public Health and Dana-Farber Cancer Institute  
**Malka Gorfine**, Israel Institute of Technology  
**Corwin Zigler** and **Francesca Dominici**, Harvard School of Public Health  
**Giovanni Parmigiani**, Harvard School of Public Health and Dana-Farber Cancer Institute

**5:15**  
**Examination of Statistical Power in a Propensity Score Analysis Approach**  
**Falynn C. Turley\*** and **David Redden**, University of Alabama, Birmingham

## 62. CONTRIBUTED PAPERS: FUNCTIONAL DATA ANALYSIS

*Bristol Room (3rd Floor)*

**Sponsor:** ENAR

**Chair:** **Guanqun Cao**, Auburn University

**3:45**  
**Structured Functional Principal Component Analysis**  
**Haochang Shou\***, **Vadim Zipunnikov** and **Ciprian M. Crainiceanu**, Johns Hopkins Bloomberg School of Public Health  
**Sonja Greven**, Ludwig-Maximilians-Universitat, Germany

**4:00**  
**A Robust Approach for Functional Linear Regression Model**  
**Yihong Zhao\***, New York University Medical Center  
**R. Todd Ogden**, Columbia University Medical Center  
**Huaihou Chen**, New York University Medical Center

**4:15**  
**Nonlinear Functional Regression Models with Application to Copy Number Data**  
**Adrian Coles\*** and **Arnab Maity**, North Carolina State University  
**Ganiraju Manyam** and **Veerabhadran Baladandayuthapani**, University of Texas MD Anderson Cancer Center

**4:30**  
**Generalized Functional Linear Models for Case-Control Association Studies**  
**Ruzong Fan**, **Yifan Wang\*** and **James L. Mills**, Eunice Kennedy Shriver National Institute of Child Health and Human Development, National Institutes of Health  
**Iryna Lobach**, University of California, San Francisco  
**Momiao Xiong**, University of Texas, Houston

\* = Presenter | ■ = Student Award Winner

4:45

**Wavelet-based Function-on-Function Mixed Models**

**Mark J. Meyer\*** and **Brent A. Coull**, Harvard University  
**Francesco Versace** and **Jeffrey S. Morris**, University of Texas MD Anderson Cancer Center

5:00

**A Computational Framework for Genetic Mapping of Heterochrony**

**Han Hao\***, **Ningtao Wang** and **Yaqun Wang**, The Pennsylvania State University  
**Jianxin Wang** and **Zhong Wang**, Beijing Forestry University  
**Rongling Wu**, The Pennsylvania State University

**63. CONTRIBUTED PAPERS: RECENT ADVANCES IN BAYESIAN METHODS**

*Chasseur Room (3rd Floor)*

**Sponsor:** ENAR

**Chair:** **Karthik Bharath**, The Ohio State University

3:45

**Incorporating Spatial Dependence into Bayesian Multiple Testing of Statistical Parametric Maps in Functional Neuroimaging**

**Andrew Brown\***, Clemson University  
**Nicole A. Lazar** and **Gauri S. Datta**, University of Georgia  
**Woncheol Jang**, Seoul National University  
**Jennifer E. McDowell**, University of Georgia

4:00

**Multivariate Bayesian Censored Models for Predicting Exposure to Multiple Chemical Agents**

**Caroline Groth\***, **Sudipto Banerjee**, **Tran Huynh** and **Gurumurthy Ramachandran**, University of Minnesota  
**Richard Kwok**, National Institute of Environmental Health Sciences, National Institutes of Health  
**Mark Stenzel**, Exposure Assessment Applications, LLC  
**Patricia Stewart**, Stewart Exposure Assessments, LLC

4:15

**Methods in Functional Data Analysis for Curve Comparison in Spectroscopic Protein Unfolding Data: Applications using Bayesian Inferential Methods**

**Miranda L. Lynch\***, University of Connecticut Health Center

4:30

**Bayesian Variable Selection for High Dimensional Datasets in the Presence of Error-prone Time-to-event Outcomes**

**Xiangdong Gu\*** and **Raji Balasubramanian**, University of Massachusetts, Amherst

4:45

**Cortical Thickness Thinning and Cognitive Impairment in Parkinson’s Disease Without Dementia**

**Lijun Zhang\***, **Ming Wang**, **Nicholas Sterling**, **EunYoung Lee**, **Guangwei Du**, **Mechelle Lewis** and **Xuemei Huang**, The Pennsylvania State University, Milton S. Hershey Medical Center

5:00

**Bayesian Modeling of Mixed Outcome Types using Random Effect**

**Hua Wei\***, Eli Lilly and Company

5:15

**An Objective Stepwise Bayes Approach to Small Area Estimation**

**Yanping Qu\***, U.S. Food and Drug Administration  
**Glen D. Meeden**, University of Minnesota

**Tuesday, March 18**

8:30 am – 10:15 am

**64. STATISTICAL LEARNING FOR COMPLEX MULTIVARIATE BIOMEDICAL DATA**

*Grand Ballroom VIII (3rd Floor)*

**Sponsors:** ENAR, ASA Mental Health Statistics Section, ASA Statistical Learning and Data Mining Section

**Organizer:** **Huaihou Chen**, New York University

**Chair:** **Huaihou Chen**, New York University

8:30

**Linear Conditioning for Clustering Functional Data**

**Thaddeus Tarpey\***, Wright State University

8:55

**Multiple Kernel Statistical Learning to Combine Heterogeneous Data Sources for Prediction**

**Tianle Chen**, Columbia University  
**Donglin Zeng**, University of North Carolina, Chapel Hill  
**Yuanjia Wang\***, Columbia University

9:20

**Margin-based Learning of Minimum Clinically Important Difference**

**Tu Xu** and **Samad Hedayat**, University of Illinois, Chicago  
**Junhui Wang\***, City University of Hong Kong

9:45

**Dynamic Directional Model for Effective Brain Connectivity using Electrocorticographic (ECoG) Time Series**

**Tingting Zhang\*** and **Jingwei Wu**, University of Virginia  
**Fan Li**, Duke University  
**Dana Boatman-Reich** and **Brian Caffo**, Johns Hopkins University

10:10

**Floor Discussion**

**65. STATISTICAL CHALLENGES IN STUDIES OF ENVIRONMENTAL, REPRODUCTIVE AND PERINATAL HEALTH**

*Harborside Room A (4th Floor)*

**Sponsors:** ENAR, ASA Section on Statistics and the Environment

**Organizer:** **Kirsten Lum**, Eunice Kennedy Shriver National Institute of Child Health and Human Development, National Institutes of Health

**Chair:** **Kirsten Lum**, Eunice Kennedy Shriver National Institute of Child Health and Human Development, National Institutes of Health

8:30

**The Current Duration Approach to Estimating Time to Pregnancy**

**Niels Keiding\***, University of Copenhagen, Denmark

8:55

**Prediction of Fecundity Based on Joint Modeling of Multiple Time Scale Longitudinal Intercourse and Menstrual Cycle Characteristics**

**Rajeshwari Sundaram\***, Eunice Kennedy Shriver National Institute of Child Health and Human Development, National Institutes of Health

9:20

**Air Pollution Metric Analysis while Determining Susceptible Periods of Pregnancy for Low Birth Weight and Birth Defects**

**Montse Fuentes\***, North Carolina State University  
**Joshua L. Warren** and **Amy H. Herring**, University of North Carolina, Chapel Hill  
**Peter H. Langlois**, Texas Department of State Health Services, Austin

9:45

**Identifying “Bad Actors” in Mixtures of Prenatal Exposures Associated with Reproductive Health using Weighted Quantile Sum Regression**

**Chris Gennings\***, Virginia Commonwealth University  
**Caroline K. Carrico**, Health Diagnostics Laboratory

10:10

**Floor Discussion**

\* = Presenter | ■ = Student Award Winner

**66. NEW DEVELOPMENTS IN STATISTICAL METHODOLOGIES FOR THE ANALYSIS OF DISEASE DATA**

*Grand Ballroom II (3rd Floor)*

**Sponsor:** ENAR

**Organizer:** **Sujay Datta**, University of Akron

**Chair:** **Sujay Datta**, University of Akron

8:30

**Making the Cut: Improved Ranking and Selection in Large-scale Inference**

**Nicholas Henderson** and **Michael A. Newton\***, University of Wisconsin, Madison

8:55

**Generation of Virtual Control Groups for Single Arm Prostate Cancer Adjuvant Trials**

**Zhenyu Jia\***, University of Akron and Northeast Ohio Medical University  
**Michael B. Lilly**, Medical University of South Carolina  
**Dan A. Mercola**, University of California, Irvine

9:20

**Differential Network Analysis using Microarray Gene Expression Data**

**Susmita Datta\***, University of Louisville

9:45

**Fused Lasso with the Adaptation of Parameter Ordering (FLAPO) in Meta Analysis of Repeated Measurements**

**Fei Wang**, Ford Motor Credit  
**Lu Wang** and **Peter XK Song\***, University of Michigan

10:10

**Floor Discussion**

**67. RECENT DEVELOPMENT AND APPLICATION OF BAYESIAN METHODS FOR THE PROBABILITY OF SUCCESS AND DECISION MAKING IN CLINICAL TRIALS**

*Harborside Room B (4th Floor)*

**Sponsors:** ENAR, ASA Section on Bayesian Statistical Science, ASA Biopharmaceutical Section

**Organizer:** **Ming-Hui Chen**, University of Connecticut

**Chair:** **Mani Y. Lakshminarayanan**, Pfizer Inc.

8:30

**Using Prior Information to Help Determine Appropriate Metrics for Sound Decision Making in Drug Development**

**Christy Chuang-Stein\***, Pfizer Inc.

**8:55**  
**Average Power and Average Conditional Power in Clinical Trial Design and Interim Analysis**  
**Kuang-Kuo G. Lan\***, Janssen R&D, Johnson & Johnson

**9:20**  
**Bayesian Probability of Success for Superiority Trials in the Presence of Historical Data**  
**Joseph G. Ibrahim\***, University of North Carolina, Chapel Hill  
**Ming-Hui Chen**, University of Connecticut  
**Mani Y. Lakshminarayanan, Guanghan Liu, Joseph F. Heyse**, Merck, Inc.

**9:45**  
**Evaluating Regression-to-the-Mean of Treatment Effect from Phase 2 to Phase 3**  
**Jianliang Zhang\***, MedImmune, LLC

**10:10**  
**Floor Discussion**

## **68. FUNCTIONAL DATA ANALYSIS: SHOW ME THE DATA**

*Grand Ballroom III (3rd Floor)*

**Sponsors:** IMS, ASA Biometrics Section, ASA Section on Nonparametric Statistics

**Organizer:** Ciprian Crainiceanu, Johns Hopkins University

**Chair:** Jaroslaw Harezlak, Indiana University School of Medicine

**8:30**  
**CSI Statistics: Functional Data Analysis for Dead Bodies**  
**John Aston\***, University of Cambridge and University of Warwick  
**Anjali Mazumder**, University of Warwick  
**Anna Zylbersztejn**, University of Warwick and University of Leicester

**8:55**  
**Surviving in the ICU: The Case for Uneven Support Functional Data Analysis**  
**Ciprian Crainiceanu\*** and **Jonathan Gellar**, Johns Hopkins University

**9:20**  
**Studying the Relationship Between Cerebral Vessel Morphology and Hemodynamic Forces in Arteries Affected by Aneurysms: A Spatial Functional Data Analysis Approach**  
**Laura M. Sangalli\***, Laboratory for Modeling and Scientific Computing MOX, Italy  
**Bree Ettinger**, Emory University  
**Simona Perotto**, Laboratory for Modeling and Scientific Computing MOX, Italy

**9:45**  
**Functional Prediction of Traffic Streams**  
**Jeng-Min Chiou\***, Academia Sinica

**10:10**  
**Floor Discussion**

## **69. LATENT CLASS MODELS FOR DIAGNOSTIC TESTING WITH APPLICATIONS IN PSYCHIATRY**

*Grand Ballroom IV (3rd Floor)*

**Sponsor:** ENAR

**Organizer:** Jeffrey Douglas, University of Illinois, Urbana-Champaign

**Chair:** Jeffrey Douglas, University of Illinois, Urbana-Champaign

**8:30**  
**Theory and Applications of the Self-learning Q-matrix**  
**Jingchen Liu\***, Columbia University

**8:55**  
**Making Computerized Adaptive Testing a Diagnostic Tool**  
**Hua-Hua Chang\***, University of Illinois, Urbana-Champaign  
**Ya-Hui Su**, National Chung Cheng University

**9:20**  
**Heterogeneous Variance Classification Models for Psychiatric Assessment Survey Data**  
**Jonathan Templin\***, University of Kansas  
**Lesia Hoffman, Ryan Walters** and **Meghan Sullivan**, University of Nebraska, Lincoln

**9:45**  
**Use of Latent Product Lattice Classification Models for Self-reported Measures of Depression**  
**Curtis Tatsuoaka\***, Case Western Reserve University

**10:10**  
**Floor Discussion**

## **70. STATISTICAL METHODS FOR BIOMARKER EVALUATION**

*Grand Ballroom I (3rd Floor)*

**Sponsor:** ENAR

**Organizer:** Shanshan Li, Indiana University, Fairbanks School of Public Health

**Chair:** Mei-Cheng Wang, Johns Hopkins Bloomberg School of Public Health

**8:30**  
**Semi-parametric ROC Analysis using Accelerated Regression Models**  
**Eunhee Kim\***, Brown University  
**Donglin Zeng**, University of North Carolina, Chapel Hill

**8:55**  
**Nonparametric ROC Based Evaluation for Survival Outcomes**  
Xiao Song\*, University of Georgia  
Xiao-Hua Zhou, Puget Sound Health Care System and University of Washington  
Shuangge Ma, Yale University

**9:20**  
**A Generalized C-index for Survival Data**  
Patrick J. Heagerty\*, University of Washington

**9:45**  
**Estimating Time-Dependent ROC Curve using Data Under Outcome-Dependent Sampling**  
Shanshan Li\*, Indiana University Fairbanks School of Public Health  
Mei-Cheng Wang, Johns Hopkins Bloomberg School of Public Health

**10:10**  
**Floor Discussion**

## 71. CONTRIBUTED PAPERS: SEMI-PARAMETRIC AND NON-PARAMETRIC MODELS

*Grand Ballroom X (3rd Floor)*

**Sponsor:** ENAR

**Chair:** Mathew McLean, Texas A&M University

**8:30**  
**Robust Estimations of Scale, Dependence and Correlation Based on Quick Estimators**  
Lai Wei\*, U.S. Food and Drug Administration  
Alan Hutson, State University of New York at Buffalo

**8:45**  
**An RKHS Approach to Estimating High-dimensional Graphs**  
Kuang-Yao Lee\*, Yale University  
Bing Li, The Pennsylvania State University  
Hongyu Zhao, Yale University

**9:00**  
**Quantile Association Regression Models**  
Ruosha Li\* and Yu Cheng, University of Pittsburgh  
Jason Fine, University of North Carolina, Chapel Hill

**9:15**  
**Calibrated Smoothed Bootstrap Confidence Intervals**  
Santu Ghosh\*, Wayne State University

**9:30**  
**Semiparametric Group Testing Regression Models**  
Dewei Wang\*, Christopher S. McMahan and Colin M. Gallagher, Clemson University  
Kurunarathna B. Kulasekera, University of Louisville

**9:45**  
**A Novel Pairwise Conditional Likelihood Ratio Test in a Semiparametric Model for vQTL Mapping**  
Chuan Hong\* and Yong Chen, University of Texas School of Public Health, Houston  
Yang Ning, University of Waterloo  
Peng Wei, University of Texas School of Public Health, Houston

**10:00**  
**Fused Kernel-Spline Smoothing for Repeatedly Measured Outcomes in a Generalized Partially Linear Model with Functional Single Index**  
Fei Jiang ■, Rice University  
Yanyuan Ma, Texas A & M University  
Yuanjia Wang, Columbia University

## 72. CONTRIBUTED PAPERS: JOINT MODELS FOR LONGITUDINAL AND SURVIVAL DATA

*Bristol Room (3rd Floor)*

**Sponsor** ENAR

**Chair:** Kush Kapur, Boston Children's Hospital and Harvard Medical School

**8:30**  
**Joint Latent Class Models With Interval-Censored Survival Data**  
Lan Kong\* and Guodong Liu, The Pennsylvania State University College of Medicine

**8:45**  
**A Fast EM Algorithm for Fitting Joint Models of a Binary Response and Multiple Longitudinal Covariates Subject to Detection Limits**  
Paul W. Bernhardt\*, Villanova University  
Daowen Zhang and Huixia J. Wang, North Carolina State University

**9:00**  
**Regression Modeling of Longitudinal Binary Outcomes with Outcome-Dependent Observation Times**  
Kay See Tan ■, Andrea B. Troxel, Stephen E. Kimmel, Kevin G. Volpp and Benjamin French, University of Pennsylvania Perelman School of Medicine

\* = Presenter | ■ = Student Award Winner

9:15

**Joint Model for a Diagnostic Test without a Gold Standard in the Presence of a Dependent Terminal Event**

**Sheng Luo\***, **Xiao Su** and **Stacia DeSantis**, University of Texas, Houston  
**Xuelin Huang**, **Min Yi** and **Kelly Hunt**, University of Texas MD Anderson Cancer Center

9:30

**Modeling Short- and Long-Term Characteristics of Follicle Stimulating Hormone as Predictors of Severe Hot Flashes in Penn Ovarian Aging Study**

**Bei Jiang\*** and **Naisyin Wang**, University of Michigan  
**Mary D. Sammel**, University of Pennsylvania  
**Michael R. Elliott**, University of Michigan

9:45

**Regression Analysis of Longitudinal Data with Correlated Censoring and Observation Times**

**Yang Li\***, University of North Carolina, Charlotte  
**Haiying Wang**, University of New Hampshire  
**Jianguo Sun**, University of Missouri, Columbia

10:00

**Mixtures of Gaussian Processes Applied to Medical Monitoring of Lung Function Decline and Pulmonary Exacerbations in Cystic Fibrosis**

**Leo L. Duan\***, **John P. Clancy** and **Rhonda D. Szczesniak**, Cincinnati Children's Hospital Medical Center

**73. CONTRIBUTED PAPERS: STATISTICAL METHODS IN EPIDEMIOLOGY**

*Grand Ballroom VII (3rd Floor)*

**Sponsor:** ENAR

**Chair:** **Ming Wang**, The Pennsylvania State University

8:30

**Comparing Parametric and Semi-Parametric Regression Models for a Skewed, Pooled Outcome**

**Emily M. Mitchell\***, National Institute of Child Health and Human Development, National Institutes of Health  
**Robert H. Lyles**, Emory University  
**Michelle Danaher**, **Neil J. Perkins** and **Enrique F. Schisterman**, National Institute of Child Health and Human Development, National Institutes of Health

8:45

**Effect Modification and Design Sensitivity in Observational Studies**

**Jesse Y. Hsu\***, **Dylan S. Small** and **Paul R. Rosenbaum**, University of Pennsylvania

9:00

**Structural Nested Mean Model for Clustered Outcomes**

**Jiwei He\*** and **Marshall Joffe**, University of Pennsylvania

9:15

**Flexible Models for Comparing Cumulative Effects of Time-dependent Exposures**

**Chenkun Wang\***, **Hai Liu** and **Sujuan Gao**, Indiana University School of Medicine and Richard M. Fairbank School of Public Health

9:30

**Instrumental Variables Estimation with Some Invalid Instruments and Its Application to Mendelian Randomization**

**Hyunseung Kang\***, **Anru Zhang**, **T. Tony Cai** and **Dylan S. Small**, University of Pennsylvania

9:45

**Variable Selection for Case-Cohort Studies with A Diverging Number of Parameters**

**Ai Ni** ■ and **Jianwen Cai**, University of North Carolina, Chapel Hill

10:00

**Weighted Model Selection for Fractional Polynomial Models**

**Michael D. Regier\***, **Ruoxin Zhang** and **John Honaker**, West Virginia University

**74. CONTRIBUTED PAPERS: ADAPTIVE DESIGNS AND RANDOMIZATION**

*Atlantic Room (3rd Floor)*

**Sponsor:** ENAR

**Chair:** **Qin Jiang**, Pfizer Inc.

8:30

**Two-Stage Adaptive Optimal Design with Fixed First Stage Sample Size**

**Adam Lane\***, Cincinnati Children's Hospital Medical Center  
**Nancy Flournoy**, University of Missouri

**8:45 Phase II/III Seamless Adaptive Dose Selection Design for Longitudinal Patient Data**

**Caitlyn Ellerbe\***, **Jordan Elm** and **Viswanathan Ramakrishnan**, Medical University of South Carolina  
**Bruce Turnbull**, Cornell University  
**Edward Jauch**, Medical University of South Carolina  
**Stacia DeSantis**, University of Texas Health Sciences  
**Valerie Durkalski**, Medical University of South Carolina

9:00

**The Use of Decreasingly Informative Priors in Adaptive Clinical Designs**

**Roy T. Sabo\***, Virginia Commonwealth University

**9:15**  
**An Adaptive Bayesian Dose Finding Approach for Drug Combinations with Drug-drug Interaction**  
**Yang Yang\***, University of Maryland, Baltimore County  
**Hong-Bin Fang**, Georgetown University  
**Anindya Roy**, University of Maryland, Baltimore County  
**Ming Tan**, Georgetown University

**9:30**  
**Dose Escalation with Over-dose and Under-dose Controls for Phase I/II Clinical Trial**  
**Zheng Li\*** and **Michael Kutner**, Emory University  
**Ying Yuan**, University of Texas MD Anderson Cancer Center  
**Zhengjia Chen**, Emory University

**9:45**  
**An Adaptive Treatment Strategy for the Management of White-Nose Syndrome**  
**Nick Meyer\***, **Eric Laber**, **Krishna Pacifici** and **Brian Reich**, North Carolina State University

**10:00**  
**Floor Discussion**

## 75. CONTRIBUTED PAPERS: NEXT GENERATION SEQUENCING

*Grand Ballroom IX (3rd Floor)*

**Sponsor:** ENAR

**Chair:** Prasad Patil, Johns Hopkins University

**8:30**  
**Genotype Calling and Haplotyping in Extended Families**  
**Lun-Ching Chang**, University of Pittsburgh  
**Bingshan Li**, Vanderbilt University  
**George C. Tseng** and **Wei Chen\***, University of Pittsburgh

**8:45**  
**Meta-Analysis of Sequencing Studies Under Random-Effects Models**  
**Zheng-Zheng Tang\*** and **Dan-Yu Lin**, University of North Carolina, Chapel Hill

**9:00**  
**Likelihood Based Complex Trait Association Testing for Arbitrary Depth Sequencing Data**  
**Song Yan\*** and **Yun Li**, University of North Carolina, Chapel Hill

**9:15**  
**Design Issue and Power Calculation in RNA-seq Applications**  
**Chien-Wei Lin\*** and **George C. Tseng**, University of Pittsburgh

**9:30**  
**A Simulation-based Comparative Study of the Relative Power of Family-based Association Tests**  
**Jia Jia\*** and **Daniel E. Weeks**, University of Pittsburgh

**9:45**  
**A DNA Variant Caller Adapted to Assess Mitochondrial DNA Variation from Whole-Genome Sequencing Data**  
**Jun Ding\***, National Institute on Aging, National Institutes of Health  
**Carlo Sidore**, Istituto di Ricerca Genetica e Biomedica, Consiglio Nazionale delle Ricerche, Monserrato, Cagliari, Italy

## 76. CONTRIBUTED PAPERS: STATISTICAL METHODS FOR SURVIVAL ANALYSIS

*Chasseur Room (3rd Floor)*

**Sponsor:** ENAR

**Chair:** Jennifer Sinnott, Harvard University

8:30

### Distributional Properties and Peculiarities in HPP-Based Recurrent Event Models

Piaomu Liu\* and Edsel A. Peña, University of South Carolina, Columbia

8:45

### Vertical Modeling: Analysis of Multi-state Data with a Cured Fraction

Mioara Alina Nicolaie\* and Catherine Legrand, Université catholique de Louvain

9:00

### Sequential Stratification for Recurrent Event Outcomes

Abigail Smith\* and Douglas Shaubel, University of Michigan

9:15

### Random Survival Forests for Interval-censored Outcomes in the Presence of Imperfect Diagnostic Tests

Hui Xu\*, Xiangdong Gu and Raji Balasubramanian, University of Massachusetts, Amherst

9:30

### Analysis of MD STARnet Data

Ke Liu\*, Ying Zhang, Paul Romitti, Soman Puzhankara and Kristin Caspers, University of Iowa  
Elinora Price, Jennifer Andrews and Chris Cunniff, University of Arizona

9:45

### Time-Dependent Tree-Structured Survival Analysis with Unbiased Variable Selection

Meredith L. Wallace\*, University of Pittsburgh

10:00

### Quantile Regression in Semiparametric Varying-Coefficient Partially Linear Models for Right Censored Length-biased Data

Xuerong Chen, Georgetown University  
Yeqian Liu\* and Jianguo Sun, University of Missouri, Columbia  
Yong Zhou, Chinese Academy of Sciences, Beijing

## Tuesday, March 18

10:15 am – 10:30 am

## Refreshment Break with Our Exhibitors

*Grand Ballroom Foyer (3rd Floor)*

## Tuesday, March 18

10:30 am – 12:15 pm

## 77. PRESIDENTIAL INVITED ADDRESS

*Grand Ballroom (3rd Floor)*

**Sponsor:** ENAR

**Organizer/Chair:** DuBois Bowman, Columbia University

10:30

Introduction

10:35

Distinguished Student Paper Awards

10:45

### A Significance Test for the Lasso

Robert J. Tibshirani, PhD, Department of Statistics and Health Research and Policy, Stanford University

## Tuesday, March 18

1:45 pm – 3:30 pm

## 78. JABES INVITED SESSION

*Grand Ballroom VIII (3rd Floor)*

**Sponsors:** ENAR, ASA Section on Statistics and the Environment, ASA Government Statistics Section

**Organizer:** Montserrat Fuentes, North Carolina State University

**Chair:** Montserrat Fuentes, North Carolina State University

1:45

### Estimating Velocity for Processive Motor Proteins with Random Detachment

John Hughes\*, University of Minnesota  
Shankar Shastry, William O. Hancock and John Fricks, The Pennsylvania State University

2:10

**Bayesian 2-stage Space-Time Mixture Modeling with Spatial Misalignment**

**Andrew B. Lawson\***, Medical University of South Carolina  
**Jungsoon Choi**, Hangyang University, Korea  
**Bo Cai**, University of South Carolina, Columbia  
**Monir Hossain**, University of Cincinnati  
**Russell Kirby**, University of South Florida  
**Jihong Liu**, University of South Carolina, Columbia

2:35

**Identifying Genes that are Differentially Expressed in Both of Two Independent Experiments**

**Megan Orr\***, North Dakota State University  
**Peng Liu** and **Dan Nettleton**, Iowa State University

3:00

**A Bayesian Approach to Fitting Gibbs Processes with Temporal Random Effects Generalisations and Challenges**

**Ruth King**, **Janine B. Illian\***, **Stuart E. King**  
and **Glenna F. Nightingale**, University of St Andrews  
**Dirte K. Hendrichsen**, Norwegian Institute for Nature Research

3:25

**Floor Discussion**

**79. RECENT ADVANCES IN STATISTICAL METHODS FOR MISSING DATA**

*Grand Ballroom III (3rd Floor)*

**Sponsors:** ENAR, ASA Biometrics Section, ASA Government Statistics Section

**Organizer:** **Qi Long**, Emory University

**Chair:** **Pallavi Mishra-Kalyani**, Emory University

1:45

**Identification and Multiple Imputation of Implausible Gestational Ages for the Study of Preterm Births**

**Nathaniel Schenker\***, National Center for Health Statistics, Centers for Disease Control and Prevention

2:10

**Adjusting for Verification Bias in Estimation of Covariate-specific Areas under the ROC Curves**

**Xiao-Hua A. Zhou\***, University of Washington  
**Danping Liu**, Eunice Kennedy Shriver National Institute of Child Health and Human Development, National Institutes of Health

2:35

**Multiple Imputation Via Flexible, Joint Models**

**Jerome Reiter\***, Duke University

3:00

**On the Use of Box-Cox Transformation for Missing Data Imputation**

**Yulei He\***, **Don Malec** and **Nathaniel Schenker**, National Center for Health Statistics, Centers for Disease Control and Prevention

3:25

**Floor Discussion**

**80. BIG DATA METHODS IN BIOSTATISTICS**

*Grand Ballroom II (3rd Floor)*

**Sponsors:** IMS, ASA Statistical Learning and Data Mining Section, ASA Biopharmaceutical Section

**Organizer:** **Babak Shahbaba**, University of California, Irvine

**Chair:** **Babak Shahbaba**, University of California, Irvine

1:45

**Some Post-GWAS Strategies for Identifying the Remaining Genetic Determinants**

**Zhaoxia Yu\***, University of California, Irvine

2:10

**Interactive, Exploratory Visualization and Statistical Analysis of Genome-Scale Data**

**Hector Corrada Bravo\*** and **Florin Chelaru**, University of Maryland, College Park

2:35

**A Semiparametric Bayesian Model for Detecting Multiway Synchrony Among Neurons**

**Babak Shahbaba\***, **Bo Zhou**, **Shiwei Lan** and **Hernando Ombao**, University of California, Irvine  
**David Moorman**, Medical University of South Carolina  
**Sam Behseta**, Cal State Fullerton

3:00

**Algebraic Properties and Fast Large Covariance Estimation**

**Xi Luo\***, Brown University

3:25

**Floor Discussion**

\* = Presenter | ■ = Student Award Winner

## 81. STATISTICAL PREDICTION MODELS FOR MEDICAL DECISION MAKING

*Grand Ballroom IV (3rd Floor)*

**Sponsors:** ENAR, ASA Mental Health Statistics Section

**Organizer:** **Jing Ning**, University of Texas  
MD Anderson Cancer Center

**Chair:** **Jing Ning**, University of Texas  
MD Anderson Cancer Center

**1:45**

### Dynamic Prediction of Survival Outcomes and Medical Decision Making

**Xuelin Huang\***, **Sangbum Choi** and **Jing Ning**,  
University of Texas MD Anderson Cancer Center

**2:10**

### Statistical Prediction Models for Medical Decision Making

**Michael W. Kattan\***, Cleveland Clinic

**2:35**

### ROC Analysis for Multiple Markers with Tree-based Classification

**Mei-Cheng Wang\***, Johns Hopkins University  
**Shanshan Li**, Indiana University Fairbanks  
School of Public Health

**3:00**

### Efficient Evaluation of Risk Markers for Censored Failure Time Outcome: Analyses and Designs

**Yingye Zheng\***, Fred Hutchinson Cancer Research Center  
**Tianxi Cai**, Harvard School of Public Health

**3:25**

### Floor Discussion

## 82. RECENT DEVELOPMENTS IN STATISTICAL GENETICS, GENOMICS, AND THEIR APPLICATIONS

*Grand Ballroom V (3rd Floor)*

**Sponsors:** ENAR, ASA Biometrics Section

**Organizer:** **Mingyao Li**, University of Pennsylvania  
School of Medicine

**Chair:** **Mingyao Li**, University of Pennsylvania  
School of Medicine

**1:45**

### Joint Analysis of SNP and Gene Expression Data in Genetic Association Studies of Complex Diseases Using Causal Mediation Analysis

**Yen-Tsung Huang**, Brown University  
**Tyler VanderWeele** and **Xihong Lin\***, Harvard School of  
Public Health

**2:10**

### The Magic of Score Statistics

**Danyu Lin\***, University of North Carolina, Chapel Hill

**2:35**

### Assessing the Sensitivity of Genetic Associations to Unmeasured Confounding Under a Causal Framework

**Nandita Mitra\***, University of Pennsylvania  
**Elizabeth Handorf**, Fox Chase Cancer Center  
**Peter Kanetsky** and **Steve Kawut**, University  
of Pennsylvania

**3:00**

### Robust and Powerful Sibpair Test for Rare Variant Association

**Keng-Han Lin** and **Sebastian Zoellner\***, University  
of Michigan

**3:25**

### Floor Discussion

## 83. IMPROVED STATISTICAL MODELING AND UNDERSTANDING OF GENE EXPRESSION AND TRANSCRIPTION REGULATION USING NEXT GENERATION SEQUENCING AND OTHER HIGH THROUGHPUT TECHNOLOGIES

*Grand Ballroom VI (3rd Floor)*

**Sponsor:** ENAR

**Organizer:** **Michael Y. Zhu**, Purdue University

**Chair:** **Zhaohui Qin**, Emory University

**1:45**

### Deconvolution of Base Pair Level RNA-Seq Read Counts for Quantification of Transcript Expression Levels

**Han Wu\*** and **Yu Zhu**, Purdue University

**2:10**

### Accounting for Nuisance Covariates when using RNA-Seq Data to Identify Differentially Expressed Genes

**Dan Nettleton\*** and **Yet Nguyen**, Iowa State University

**2:35**

### Bayesian Models for Integrative Genomics

**Marina Vannucci\*** and **Alberto Cassese**, Rice University  
**Michele Guindani**, University of Texas  
MD Anderson Cancer Center

**3:00**  
**Understanding Spatial Organizations of Chromosomes via Statistical Analysis of Hi-C Data**  
**Ming Hu\***, New York University  
**Ke Deng**, Tsinghua University  
**Zhaohui Qin**, Emory University  
**Jun S. Liu**, Harvard University

**3:25**  
**Floor Discussion**

## 84. STATISTICAL CHALLENGES IN PUBLIC HEALTH RESEARCH AT THE CDC

*Grand Ballroom VII (3rd Floor)*

**Sponsors:** ENAR, ASA Government Statistics Section

**Organizer:** **Simone Gray**, Centers for Disease Control and Prevention

**Chair:** **Dr. Craig Borkowf**, Centers for Disease Control and Prevention

**1:45**  
**Exploring the Optimal Allocation of Sample Sizes in Dual-Frame RDD Telephone Surveys**  
**Haci Akcin**, Centers for Disease Control and Prevention  
**Denise Bradford**, Top Grumman

**CANCELLED**

**2:10**  
**Area Level Models for County Level Prevalence Estimates using Publically Available BRFSS Data**  
**Betsy L. Cadwell\***, **Theodore J. Thompson** and **Lawrence E. Barker**, Centers for Disease Control and Prevention

**2:35**  
**Multiple Imputation of Linked National Health Interview Survey and Medicare data files**  
**Guangyu Zhang\***, **Jennifer D. Parker** and **Nathaniel Schenker**, National Center for Health Statistics, Centers for Disease Control and Prevention

**3:00**  
**Using Longitudinal Data Analysis to Link Policy and Legislation to Public Health Impacts**  
**Simone Gray\***, **Patricia Sweeney**, **Joseph Prejean**, **David W. Purcell**, **Aruna Surendera Babu**, **Brett Williams**, **Jenny Sewell** and **Jonathan Mermin**, Centers for Disease Control and Prevention

**3:25**  
**Discussant: Craig Borkowf, Centers for Disease Control and Prevention**

## 85. INNOVATIVE BAYESIAN NONPARAMETRICS IN BIOSTATISTICS

*Grand Ballroom I (3rd Floor)*

**Sponsors:** ENAR, ASA Section on Bayesian Statistical Science, ASA Biometrics Section

**Organizer:** **Michael Daniels**, University of Texas, Austin

**Chair:** **Antonio Linero**, University of Florida

**1:45**  
**Longitudinal Data Analysis using a Random Partition Model with Regression on Covariates**  
**Gary L. Rosner\***, Johns Hopkins University  
**Peter Mueller**, University of Texas, Austin  
**Fernando Quintana**, Pontificia Universidad Catolica de Chile  
**Michael Maitland**, University of Chicago

**2:10**  
**A Bayesian Feature Allocation Model for Tumor Heterogeneity**  
**Peter Mueller\***, University of Texas, Austin  
**Juhee Lee**, University of California, Santa Cruz  
**Yuan Ji**, NorthShore University Health System

**2:35**  
**A Bayesian Nonparametric Approach to Monotone Missing Data in Longitudinal Studies with Informative Missingness**  
**Antonio Linero**, University of Florida  
**Michael Daniels\***, University of Texas, Austin

**3:00**  
**Bayesian Quantile Regression for Censored Data**  
**Brian J. Reich\*** and **Luke B. Smith**, North Carolina State University

**3:25**  
**Floor Discussion**

## 86. CONTRIBUTED PAPERS: NEW DEVELOPMENTS IN SURVIVAL ANALYSIS

*Grand Ballroom X (3rd Floor)*

**Sponsor:** ENAR

**Chair:** **Adin-Cristian Andrei**, Bluhm Cardiovascular Institute

**1:45**  
**A Local Agreement Index Based on Hazard Functions for Survival Outcomes**  
**Tian Dai\*** and **Ying Guo**, Emory University

**2:00**  
**A Frailty Model for Bivariate Interval-censored Data Allowing Weak Dependence and Independence**  
**Naichen Wang\*** and **Lianming Wang**, University of South Carolina

\* = Presenter | ■ = Student Award Winner

- 2:15**  
**Survival Analysis with Correlated Frailties and the Bootstrap**  
**J. C. Loredo-Osti\***, Memorial University
- 2:30**  
**Semiparametric Methods to Contrast Restricted Mean Gap Times**  
**Xu Shu ■** and **Douglas E. Schaebel**, University of Michigan

## 90. CONTRIBUTED PAPERS: NEW METHODS IN GENOMICS

*Chasseur Room (3rd Floor)*

**Sponsor:** ENAR

**Chair:** Emily Huang, Stony Brook University

1:45

### Inference of Epigenetic Modulation of Gene Expression with Meta-pathway Analysis

**Elana J. Fertig\***, Johns Hopkins University  
**Ana Markovic**, University of California, San Francisco  
**Ludmila V. Danilova**, **Daria A. Gaykalova**, **Leslie Cope**,  
**Christine H. Chung** and **Joseph A. Califano**,  
Johns Hopkins University  
**Michael F. Ochs**, The College of New Jersey

2:00

### Integrative Modeling of Multiplatform Genomic Data

**Yen-Tsung Huang\***, Brown University

2:15

### The Most Informative Spacing Test as an Outlier and Subgroup Identification Method

**Iwona Pawlikowska\***, **Gang Wu**, **Michael Edmonson**,  
**Tanja Gruber**, **Jinghui Zhang** and **Stan Pounds**,  
St. Jude Children's Research Hospital

2:30

### Cross-Platform Gene Expression Profile Classification using Top-Scoring Pairs

**Prasad Patil\***, Johns Hopkins School of Public Health  
**Benjamin Haibe-Kains**, Institut de Recherches Cliniques de Montreal  
**Jeffrey T. Leek**, Johns Hopkins School of Public Health

2:45

### A Survival Copula Mixture Model for Comparing Two Genomic Rank List

**Yingying Wei\*** and **Hongkai Ji**, Johns Hopkins University

3:00

### An Integrated Method for Detecting MicroRNA Target Proteins through Reverse-phase Protein Lysate Arrays

**Jiawen Zhu\***, **Song Wu** and **Jie Yang**, Stony Brook University

3:15

### Testing in Metagenomic Profiling Studies with the Microbiota Regression-based Kernel Association Test (MiRKAT)

**Ni Zhao\*** and **Michael C. Wu**, Fred Hutchinson Cancer Research Center

## Tuesday, March 18

3:30 pm – 3:45 pm

## Refreshment Break with Our Exhibitors

*Grand Ballroom Foyer (3rd Floor)*

## Tuesday, March 18

3:45 pm – 5:30 pm

## 91. IMS MEDALLION LECTURE

*Grand Ballroom VI (3rd Floor)*

**Sponsor:** IMS

**Chair:** Daniel Scharfstein, Johns Hopkins University School of Public Health

3:45

### Statistical Genetics and Genomics in the Big Data Era: Opportunities and Challenges in Research and Training

**Xihong Lin\***, Harvard School of Public Health

## 92. PARAMETRIC OR NONPARAMETRIC; WHICH IS THE ANSWER?

*Grand Ballroom VII (3rd Floor)*

**Sponsors:** ENAR, ASA Mental Health Statistics Section, Non-Parametric

**Organizer:** Zhehui Luo, Michigan State University

**Chair:** Zhehui Luo, Michigan State University

3:45

### Super Learning to Hedge Against Incorrect Inference from Arbitrary Parametric Assumptions in Marginal Structural Modeling

**Romain Neugebauer\***, Kaiser Permanente

4:10

### Fitting ICU Data Complexity: Need for Innovative Prediction Tools Mortality Prediction by SuperLearner

**Romain Pirracchio\***, Hôpital Saint Louis, Paris, France

**Maya Petersen**, University of California, Berkeley

**Sylvie Chevret**, Hôpital Saint Louis, Paris, France

**Mark van der Laan**, University of California, Berkeley

4:35

### Sensitivity Analysis for Causal Inference under Unmeasured Confounding and Measurement Error Problems

**Iván Díaz\***, Johns Hopkins Bloomberg School of Public Health

**Mark van der Laan**, University of California, Berkeley

5:00

**From Causal Roadmaps to Hedging Your Bets in the Adventures of Comparative Effectiveness Research: An Illustration using an Effect Modification Analysis of Star\*D**

**Wenjing Zheng**, University of California, Berkeley  
**Zhehui Luo\***, Michigan State University  
**Mark van der Laan**, University of California, Berkeley

5:25

**Floor Discussion**

**93. CAUSAL INFERENCE IN HIGH DIMENSIONAL SETTINGS**

*Grand Ballroom II (3rd Floor)*

**Sponsors:** ENAR, ASA Section on ASA Section on Statistics in Imaging

**Organizer:** **Yenny WebbVargas**, Johns Hopkins School of Public Health

**Chair:** **Bruce Swihart**, Johns Hopkins School of Public Health

3:45

**Calibrated Observational Studies**

**David Madigan\***, Columbia University

4:10

**Connectivity and Causality in Brain Imaging**

**Martin A. Lindquist\***, Johns Hopkins Bloomberg School of Public Health

4:35

**Causal Inference for fMRI Time Series Data with Systematic Errors of Measurement in a Balanced On/Off Study of Social Evaluative Threat**

**Michael E. Sobel\***, Columbia University  
**Martin A. Lindquist**, Johns Hopkins Bloomberg School of Public Health

5:00

**Data Adaptive Target Parameters in Causal Inference**

**Alan E. Hubbard\*** and **Mark van der Laan**, University of California, Berkeley

5:25

**Floor Discussion**

**94. ADVANCES IN TIME SERIES ANALYSIS OF BIOMEDICAL SIGNALS**

*Grand Ballroom III (3rd Floor)*

**Sponsors:** ENAR, ASA Section on ASA Section on Statistics in Imaging

**Organizer:** **Robert Krafty**, Temple University

**Chair:** **Sarah Ratcliffe**, University of Pennsylvania

3:45

**Spatial Identification of Epileptic Brain Regions**

**Giovanni Motta\***, Columbia University  
**Michael M. Haglund** and **Daryl Hochman**, Duke University

4:10

**Time Series Analysis of Molecular Motor-Cargo Complexes**

**John Fricks\***, The Pennsylvania State University

4:35

### Antedependence Models for Skew Normal Longitudinal Data

**Shu-Ching Chang\*** and **Dale Zimmerman**, University of Iowa

**9:15**

### Bayesian Shared Parameter Models for Dyadic Longitudinal Data with Intermittent Dropouts

**Jaeh Ahn\***, Georgetown University  
**Ying Yuan** and **Wenyi Wang**, University of Texas MD Anderson Cancer Center

**9:30**

### An R Package for Sensitivity Analysis on Longitudinal Data with Non-Ignorable Intermittent Missingness

**Jing Wang\***, The George Washington University  
**Chenguang Wang**, Johns Hopkins University

**9:45**

### A Novel Mixture Model Estimates Time to Onset of Disease or Drug Effects and its Association with Key Covariates

**Mengyuan Xu\***, National Institute of Environmental Health Sciences, National Institutes of Health  
**Yin Yao**, The National Institute of Mental Health, National Institutes of Health

**10:00**

### A Two-part Mixture Model for Zero-inflated Longitudinal Measurements with Heterogeneous Random Effects

**Huirong Zhu\***, **Sheng Luo** and **Stacia M. DeSantis**, University of Texas Health Science Center at Houston

## 117. CONTRIBUTED PAPERS: ANALYSIS OF DATA FROM CLINICAL TRIALS

*Chasseur Room (3rd Floor)*

**Sponsor:** ENAR

**Chair:** **Adam Lane**, Cincinnati Children's Hospital Medical Center

**8:30**

### Finding the Optimal Allocation in Sequential Binary Response Experiments with Two Possibly Correlated Endpoints

**Lu Wang\*** and **Hongjian Zhu**, University of Texas Health Science Center at Houston

**8:45**

### A General Class of Correlation Coefficients between Binary and Continuous Variables for the $2 \times 2$ Crossover Design

**Luojun Wang\*** and **Vernon Chinchilli**, Penn State Hershey College of Medicine

**9:00**

### Weighted and Replicated Estimator for Comparing Dynamic Treatment Regimens with a Binary Outcome using SMART Data: Practical Issues and a Simulations-based Sample Size Calculator

**Kelley M. Kidwell\*** and **Inbal Nahum-Shani**, University of Michigan  
**Connie Kasari**, University of California, Los Angeles  
**Daniel Almirall**, University of Michigan

**9:15**

### Marginal Meta Analysis for Combining Randomized Clinical Trials with Rare Binary Outcomes — Reevaluating the Safety Concern of Avandia

**Yi Huang\*** and **Elande Baro**, University of Maryland, Baltimore County  
**Guoxing Soon**, U.S. Food and Drug Administration

**9:30**

### Design Issues and their Effect on Power and Sampling Frequency Requirements for N-of-1 Clinical Trials

**Yanpin Wang\***, **Andrew Viterbi** and **Nicholas Schork**, Scripps Health

**9:45**

### Using Internal Pilots to Design Cluster Randomized Trials with Unequal Cluster Sizes

**Ashutosh Ranjan\***, University of Alabama, Birmingham  
**Christopher S. Coffey**, University of Iowa  
**Leslie A. McClure**, University of Alabama, Birmingham

**10:00**

### Designing Balanced Patient-specific Treatment Stimuli for Post-stroke Language Interventions

**Minming Li\***, **Edward J. Stanek III** and **Jacquie Kurland**, University of Massachusetts, Amherst

\* = Presenter | ■ = Student Award Winner

# Wednesday, March 19

10:15 am – 10:30 am

## Refreshment Break with Our Exhibitors

*Grand Ballroom Foyer (3rd Floor)*

# Wednesday, March 19

10:30 am – 12:15 pm

## 118. HUMAN HEALTH AND ENVIRONMENTAL STATISTICS AT THE U.S. EPA'S OFFICE OF RESEARCH AND DEVELOPMENT

*Grand Ballroom V (3rd Floor)*

**Sponsors:** ENAR, ASA Section on Statistics and the Environment, ASA Government Statistic Section

**Organizer:** James L. Crooks, U.S. Environmental Protection Agency

**Chair:** Ana Rappold, U.S. Environmental Protection Agency

10:30

### Exploring Chemically Induced Change in Neuronal Networks

Diana Hall\*, University of North Carolina, Chapel Hill

10:50

### Development and Evaluation of Two Reduced Form Versions of a Deterministic Air Quality Model for Ozone and Particulate Matter

Kristen M. Foley\*, Sergey L. Napelenok, Sharon B. Phillips and Carey Jang, U.S. Environmental Protection Agency

11:10

### Fully Bayesian Analysis of High-Throughput Targeted Metabolomics Assays

James L. Crooks\*, Denise K. MacMillan and Jane E. Gallagher, U.S. Environmental Protection Agency

11:30

### Implications of Nonlinear Concentration Response Curve for Ozone related Mortality on Risk Assessment

Ana G. Rappold\* and James L. Crooks, U.S. Environmental Protection Agency

11:50

### Modeling the Effect of Temperature on Ozone-Related Mortality

Ander Wilson\*, North Carolina State University  
Ana G. Rappold and Lucas M. Neas, U.S. Environmental Protection Agency  
Brian J. Reich, North Carolina State University

## 119. POWER ANALYSIS FOR MIXED MODELS: WHERE WE STAND

*Grand Ballroom III (3rd Floor)*

**Sponsor:** ENAR

**Organizer:** Yueh-Yun Chi, University of Florida

**Chair:** Keith E. Muller, University of Florida

10:30

### Introduction

Keith Muller\*, University of Florida

10:35

### Quick (but Accurate) Power and Precision Approximation using Generalized Linear Mixed Model Software

Walter W. Stroup\*, University of Nebraska, Lincoln

10:55

### Sample Size for Fixed Effect Inference in Longitudinal and Multilevel Mixed Models

Yueh-Yun Chi\*, University of Florida

11:15

### Optimal Combination of Number of Participants and Number of Repeated Measurements in Longitudinal Studies with Time-Varying Exposure

Donna Spiegelman\*, Harvard School of Public Health  
Jose Barrera-Gomez and Xavier Basagana, Centre for Research in Environmental Epidemiology (CREAL), Barcelona, Spain

11:35

### Panel Discussion

## 120. NEW DEVELOPMENTS IN ESTIMATING CAUSAL EFFECTS OF TIME-VARYING TREATMENTS

*Grand Ballroom II (3rd Floor)*

**Sponsor:** ENAR

**Organizer:** Edward Kennedy, University of Pennsylvania School of Medicine

**Chair:** Edward Kennedy, University of Pennsylvania School of Medicine

10:30

### Double Robust Estimation Strategies for Longitudinal Censored Data

Mireille E. Schnitzer\*, Université de Montréal  
Judith J. Lok, Harvard School of Public Health

10:55

### Nonparametric Smoothing for Causal Inference with Continuous Treatments

Edward H. Kennedy\* and Marshall M. Joffe, University of Pennsylvania

**11:20**  
**Overcoming Challenges Associated with Artificial Censoring in Structural Nested Failure Time Models**  
David M. Vock\*, University of Minnesota

**11:45**  
**Inference for Causal Effects of Time-varying Treatment in the Presence of Selective Measurement Error**  
Marshall M. Joffe\*, University of Pennsylvania

**12:10**  
**Floor Discussion**

## 121. INSIDE THE BIOSTATISTICAL COLLABORATIVE PROCESS

*Grand Ballroom VI (3rd Floor)*

**Sponsors:** ENAR, ASA Mental Health Statistics Section

**Organizer:** Bhramar Mukherjee and Brisa Sanchez, University of Michigan

**Chair:** Brisa Sánchez, University of Michigan

**10:30**  
**Mass Spectrometry-based Metabolomics to Understand Human Health and Disease**  
Andrew Patterson\*, The Pennsylvania State University

**11:00**  
**Kernel Machines for Metabolomics Data Analysis**  
Xiang Zhan, Debashis Ghosh\* and Andrew Patterson, The Pennsylvania State University

**11:45**  
**Discussant: Wei Pan, University of Minnesota**

## 122. CONTRIBUTED PAPERS: NON-PARAMETRIC METHODS

*Atlantic Room (3rd Floor)*

**Sponsor:** ENAR

**Chair:** Kuang-Yao Lee, Yale University

**10:30**  
**On Inverse Probability Weighted Estimators in the Presence of Interference**  
Lan Liu\*, Michael G. Hudgens and Sylvia Becker-Dreps, University of North Carolina, Chapel Hill

**10:45**  
**Association of Time to Recovery and a Subsequent Depressive or Mania Episode**  
Xiaotian Chen\* and Yu Cheng, University of Pittsburgh

**11:00**  
**Bayesian Doubly Semiparametric Proportional Hazards Model with Commensurate Priors that Facilitate Borrowing from a Nonexchangeable Data Source**  
Thomas A. Murray\*, University of Minnesota  
Brian P. Hobbs, University of Texas MD Anderson Cancer Center  
Bradley P. Carlin, University of Minnesota

**11:15**  
**Bivariate Penalized Splines for Regression**  
Ming-Jun Lai and Lily Wang\*, University of Georgia

**11:30**  
**Signed Rank with Responses Missing at Random**  
Huybrechts F. Bindele\*, University of South Alabama

**11:45**  
**Combination of Nonparametric Regression Based Classifiers for Breast Tissue Diagnosis from Raman Spectra**  
Jing Guo\*, Richard Charnigo and Cidambi Srinivasan, University of Kentucky  
Ramachandra Dasari, Massachusetts Institute of Technology  
Maryann Fitzmaurice, Case Western Reserve University  
Abigail Haka, Cornell University

**12:00**  
**Gene-Trait Similarity U Test**  
Changshuai Wei\* and Qing Lu, Michigan State University

\* = Presenter | ■ = Student Award Winner

## 123. CONTRIBUTED PAPERS: VARIABLE SUBSET SELECTION

*Chasseur Room (3rd Floor)*

**Sponsor:** ENAR

**Chair:** **Sunyoung Shin**, University of North Carolina, Chapel Hill

**10:30**

### Time-varying Networks Estimation and Dynamic Model Selection

**Xinxin Shu\*** and **Annie Qu**, University of Illinois, Urbana-Champaign

**10:45**

### Simultaneous Variable Selection for Joint Models of Longitudinal and Survival Outcomes

**Zangdong He\***, Indiana University School of Medicine and Fairbanks School of Public Health  
**Wanzhu Tu**, Indiana University School of Medicine, Fairbanks School of Public Health and Regenstrief Institute, Inc.  
**Sijian Wang**, University of Wisconsin, Madison  
**Haoda Fu**, Eli Lilly & Company  
**Zhangsheng Yu**, Indiana University School of Medicine and Fairbanks School of Public Health

**11:00**

### Local Feature Selection in Varying-Coefficient Models

**Lan Xue**, Oregon State University  
**Xinxin Shu** and **Peibei Shi\***, University of Illinois, Urbana-Champaign  
**Colin O. Wu**, National Heart, Lung and Blood Institute, National Institutes of Health  
**Annie Qu**, University of Illinois, Urbana-Champaign

**11:15**

### Structured Feature Selection for Longitudinal Biomarker Data

**Anthony V. Pileggi\*** and **Brent A. Johnson**, Emory University  
**DuBois Bowman**, Columbia University

**11:30**

### Parsimonious Covariate and Conditional-Mean Model Selection with Multiple Candidate Predictors

**Greg DiRienzo\***, State University of New York at Albany

**11:45**

### Floor Discussion

## 124. CONTRIBUTED PAPERS: HIGH DIMENSIONAL DATA IN GENETICS AND GENOMICS

*Grand Ballroom VIII (3rd Floor)*

**Sponsor:** ENAR

**Chair:** **Jun Ding**, National Institute on Aging, National Institutes of Health

**10:30**

### Strategies for Developing Prediction Models from Genome-wide Association Studies

**Jincao Wu\***, **Ruth M. Pfeiffer** and **Mitchell H. Gail**, National Cancer Institute, National Institutes of Health

**10:45**

### A Penalized Multi-trait Mixed Model for Association Mapping in Pedigree-based GWAS

**Jin Liu\***, University of Illinois, Chicago  
**Can Yang**, Yale University  
**Xingjie Shi**, Shanghai University of Finance and Economics, China  
**Cong Li**, Yale University  
**Jian Huang**, University of Iowa  
**Hongyu Zhao** and **Shuangge Ma**, Yale University

**11:00**

### A Mixture of Experts Approach for the Analysis of SNP Data

**Julia Schiffner\*** and **Holger Schwender**, Heinrich-Heine-Universitaet Duesseldorf

**11:15**

### Joint Estimation of Multiple Dependent Gaussian Graphical Models

**Yuying Xie** ■, **Yufeng Liu** and **William Valdar**, University of North Carolina, Chapel Hill

**11:30**

### Gateau Differential Boosting for Analysis of Gene Effects and Gene-gene Interaction

**Kevin He\***, **Yi Li** and **Ji Zhu**, University of Michigan

**11:45**

### Concordant Integrative Analysis of Multiple Gene Expression Data Sets

**Fanni Zhang\*** and **Yinglei Lai**, The George Washington University

**12:00**

### D\_CDF Test of Negative Log Transformed P-values with Application to Genetic Pathway Analysis

**Hongying Dai\***, Children's Mercy Hospital  
**Richard Charnigo**, University of Kentucky

## 125. CONTRIBUTED PAPERS: TOOLS FOR SURVIVAL ANALYSIS

*Grand Ballroom IV (3rd Floor)*

**Sponsor:** ENAR

**Chair:** Jonathan Yabes, University of Pittsburgh

**10:30**

### **Robust Prediction of Cumulative Incidence Function under Non-proportional Subdistribution Hazards**

**Qing Liu\*** and **Chung-Chou H Chang**,  
University of Pittsburgh

**10:45**

### **Dynamics Model of Diabetes Disease Progression to End-Stage-Renal Disease and Mortality**

**Ying Jiang**, **Nathaniel Osgood**, **Roland Dyck**  
and **Hyun J. Lim\***, University of Saskatchewan, Canada

**11:00**

### **On the Consistency of Maximum Likelihood Estimators for the Three Parameter Lognormal Distribution**

**HaiYing Wang\***, University of New Hampshire  
**Nancy Flournoy**, University of Missouri, Columbia

**11:15**

### **Regression When the Predictor may be Censored**

**David Oakes\***, University of Rochester

**11:30**

### **Nonparametric Discrete Survival Function Estimation with Uncertain Endpoints using an Internal Validation Subsample**

**Jarcy Zee\*** and **Sharon X. Xie**,  
University of Pennsylvania Perelman School of Medicine

**11:45**

### **A New Flexible Association Measure for Semi-competing Risks**

**Jing Yang\*** and **Limin Peng**, Emory University

**12:00**

### **Pseudo-value Approach for Comparing Survival Medians for Dependent Data**

**Kwang Woo Ahn\***, Medical College of Wisconsin  
**Franco Mendolia**, German Aerospace Center,  
Institute of Aerospace Medicine, Germany

## 126. CONTRIBUTED PAPERS: META-ANALYSIS

*Grand Ballroom I (3rd Floor)*

**Sponsor:** ENAR

**Chair:** Sujin Kim, Savannah State University

**10:30**

### **Estimation of Treatment Effects in Matched-Pair Cluster Randomized Trials by Calibrating Covariate Imbalance Between Clusters**

**Zhenke Wu\*** and **Constantine E. Frangakis**, Johns Hopkins Bloomberg School of Public Health  
**Thomas A. Louis**, Johns Hopkins Bloomberg School of Public Health and U.S. Census Bureau  
**Daniel O. Scharfstein**, Johns Hopkins Bloomberg School of Public Health

**10:45**

### **A Unification of Models for Meta-analysis of Diagnostic Accuracy Studies Without a Gold Standard**

**Yulun Liu\*** and **Yong Chen**, University of Texas Health Science Center at Houston  
**Haitao Chu**, University of Minnesota

**11:00**

### **Meta-analysis Methods for Combining Multiple Expression Profiles: Comparisons, Statistical Characterization and an Application Guideline**

**Lun-Ching Chang\***, **Hui-Min Lin** and **George C. Tseng**,  
University of Pittsburgh

**11:15**

### **Investigation on Adaptively Weighted Evidence Aggregation Meta-analysis Methods**

**Shaowu Tang\*** and **George C. Tseng**,  
University of Pittsburgh

**11:30**

### **Bayesian Hierarchical Models for Network Meta-analysis Incorporating Nonignorable Missingness**

**Jing Zhang** ■, **Haitao Chu**, **Hwanhee Hong**  
and **James D. Neaton**, University of Minnesota  
**Guoxing Greg Soon**, U.S. Food and Drug Administration  
**Beth A. Virnig** and **Bradley P. Carlin**,  
University of Minnesota

**11:45**

### **Plug-in Tests for Non-equivalence of Means of Independent Normal Populations**

**Sungwoo Choi\*** and **Junyong Park**,  
University of Maryland Baltimore County

\* = Presenter | ■ = Student Award Winner

## 127. CONTRIBUTED PAPERS: STATISTICAL METHODS FOR HANDLING MISSING DATA

*Grand Ballroom X (3rd Floor)*

**Sponsor:** ENAR

**Chair:** **Victoria Liublinska**, Harvard University

**10:30**

### **Censoring Adjustment Methods for Source Apportionment Models**

**Jenna R. Krall\***, Johns Hopkins Bloomberg School of Public Health

**Charles H. Simpson**, Havoc Engineering

**Roger D. Peng**, Johns Hopkins Bloomberg School of Public Health

**10:45**

### **A Hot Deck Imputation Procedure for Multiply Imputing Nonignorable Missing Data: The Proxy Pattern-Mixture Hot Deck**

**Danielle M. Sullivan\*** and **Rebecca R. Andridge**, The Ohio State University

**11:00**

### **Analysis of Incomplete Derived Responses: Multiple Imputation for Body Mass Index Data**

**Jiwei Zhao\***, **Richard Cook** and **Changbao Wu**, University of Waterloo

**11:15**

### **Longitudinal Latent Variable Models Given Incompletely Observed Biomarkers and Covariates**

**Chunfeng Ren\*** and **Yongyun Shin**, Virginia Commonwealth University

**11:30**

### **Clustering Incomplete Data using Normal Mixture Models**

**Chantal Larose\***, **Dipak Dey** and **Ofer Harel**, University of Connecticut

**11:45**

### **Causal Inference in Longitudinal Studies with Dropout and Truncation by Death**

**Michelle Shardell\***, University of Maryland

**Gregory Hicks**, University of Delaware

**Luigi Ferrucci**, National Institute on Aging, National Institutes of Health

**12:00**

### **The Effect of Imputing a Complex Outcome on the Rejection Rate of Pearson's Chi-Square Test of Independence and a Permutation-Based Correction Factor**

**Megan J. Olson Hunt\*** and **Gong Tang**, University of Pittsburgh

## 128. CONTRIBUTED PAPERS: LONGITUDINAL DATA ANALYSIS

*Bristol Room (3rd Floor)*

**Sponsor:** ENAR

**Chair:** **Douglas Gunzler**, Case Western Reserve University

**10:30**

### **Generalized p-Values for Testing Zero-Variance Components in Linear Mixed-effects Models**

**Haiyan Su\***, Montclair State University

**Xinmin Li**, ShanDong University of Technology

**Hua Liang**, The George Washington University

**Hulin Wu**, University of Rochester

**10:45**

### **Sufficient Dimension Reduction for Longitudinal Data**

**Xuan Bi\*** and **Annie Qu**, University of Illinois, Urbana-Champaign

**11:00**

### **Real Time Monitoring of Progression Towards Renal Failure in Primary Care Patients**

**Peter J. Diggle**, Lancaster University, United Kingdom and University of Liverpool, United Kingdom

**Ines Sousa**, University of Minho, Portugal

**Ozgun Asar\***, Lancaster University, United Kingdom

**11:15**

### **AR(1) Latent Class Models for Longitudinal Count Data**

**Nicholas Henderson\*** and **Paul Rathouz**, University of Wisconsin, Madison

**11:30**

### **Time-varying Coefficient Models to Identify and Model Time-clusters in Recurrent Event Data**

**Xiaoxue Li\***, **Stewart J. Anderson** and **Saul Shiffman**, University of Pittsburgh

**11:45**

### **Identifying Multiple Change-points in a Linear Mixed Effects Model**

**Yinglei Lai\***, The George Washington University

**Paul S. Albert**, Eunice Kennedy Shriver National Institute of Child Health and Human Development, National Institutes of Health

**12:00**

### **Regression Analysis of Mixed Recurrent-event and Panel-count Data**

**Liang Zhu\***, St. Jude Children's Research Hospital

**Xingwei Tong**, Beijing Normal University

**Jianguo Sun**, University of Missouri, Columbia

**Kumar Srivastava**, St. Jude Children's Research Hospital

**Wendy Leisenring**, Fred Hutchinson Cancer Research Center

**Leslie Robinson**, St. Jude Children's Research Hospital

## 129. CONTRIBUTED PAPERS: PREDICTION AND PROGNOSTIC MODELING

*Grand Ballroom VII (3rd Floor)*

**Sponsor:** ENAR

**Chair:** **Kellie J. Archer**, Virginia Commonwealth University

**10:30**

**Predicting Probabilities of Competing Risk Outcomes under Informative Censoring, with Application to Safety and Efficacy of Initial ART in HIV-Positive Patients**

**Judith J. Lok\*** and **Michael D. Hughes**,  
Harvard School of Public Health

**10:45**

**The Optimality of a Pseudo-Likelihood Approach to Bayesian Classification**

**Josephine K. Asafu-Adjei\*** and **Rebecca A. Betensky**,  
Harvard School of Public Health

**11:00**

**Local Likelihood-Based Estimation for Quantile Classification in Binary Regression Models**

**John D. Rice\*** and **Jeremy M. G. Taylor**,  
University of Michigan

**11:15**

**Combination of Longitudinal Biomarkers in Predicting Binary Events with Application in a Fetal Growth Study**

**Danping Liu\*** and **Paul S. Albert**, Eunice Kennedy Shriver National Institute of Child Health and Human Development, National Institutes of Health

**11:30**

**Predictive Accuracy of Time-dependent Markers for Survival Outcomes**

**Li Chen\***, University of Kentucky  
**Donglin Zeng** and **Danyu Lin**, University of North Carolina, Chapel Hill

**11:45**

**An Investigation of the Assumptions of the Current Status Model**

**Jian-Lun Xu\***, National Cancer Institute

**12:00**

**Floor Discussion**

## 130. CONTRIBUTED PAPERS: NEW METHODS FOR GWAS

*Grand Ballroom IX (3rd Floor)*

**Sponsor:** ENAR

**Chair:** **Tamar Sofer**, Harvard School of Public Health

**10:30**

**Lassot: A Hybrid of Lasso and t-regularization for Penalized Regression and Applications to Genomic Selection**

**Long Qu\***, Wright State University

**10:45**

**SHAVE: Shrinkage Estimator Measured for Multiple Visits Increases Power in GWAS of Quantitative Traits**

**Osorio D. Meirelles\***, **Jun Ding** and **Toshiko Tanaka**, National Institute on Aging, National Institutes of Health  
**Serena Sanna**, Istituto di Ricerca Genetica e Biomedica, Consiglio Nazionale delle Ricerche, Monserrato, Cagliari, Italy  
**Hsih-Te Yang**, Taiwan Food and Drug Administration  
**Dawood B. Dudekula**, National Institute on Aging, National Institutes of Health  
**Francesco Cucca**, Istituto di Ricerca Genetica e Biomedica, Consiglio Nazionale delle Ricerche, Monserrato, Cagliari, Italy  
**Luigi Ferrucci**, National Institute on Aging, National Institutes of Health  
**Goncalo Abecasis**, University of Michigan  
**David Schlessinger**, National Institute on Aging, National Institutes of Health

**11:00**

**Secondary Trait Analysis for Case-Control Association Studies in the Presence of Covariates**

**Godwin Yung\*** and **Xihong Lin**, Harvard University

**11:15**

**Penalized Multi-Marker versus Single-Marker Regression Methods for Genome-Wide Association Studies of Quantitative Traits**

**Hui Yi\***, **Netsanet Imam** and **Ina Hoeschele**, Virginia Tech

**11:30**

**Association Studies with Imputed SNPs Using Expectation-Maximization-Likelihood-Ratio Test**

**Kuan-Chieh Huang\*** and **Yun Li**,  
University of North Carolina, Chapel Hill

**11:45**

**Statistical Calibration of qRT-PCR, Microarray and RNA-Seq Gene Expression Data with Measurement Error Models**

**Zhaonan Sun\***, **Thomas Kuczek** and **Yu Zhu**,  
Purdue University

**12:00**

**IUTA: A Statistical Method to Detect Differential Isoform Usage from mRNA-Seq Data**

**Liang Niu\***, **Weichun Huang**, **David M. Umbach** and **Leping Li**, National Institute of Environmental Health Sciences, National Institutes of Health

# ENAR 2014 SPRING MEETING
